Courses

19th and 20th Century Croatian Historiography

38055

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

Course objectives are to introduce students to a new stage of development of Croatian historiography in the 19th century and its gradual transformation into a scientific discipline. The material is exposed clearly and synthetically in the context of the time, but students need to learn about different approaches to the study of the past in some areas of the Croatian ethnic propagation, particularly with the major representatives of historiography in the 19th and then 20th century. In particular, attention should be drawn to new developments and modern outlier Croatian historiography in the last three decades.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » History (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain previous efforts of Croatian Historical Sciences,
2. Describe new approaches to the study of Croatian history
3. Explain how the Croatian historiography has developed through its research period,
4. Indicate the most important people of Croatian historiography,
5. Define the basic problems of Croatian historiography in the 19th and 20 century,
6. Analyze the most important characteristics of Croatian historiography in the said period,
7. Explain historical processes and historiographical approaches used in their study.

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Learning Outcomes

On successful completion of the course, students will be able to:

1. Be familiar with a short history of French and its Latin roots
2. Be able to differ Old French, Traditional French and Standard (Academic) French
3. Understand the specificities of French phonological system (nasal sounds, liaison, discrepancies between spelling and pronunciation) and learn the main spelling rules (punctuation)
4. Differ noun phrase morphosyntax from verb morphosyntax in French grammar
5. Learn how to independently translate from French to Croatian and to translate simple texts to French
6. Work with various French written and audio-visual media online
7. Learn about important people and dates in French history
8. Learn more about Francophony, i.e. use of French in different parts of the world.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Communication Studies

Organize individual and team work
 Prepare and create different forms of presentations and seminar papers
 Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Organize individual and team work
 Prepare and construct work assignments in the interdisciplinary field
 Prepare and create different forms of presentations and seminar papers

Croatology

Croatology

Justify and support the need and willingness for lifelong education
 Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

History

History

Psychology

Sociology

Divide the types of scientific research
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Course Description

The course is aimed at enabling students to independently use media texts, as well as professional and academic texts in German. In addition, it is aimed at encouraging students to independently develop their language skills with the help of reference books and other available sources. Thirdly, the course is aimed at familiarizing students with the culture and civilization of the German-speaking countries and regions. Finally, the course is aimed at further developing students reading and speaking skills.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use various types of German dictionaries and reference books independently
2. Recognize and describe various ways of expressing time in German
3. Recognize and explain word formation patterns in German
4. Explain form and content organization, as well as the main characteristics of German media and academic texts
5. Describe main features of the vocabulary found in German media and academic texts (false pairs, synonyms, words with multiple meanings, terminology)
6. Describe the main characteristics of the culture and civilization of the German-speaking countries and regions
7. Identify and use expressions used for comparing, exemplifying and expressing reason and result in German
8. Identify and use expressions for providing arguments, expressing opinion, agreeing or disagreeing
9. Explain main ideas of media and academic texts in German and discuss in German issues related to their field of study

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the ability to independently browse available databases and other bibliographic sources. Compare available bibliographic resources and select relevant sources for academic writing.
2. Evaluate and critically select relevant literature.
3. Analyze and apply the logical structure of arguments.
4. Design arguments and presentations in written and oral form. Create a standalone report based on a previous analysis.
5. Create visual research equipment in MS Excel, Adobe Photoshop (Gimp) and Corel Draw (InkScape)
6. Write formally correct work in MS Word and LaTeX.
7. Apply scientific and ethical standards in the design of written work.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

Apply basic techniques of correct logical reasoning and conceptual analysis

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition

Communication Studies

Croatology

History

Psychology

Sociology

Describe basic research methods in sociology

Divide the types of scientific research

Sociology

Describe basic research methods in sociology

Divide the types of scientific research

General Competencies

Apply standard academic writing tools in writing essays, written assignments and qualification theses (B.A. and M.A. thesis). • to search bibliographic databases and other sources when carrying out simple research assignments. Exhibit reading comprehension and analytic skills when reading academic text and media contents. Articulate and lay out attitudes and arguments, both in oral and written form.

Screening of student's work

0.25
ECTS Pohađanje nastave [EN]

0.25
ECTS Usmeni ispit [EN]

1.5 ECTS written exercises

2 ECTS

Forms of Teaching

- » Predavanja
 - » Lectures are held once a week for one hour
- » Auditorne vježbe
 - » Practice is held once a week for two hours

Week by Week Schedule

1. Specific characteristics of academic and scientific writing
2. Spelling, grammatical, stylistic, logical and technical standards in the production of written works. Functional styles in the Croatian language, characteristics of the scientific style, goals and types of academic texts, similarities and differences between the humanities and social sciences.
3. The structure of scientific texts in the social sciences and humanities. Specificity of styles of logic and cognitive science.
4. Search for available databases and other bibliographic sources, compare and select relevant sources. Bibliographic norms, types of sources, references and references to sources, purpose of sources, purpose of notes, compilation of bibliographic lists.
5. Collection and evaluation of literature. Sources and questionnaire for reading.

6. Elaboration of the topic, selection of the title, draft and structure of the paper, division of the chapter, purpose and method of writing the abstract of the paper.
7. Setting the problem and main hypothesis of the paper, purpose and method of writing the introduction and conclusion of the paper. Logical structure of text and argument, accepting and rejecting argumentation, linking statements and arguments, presenting and comparing positions.
8. Citation instructions and citation models.
9. Creating and formatting images and charts in MS Excel, Gimp / Photoshop, Corel Draw and Inkscape
10. Working with tables, graphs, use of audio-visual material and graphic text formatting in MS Word and its clones.
11. Formatting text and bibliography in LaTeX.
12. Formatting tables, images and symbols in LaTeX. BibTeX.
13. Code of ethics and standards of the scientific and academic community, the problem of plagiarism and self-plagiarism.
14. Review of the entire seminar paper.
15. Example review in academic writing

Academic Literacy

231232

Lecturer

izv. prof. dr. sc.
Vladimira Rezo

Course Description

Mastering all the elements necessary for the clear, structured and formal correct design of written works and the adoption of technical, logical, spelling, grammatical, bibliographic, stylistic and ethical standards.

Study Programmes

- » Communication Studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the ability to independently browse available databases and other bibliographic sources. Compare available bibliographic resources and select relevant sources for academic writing.
2. Evaluate and critically select relevant literature.
3. Analyze and apply the logical structure of arguments.
4. Design arguments and presentations in written and oral form. Create a standalone report based on a previous analysis.
5. Create visual research equipment in MS Excel, Adobe Photoshop (Gimp) and Corel Draw (InkScape)
6. Write formally correct work in MS Word and LaTeX.
7. Apply scientific and ethical standards in the design of written work.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Write texts and prepare other materials for media and public relations in Croatian and English

ECTS Credits 2.0

Semester Winter

English Level L1

E-learning Level L3 (10%)

Study Hours
15
30

Grading

The final grade is based on attending classes, writing a seminar paper, passing a colloquium and a written exam, and working on practical assignments.

Prerequisites for

Mass Communication Research: A Historical Overview

Theories of Media and Mass Communication

Recognize the needs and willingness to engage in lifelong learning

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Present knowledge about journalism, public relations, communications and society using different communication methods

General Competencies

Apply standard academic writing tools in writing essays, written assignments and qualification theses (B.A. and M.A. thesis). • to search bibliographic databases and other sources when carrying out simple research assignments. Exhibit reading comprehension and analytic skills when reading academic text and media contents. Articulate and lay out attitudes and arguments, both in oral and written form.

Forms of Teaching

Aesthetics

270223

Lecturer

izv. prof. dr. sc.
Željka Metesi
Deronjić

Course Description

Course objectives:

1. explain the status of aesthetics (philosophy of art) as a research domain and a philosophical discipline,
2. explicate methodological conditions for defining art,
3. analyze the content of the main aesthetic concepts and aesthetic properties,
4. explicate the content of the main aesthetic theories,
5. analyze and evaluate strengths and weaknesses of particular aesthetic theories,
6. analyze and evaluate arguments for and against particular aesthetic theories.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define aesthetics as a research domain and a philosophical discipline
2. Define the main aesthetic concepts and aesthetic properties
3. List and interpret major aesthetic theories
4. Identify strengths and weaknesses of particular aesthetic theories
5. Evaluate the arguments for and against particular theories
6. Argue for one's own view of the nature of art

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

ECTS Credits 3.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours 30

Grading

Written test or exam:
100%;

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Critically review different theories

Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

General Competencies

Students will be able to: (1) independently understand, evaluate and interpret theories and arguments used in debates on the philosophy of art; (2) develop their general abilities for philosophical analysis; (3) apply methods of analysis in new situations.

Forms of Teaching

» Predavanja

» Lectures: presentations of main topics.

» Seminar

» Seminar: analysis of relevant artistic artifacts and theoretical arguments.

Week by Week Schedule

1. Introduction: What is aesthetics? What is art? Defining art: aesthetic properties and aesthetic functions (1+1).
2. Artistic representation (1+1).
3. Representational theories of art (1+1).
4. Artistic expression (1+1).
5. Expression theories of art (1+1).
6. Art form (1+1).
7. Formalist theories of art(1+1).
8. Test
9. Aesthetic experience - the reception of artwork (1+1).
10. Reception (aesthetic) theories of art (1+1).
11. Institutional and historical character of art (1+1).
12. Institutional theories of art (1+1).
13. Historical theories of art (1+1).
14. Test
15. Concluding discussion (1+1).

- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*fil (17084) - elective general foundation courses, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Critically argue and estimate the idea of pedagogical pluralism
2. Problematize socio-economic and cultural-ideological influences on education
3. Describe various alternative pedagogical ideas, movements, and directions
4. Illustrate pedagogical, didactic, and methodical solutions in alternative, private and free schools

5. Oppose pedagogical-didactic concepts, organization and practice and referral peculiarities of major alternative schools
6. Describe, analyse, and value the state of alternative pedagogical concepts in the Croatian educational system
7. Design opportunities for the implementation of alternative pedagogical concepts in Croatia

Study Programme Learning Outcomes

Dual-major studies

- active command of one foreign language in academic communication in general
- adherence to the principles of academic integrity and ethical norms of research and publishing
- adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

American conquest of the West: facts, sources, film

270366

Lecturer

izv. prof. dr. sc.
Mladen
Tomorad

Course Description

Introduce to students the most important events related with the "American West" during the 19th century through facts, visual and textual sources, documentary and motion pictures.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Outline the main events related with the conquest of American West
2. Review the main facts from the American history during 19th century
3. Name the key figures of the American "Wild West"
4. Review clearly and concise the main events related with each theme
5. Describe historical processes and explain cause - consequence relations between historical events and historical processes of the American history
6. Compare the historical processes during the various period of the American history during 19th century

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Jakov Erdeljac, mag. phil.

Course Description

The course follows the specificity of philosophy in ancient Greece and development through its periods: A) a colonial period specific on so-called natural philosophers, from Millet to Pythagoreans and Hellenic philosophers until the end of this cosmological period of ancient philosophy; B) the Athenian period with a first Sophists and a philosophical turn to a man until the Socrates, Plato and Aristotle; C) the Hellenistic period specific on development of different philosophical schools, especially epicureanism, Stoicism and Scepticism; D) the roman period and its acceptance and interpretation of Greek philosophical systems in the Roman spirit. The lectures shall be focused on philosophy of the two greatest philosophers Plato and Aristotle.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the meaning of ancient philosophy and its development as a result of a Hellenic genius
2. Relate the Greek spiritual and social atmosphere with the origin of philosophy and its characteristics
3. Describe the basic philosophical problems and emphasises in specific periods of development of ancient philosophy
4. Select the most relevant philosophical representatives and explane their thought
5. Distinguish the importance ot two greatest ancient philosophers, Plato and Aristotle, on the basis of their contribution on development of ancient philosophy and philosophy in general
6. Relate together some elements of philosophical influence on ancient period of philosophy with its later development

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Critically review different theories

Differentiate most important periods of the history of philosophy and their respective philosophical schools. individual philosophers and their works

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Week by Week Schedule

1. The lecture focuses on the meaning of ancient philosophy in general, and presents the most significant philosophers of the pre-Socratic period, so-called Ionian, and their philosophical accents.
2. Presentation of significant pre-Socratic philosophers (representatives of the Elea School as well as philosophers of Pluralism or mediators).
3. In the first part of the seminar, some philosophical emphases of pre-Socratic philosophers, in particular Pythagoras, Parmenides and Heraclitus, are problematized on the basis of selected texts.
4. The lecture discusses the appearance of the first Sophists Protagoras and Gorgias and their movement towards anthropology, as well as the socio-historical circumstances of this shift in philosophical emphasis.
5. In the second seminar, on the basis of some fragments of preserved texts, the Sophists, specifically Protagoras and especially his homo mensura thesis, are discussed.
6. Presentation of Socrates and his philosophical and ethical interest in man, a specific dialectical method of irony and maieutics specific to him. Further, presentation of his followers.
7. The lecture discusses Plato's politics, philosophy of language and rhetoric, as well as his philosophy of nature, including presentation of a relevant writings.
8. The lecture discusses Plato's politics, philosophy of language and rhetoric, as well as his philosophy of nature, while presenting relevant writings in these fields.

9. On the basis of relevant texts, the third seminar highlights Plato's metaphysics and philosophy of nature.
10. Presentation of Aristotle's metaphysics with particular reference to his metaphysics.
11. Presentation of Aristotle's metaphysics with particular reference on his metaphysics, physics as well as his logic and epistemology.
12. The lecture focuses on Aristotle's philosophical emphases in ethics, politics, poetics and rhetoric.
13. On the basis of relevant texts, the fourth seminar discusses the particular emphasis of Aristotle's metaphysical and ethical thought.
14. The lecture deals with the last two periods of the development of ancient philosophy, the Hellenistic and Roman period. Including the socio-political circumstances, the lecture is dedicated to the most significant representatives and their philosophical emphases of epicureanism, stoicism, skepticism and neoplatonism.
15. In the last part of the seminar, the important philosophical accents of Greek and Roman Stoicism and epicureism are discussed (on the basis of individual parts of the original texts).

ANOVA Models

214080

Lecturer

Iva Černja
Rajter,
nasl. doc. dr.

Course^{SC} Description

Systematic introducing the basic logic and series of operative analysis of variance (ANOVA) models as inferential statistical method based on central limit theorem, and directed to empirical data analysis obtained in experimental and quasi-experimental research. Generating at students an adoption and appropriate interpretation of basic concepts, logic and prerequisite assumptions of different ANOVA models, as well as of analysis of covariance (ANCOVA) models, necessary in psychological disciplines and for systematic acquisition of the other psychology subjects topics (undergraduate and graduate). Introducing to students a various multiple comparisons test in ANOVA designs (a priori and post hoc) and related prerequisite assumptions, advantages and limitations. Developing at students the skill of (1) recognition of situations where some of targeted ANOVA or ANCOVA models are used, (2) selection of adequate multiple comparisons tests inside the targeted model, (3) conduction of ANOVA/ANCOVA calculus in SPSS, and (4) detection of eventually unfulfilled prerequisite assumptions and application of necessary corrections. Preparing the students for conduction of minor empirical research by quasi-/experimental design, for adequate ANOVA models applications in related data analysis, and for scientific/professional report writing, in accordance to international standards.

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L1
E-learning Level	L2
Study Hours	30

Grading

Class attendance - up to 14% of the course grade;
 Activ participating during lessons and exercises - up to 3% of the course grade;
 A short computer assessment of knowledge and skills of SPSS application during exercises - up to 4% of the course; 3 homeworks - up to 11% of the course grade; 3 written seminar works - up to 31% of the course grade; Written exam - up to 13% of the course grade; Oral exam- up to 24% of the course grade; Extra points - up to 2% of the course grade.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain statistical-mathematical logic of the calculus of (1) independent samples ANOVA (one-way and factorial), (2) repeated measures ANOVA, (3) mixed ANOVA model, (4) ANCOVA;
2. Name assumptions for specific ANOVA model application, assess their presence in a given problem situation and thereafter choose the adequate model
3. Arrange research design adequate for an ANOVA model application
4. Analyze empirical research findings with adequate ANOVA procedure by using SPSS program
5. Interpret the ANOVA results in terms of set up research problem

6. Categorize and describe specific tests of a priori and post hoc multiple comparisons in ANOVA designs
7. Distinguish ANOVA models of fixed and random factors
8. Explain and in specific data analysis case interpret a basic concepts of statistical power, effect size of independent variable on dependent one, main, interactional and simple effects and homogenous subsets
9. Evaluate limitations and conclusion range of specific ANOVA/ANCOVA model application
10. Write professional/scientific report on the bases of conducted research and adequate ANOVA model data analysis and take responsibility for the quality of scientific interpretation of the results obtained with data analysis.

Study Programme Learning Outcomes

Psychology

General Competencies

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Forms of Teaching

- » Predavanja
 - » Two hours per week
- » Vježbe u praktikumu
 - » Two hours per week

Week by Week Schedule

1. Introduction to ANOVA models course syllabus. Definition of ANOVA and general situation of its application. Central limit theorem and basic logic of independent samples one-way ANOVA. Prerequisite assumptions of independent samples one-way ANOVA.
2. Variance decomposition of the sampling distribution when an alternative hypothesis (H_1) is valid. Sources of variance at independent samples one-way ANOVA. Prerequisite assumptions of one-way ANOVA. Sum of squares (total, between groups and within groups) and their interrelationship. Degrees of freedom and mean square of specific sources of variability. F ratio and operative calculus of one-way ANOVA.
3. Deflection from one-way ANOVA prerequisite assumptions and ways of its solution: Box approach, Welch approach, variable transformation (logarithmic, inverse, square root). Effect size of independent variable (IV) on dependent one (DV) at one-way ANOVA: η^2 and ω^2 . Statistical power of one-way ANOVA: basic concepts (central and non-central F-distribution) and calculus.

4. Multiple comparisons between groups of one-way ANOVA and Type I error (family-wise α and per-comparison α). Definition and basic logic of a priori tests. Kinds of a priori tests and their application: (1) multiple t-tests, (2) linear contrasts, (3) Bonferroni-Dunn test, (4) Holm-Larzererele-Mulike test.
5. Definition, prerequisite assumptions, advantages, limitations and calculus of post hoc tests at multiple comparisons: (1) Fischer LSD, (2) Studentized range statistic (q), (3) Newman-Keuls; (4) Tukey HSD, (5) Ryan-Einot-Gabriel-Welch-q test, (6) Scheffe, (7) Dunnet test.
6. Two-way independent samples ANOVA: definition, motivation, basic concepts (main, interactional and simple effects). Prerequisite assumptions of independent samples factorial ANOVA designs. Sources of variance at independent samples two-way ANOVA. Sum of squares and degrees of freedom calculus.
7. Calculus and interpretation of simple effects in independent samples two-way ANOVA. Multiple comparisons at independent samples two-way ANOVA. Statistical power and effect size of more IV on DV.
8. First seminar report analysis. Three-way independent samples ANOVA: examples and crucial features (main effects, two-way interactions, three-way interaction and simple effects). Prerequisite assumptions assessment and calculus in SPSS. Unequal sample sizes at factorial ANOVA: problems and possible solutions.
9. Repeated measures ANOVA model: crucial features and difference to independent samples ANOVA model. Basic logic of repeated measures ANOVA model and variance decomposition. Repeated measures ANOVA calculus (sums of squares, degrees of freedom, F-ratio). Prerequisite assumptions of repeated measures ANOVA model.
10. Post hoc tests at repeated measures ANOVA model: (1) Games-Howell and (2) modified Fisher LSD test. Two-way and three-way repeated measures ANOVA model: example and crucial features (main effects, two-way interactions, three-way interaction). Prerequisite assumptions assessment and calculus in SPSS.
11. Second seminar report analysis. Fixed and random factors ANOVA models: definition, examples, SPSS calculus and outcomes analysis. Mixed model of fixed and random factors: definition, examples, SPSS calculus and outcomes analysis.
12. Repeated measures ANOVA model with one between groups IV mixed model: example, crucial features, basic logic and variance decomposition. Mixed ANOVA model calculus (sums of squares, degrees of freedom, F-ratio). Mixed ANOVA model prerequisite assumptions.
13. Analysis of variance and analysis of covariance (ANCOVA) in general linear model (GLM) frame: basic concepts and interrelationship. One-way ANCOVA: (1) definition and motivation, (2) covariate interpretation, (3) example, (4) prerequisite assumptions, (5) calculus, (6) adjusted values (means).
14. Third seminar report analysis. Factorial ANCOVA: (1) basic concepts, (2) basic logic and calculus components, (3) example, (4) adjusted values (means).
15. Test.

Course Description

ECTS Credits 3.0

Semester Winter/Summer

Study Programmes

English Level L0

E-learning Level L1

Study Programme Learning Outcomes

Study Hours 30

Dual-major studies

Philosophy and Culture

Croatology

A Philosophical and Theological Approach 214008 to Population

Lecturer

prof. dr. sc.
Ivo Džinić

Course Description

The course aims to get know the philosophical and biblical-theological heritage, more systematically, in terms of demographic discourse. Starting from the origins of philosophical reflexions on population (society), already in the Greek-ancient philosophers Plato and Aristotle, the analyze follows contributions of many other political and social philosophers within their thinking on the structure of the ideal state. Also it will be presented the thought of the most important protagonists of Christian philosophy and theological tradition on this subject.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the importance and challenge of demographic discourse from a philosophical and theological aspect
2. Recognize significant philosophical and theological authors and their views on the population (society)
3. Analyze contemporary demographic trends and efforts on a philosophical-theological background
4. Generate the real demographic challenges of today
5. Evaluate relevant discussions and concrete measures in overcoming demographic difficulties
6. Assess the real problems and consequences of negative demographic trends in Croatia

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

adherence to the principles of academic integrity and ethical norms of research and publishing

ECTS Credits 3.0

Semester Winter

English Level L0

E-learning Level L1

Study Hours

15

15

Grading

Achievements of Students will be valued based on attending lectures and actively participation in observations of the content of classes and the resulting discussions. Their independent work in seminar classes will be also evaluated, so the final grade includes the grade from the seminar. Seminar obligations must be resolved before taking the final exam.

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

1 ECTS Seminarski rad [EN]

1.5
ECTS Usmeni ispit [EN]

3 ECTS

Week by Week Schedule

1. Introductory lecture: basic concepts of the philosophical-theological approach to demography.
2. Philosophical approach to the population (society) in the ancient period.
Seminar: analysis of relevant texts.
3. Significant demographic emphases in the medieval Christian-theological context - Aurelius Augustine and Thomas Aquinas.
Seminar: analysis of relevant texts.
4. Contemporary discussions on population (society) and demography in a philosophical-theological context.
Seminar: analysis of relevant texts.
5. Demographic aspects of ethics and ethical aspects of demography. Human life in an age of biomedical and bioethical challenges.
Seminar: analysis of relevant texts.
6. Real motives of natural increase and religious (Christian) aspects of marriage.
Seminar: analysis of relevant (biblical) texts.
7. The phenomenon and practice of the census and demographic analytical methods.
Seminar: analysis of relevant (biblical) texts.
8. Philosophical, scientific and theological discussions on the beginning of human life.
Seminar: analysis of relevant texts.
9. Legal aspects of birth and issues of the right to life.
Seminar: analysis of relevant texts.
10. Philosophy and life. A Man in front of fundamental existential question of death and the theological aspect of the indicated discourse.
Seminar: analysis of relevant texts.

11. Philosophical and theological approaches to education. On the basic postulations of the philosophy of education.
Seminar: analysis of relevant texts.
12. Homeland and People as a responsible task of Man. Aspects of real patriotism.
Seminar: analysis of relevant texts.
13. The ideal of the rule of the people. On the basic elements of the philosophical and theological view of democracy as a socio-political system.
Seminar: analysis of relevant texts.
14. Contents and critical reflection of relevant discussions and concrete measures in overcoming demographic difficulties.
Seminar: analysis of relevant texts.
15. Concluding lecture: Croatian demographic reality in the context of philosophical-theological demographic discourse.

Applications of Social Research Methods 269476

Lecturer

doc. dr. sc.
Dario Pavić

Course Description

During the course students will learn how to design a research project based on draft research design; how to choose the best method for collecting of the data while being able to explain the advantages and weaknesses of different methods; how to build the instruments for gathering of the qualitative and quantitative data; apply the basic logic of sampling in both qualitative and quantitative approaches; understand the purpose and ways of generalizing the data findings in both qualitative and quantitative approaches.

Students will carry out their own simple research project on purposive sample while respecting the basic principals of research ethics, and will write a report on their research findings. Throughout the practical tasks students will learn the research methods in social sciences but also gain an insight into social research as primarily practice of social relations.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 4th semester, 2nd year*)
- » Sociology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical perspectives and previous research findings as the basis for the development of goals and purpose of research
2. Design a research project by using the best mode of observation to answer a specific research question
3. Design instruments for the collection of the data in qualitative and quantitative research
4. Apply the logic of probability and nonprobability sampling
5. Interpret validity and reliability in quantitative and qualitative research
6. Apply the highest ethical standards of social research
7. Arrange the gathering of qualitative and quantitative data
8. Analyze and interpret qualitative and quantitative data
9. Formulate an answer to the research question
10. Write a comprehensive report on the research findings

ECTS Credits 6.0

Semester Winter/Summer

English Level L1

E-learning Level L2

Study Hours

15

30

30

Grading

Evaluated are: A research report (30%), final written exam (50%) and obligatory class attendance (20%). Submission of the research report is prerequisite for taking the exam.

Prerequisites

Methodology of Social Research

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Sociology

Describe basic research methods in sociology

Compare sociological theory and methodology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

Sociology

Define sociology as a science

Create an effective research plan

Use statistics in social research

Use sources of scientific information

Describe basic research methods in sociology

Compare sociological theory and methodology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Divide the types of scientific research

Identify the basic concepts of statistics

General Competencies

Upon the successfully passed exam, students will be able to:

Organize the implementation of a simple research project.

Report on the society related data in the coherent written and oral form.

Explain causal relationships between the various social phenomena.

Conform to a teamwork with co-workers from various disciplines, of different attitudes or value orientations.

Plan own engagement in resolving of the various social issues.

Employ the adequate methodological approach in the research of social phenomena.

Use different social sciences methods in the analyses of the relevant data.

Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Write a comprehensive research report.

Forms of Teaching

» Predavanja

» Lectures with discussions and tasks.

» Metodičke vježbe

» Design and implementation of research.

Week by Week Schedule

1. Planning a research project 1. part
2. Planning a research project 2. part
3. Choosing methods
4. Logic and techniques of sampling
5. Methods of data collection 1. part
6. Methods of data collection 2. part

7. Methods of data collection 3. part
8. Methods of data collection 4. part
9. Data analysis, 1. part
10. Data analysis, 2. part
11. Data analysis, 3. part
12. Research report, 1.part
13. Research report, 2. part
14. Research report, 3.part
15. Repetitions, exam preparations

Applied statistics in social research

64556

Lecturer

doc. dr. sc.
Luka Šikić

Course Description

The aim of this course is to enable the adoption and application of methodological competence of statistical methods and techniques of inferential statistics on the level of theory and practice. Course content includes the study of specific problems in the application of various methods for statistical analysis of data, and is expected applicability of certain methods of inferential statistics in response to specific research problems. The program potentially includes some of the existing methods that are primarily focused on the implementation and analysis of the obtained indicators of inferential statistics.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses(3rd year), 5th semester, 3rd year*)
- » Sociology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare for a thorough insight into the specifics, advantages and limitations of particular methods of inferential statistics to analyze the data.
2. Apply adopted methodological knowledge in sociological research.
3. Use statistical software SPSS.
4. Select appropriate methodological procedures.
5. Plan the research activities related to the use of methods and techniques of descriptive statistics.
6. Argue the interpretation of results obtained using different statistical methods.
7. Select appropriate methodological procedures.
8. Summarize the results of the statistical analysis.

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Describe basic research methods in sociology
- Compare sociological theory and methodology
- Present research results regarding particular social phenomena

ECTS Credits 5.0

Semester Winter/Summer

English Level L1

E-learning Level L2 (20%)

Study Hours
30
30

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises,/written exam and orally

Prerequisites

Statistics for Social Research

and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

Sociology

Create an effective research plan

Use statistics in social research

Describe basic research methods in sociology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

General Competencies

Use the advanced statistical terms and information

Design a simple research project.

Organize the implementation of a simple research project.

Use the computer software for the analyses of qualitative and quantitative data.

Employ the adequate methodological approach in the research of social phenomena.

Use different social sciences methods in the analyses of the relevant data.

Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Course Description

The aim of this course is to familiarize students with the concepts of Croatian linguistic culture and encourage them to express themselves orally and in writing in accordance with the standards of the Croatian literary language.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Croatology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical knowledge through identifying errors in specific texts and in public communication, individually and in dialogue with others.
2. Define fundamental concepts of Croatian linguistic culture.
3. Analyze Croatian normative principles.
4. Analyze Croatian normative handbooks.
5. Describe normative divergences.
6. Apply the rules described in Croatian orthographies.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language

Identify different theoretical approaches to the study of Croatian culture

General Competencies

Raise the level of linguistic culture, practical literacy and understanding of basic normative principles in the areas of orthography, phonology, prosody, morphology, syntax and dictionary heritage.

Basics of Biological Psychology

94507

Lecturer

doc. dr. sc.
Vanja Kopilaš

Course Description

The general aim of this course is understanding of fundamental principles of nervous system organization, morphology of human central nervous system and functional organization of sensory and motor systems.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic parts of central nervous system at both micro- and macro-scopic levels;
2. Recognize basic parts of neuron and types of glia cells;
3. Describe basic principles of functional and anatomical organization of sensory and motor systems in humans;
4. Describe mechanisms of sensory neural analysis at all hierarchical levels, from receptor to primary sensory cortex;
5. Explain the role of cortical and sub-cortical structures in motor planning and spatial orientation
6. Apply the acquired knowledge in understanding of biological foundations of complex mental functions.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the biological and neurobiological bases of psychological processes and behavior

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

exam 20%.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Screening of student's work

3 ECTS

Forms of Teaching

- » Predavanja
 - » Once a week (90 min)
- » Vježbe u praktikumu
 - » Once a week, in two lab groups (45 mins each)

Week by Week Schedule

1. Definition of biological psychology
2. Incidence and consequences of psychomotorical, neurological and other disorders related to dysfunction of nervous system
3. Development of basic divisions of the CNS, planes and axis
4. Neuron as the basic structural and functional element of CNS, methods for studying the CNS
5. Signal mechanisms, synaptic mechanisms, receptors
6. Neurotransmitters: definition, classification, chemical structure, functional properties
7. Membrane resting potential, action potential
8. Brain morphology, peripheral nervous system
9. Transduction of sensory information into neural code, basic organization of sensory systems
10. Pain, touch, proprioception
11. Chemical senses: taste and smell
12. Vision, organization of visual system
13. Auditory system, vestibular system and cerebellum
14. General organization of motor systems, pyramid and extrapyramid systems
15. Test

Basics of social behavior

201191

Lecturer

izv. prof. dr. sc.
Zrinka Greblo
Jurakić

Course Description

The aim of the course is to familiarize students with theoretical explanations and determinants of human social behavior. Also, given that the social psychology is empirical science with well-developed set of methods for answering questions about social behavior, the emphasis of the course will be on describing a number of examples of socio-psychological research and consideration of their implementation.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the extent of the influence of situational factors on human social behavior.
2. Apply knowledge of the socio-psychological concepts to everyday life and students life experience.
3. Analyze behavioral issues using theories and concepts from the perspective of social psychology
4. Discuss about socio-psychological concepts in daily life
5. Define basic concepts regarding interpersonal attraction, prosocial and aggressive behavior, and group processes and influences

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Plan the search of literature, databases and other sources of information

ECTS Credits 4.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours
30
15

Teaching Assistant
Ida Dukić, mag. psych.

Grading

Attendance of lectures - 5%;
Two essays - 15%
Two colloquia - 80%, each 40% (in case of non-passing or unsatisfactory achievement on colloquia, students can take the final exam, which, by volume, the content and the corresponding ECTS meets the colloquia)

Prerequisites

Introduction to Social Psychology

General Competencies

Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.

Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.

Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Week by Week Schedule

1. Determinants of interpersonal attraction.
2. Theoretical explanations of interpersonal attraction.
3. Theories of love, relationship breakups.
4. Theoretical explanations of motives for prosocial behavior.
5. Personal and situational determinants of prosocial behavior, methods for increase of prosocial behavior.
6. Definition of aggression, neurological and chemical impacts on aggression.
7. Situational and social causes of aggression.
8. Methods for reducing aggression.
9. The first colloquium.
10. Informational social influence.
11. Normative social influence.
12. Compliance to the requests, obedience to authority.
13. Definitions of groups, the impact of the group on individual behavior.
14. Group decisions, group polarization, conflict and cooperation.
15. The second colloquium.

BA work

38774

Course Description

Undergraduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their undergraduate studies and in which the students must demonstrate their ability to independently use literature in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent work and use of literature, as well as the application of appropriate methodology. Double major students write their thesis on only one of their major studies.

ECTS Credits	5.0
Semester	Summer
English Level	L0

- » Sociology -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » Sociology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect and critically study relevant literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of completion of the thesis within a well-defined frame;
5. Define problems, hypotheses and methods which will be used in order to reach predicted results;
6. Write a thesis in the extent of approximately 3500-4500 words (16 to 20 standard pages of text).

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition

Evaluate philosophical concepts, arguments and theories

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Determine the need for lifelong learning and professional development

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Apply methods of social research and statistics

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Apply methods of social research and statistics

Croatology

Croatology

Constructively participate in discussions on croatological topics

Justify and support the need and willingness for lifelong education

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Apply basic computer skills

History

History

Sociology

Define sociology as a science

Create an effective research plan

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use statistics in social research

Use theoretical concepts in the analysis of society

Use sources of scientific information

Describe basic research methods in sociology

Compare sociological theory and methodology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Define sociology as a science

Use theoretical concepts in the analysis of society

Describe basic research methods in sociology
 Compare sociological theory and methodology
 Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike
 Divide the types of scientific research
 Identify the basic concepts of statistics
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of appropriate scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently complete a thesis in the area of research;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write an undergraduate thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates.

Behavioral Neurobiology

37801

Lecturer

doc. dr. sc.
Vanja Kopilaš

Course Description

The aim of this course is to provide students with thorough understanding of biological foundations of complex cognitive human functioning.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic parts of the central nervous system, morpho-functional division of the human cerebral cortex, its laminar organization and neuron morphology;
2. Explain the basic principles of cortico-cortical and cortico-subcortical connections crucial for processing of higher cognitive functions;
3. Explain the principles of neuronal activation in visual and auditory association cortex involved in higher level of information processing, and the role of cerebral cortex in planning, control and execution of voluntary movements and space orientation;
4. Explain the role of higher order association areas in language, working memory, reasoning, planning and other human specific higher cognitive functions, as well as the connections between higher association areas, limbic system and other subcortical structures involved in emotional behaviour, motivational drives, biorhythms and homeostasis;
5. Apply acquired theoretical and practical knowledge in understanding the underlying mechanisms of psychological development and related disorders
6. Apply acquired knowledge in practical use of neuroimaging techniques (fMRI, PET, EEG, MEG);
7. Use educational multimedia online neuroscience resources in written reports and oral presentations;
8. Create a multimedia presentation showing clinical examples of correlations between brain damage and functional outcomes;
9. Analyze scientific review articles from the field of neurobiology of higher cognitive functions;
10. Explain and present the role of biology in normal everyday behaviour and in the onset of psychological disorders.

1
ECTS Praktični rad [EN]

5
ECTS

Forms of Teaching

- » Predavanja
 - » Lectures will be held for two hours once a week.
- » Vježbe u praktikumu
 - » Practical exercises will be held after each lecture.

Week by Week Schedule

1. The role of biological factors in behaviour: trends in brain research in the world, the role of genetic background in shaping of brain structure, the impact of other developmental factors on brain structure, the role of the neural network structure in behaviour, the role of psychologists in brain research; the relationship between growing complexity in brain structure and growing complexity in psychomotor and cognitive functions during phylogenesis; functional division of the cerebral cortex: primary, parasensory and general associative areas; recognition on the scheme.
2. Functional anatomy and histology of the cerebral cortex: laminar organization, allocortex, paleocortex, archicortex, mezocortex, neocortex; recognition of layers on the scheme.

3. Cellular structure and organization of cortical connections: pyramidal neurons and interneurons, afferent systems of the cerebral cortex, laminar organization of afferent and efferent connections; features of cortical neurons; the pyramidal neurons (morphological, chemical and functional characteristics), GABAergic interneurons, basket cells, axo-axonal neurons, columnar "double bouquet" neurons: identification on the scheme.
4. Brain chemical anatomy and reticular formation: neurotransmitters (glutamate, GABA, acetylcholine, noradrenaline, serotonin, dopamine, peptides), brain stem reticular formation and the continuum toward diencephalon and telencephalon; activating brain systems, central limbic central continuum: identifying limbic continuum nuclei on the scheme.
5. Ascending reticular activating system (ARAS): MFB, centrencephalon, mediobasal telencephalon; functional organization of the limbic system; structures of the limbic system: Papez circuit, the amygdala, the central limbic continuum, mediobasal (septal) area, hypothalamus, hippocampus, fornix; identification on the scheme.
6. EEG and general cortical activity: EEG waves, methods of monitoring the functional activity of the brain, evoked potentials; neurobiology of consciousness and sleep: thalamic reticular nucleus, sleep spindles, levels of consciousness, sleep cycles, REM stages; demonstration of the EEG; multimedia EEG presentation.
7. Neurobiology of vision: the organization of the primary visual areas, ocular dominance columns, secondary visual areas, opposite opponent colours system, perception of depth and movement; visual illusions: computerized exercise displaying visual illusions and their interpretation.
8. Visual-motor processing: the area for the control of eye movements (area 8); the role of the cerebral cortex in motor activity: primary and supplementary motor areas; motor pathways: computerized demonstration of the differences in stimulating pyramidal and extrapyramidal system.
9. Neurobiology of biorhythms: supraoptic area of the hypothalamus, circadian, circannual rhythm; neurobiology of emotion: orbital prefrontal cortex, limbic system, the theory of emotions; functional anatomy of the limbic system: the effect of stimulation of different areas of the limbic system - a multimedia presentation.
10. Neurobiology of sexuality: the hypothalamus, sexual dimorphism, sex differentiation, sex differences in the brain; neurobiology of higher cognitive functions: the relationship between general and parasensory associative areas; functional anatomy of associative areas: the prefrontal cortex, angular and supramarginal gyrus; identification on the scheme and functional implications.
11. Neurobiology of attention: different types of attention, unilateral neglect syndrome, dorsal parietal cortex; neurobiology of working memory: dorsolateral prefrontal area, cortico-striatal projections; functional integration of cortico-limbic structures: prefronto-limbic projections, identification on the scheme.
12. Neuroanatomy of learning and memory: localization of short-term memory and long term memory storage; case study H. M.; cellular mechanisms of learning and memory: long-term potentiation (LTP), long-term depression (LDP), retrograde synaptic transmission, Kandel's learning model on *Aplysia*; anatomy of the hippocampal formation: entorhinal area, dentate gyrus, perforant pathway, mossy fibers, Schaffer collaterals, CA1 and CA3 area, alveus; identification on the scheme.

13. Neurobiology of speech and language: Broca's and Wernicke's area, Wernicke-Geschwind model; the evolution of language functions and the importance for the development of human specific higher cognitive functions; lateralization of brain function, "split brain" experiments; differences between the concept of dominance and lateralization of brain function; anatomical differences between left and right hemispheres: demonstration (in the native slices) of the differences between the left and right hemispheres in the size of the Broca's and Wernicke's area.
14. Neurobiology of social behaviour: metacognition ("theory of mind"), the Klüver-Bucy syndrome and differences in symptomatology between man and ape, the biological basis of altruism and moral behaviour; brain plasticity: medical and educational significance, social, philosophical and ethical aspects.
15. Interindividual variability in brain structure: native and histological slices demonstrations; changes in the morphology of the brain after lesions: native and histological slices demonstrations.

Book and Library History in Croatian Cultural Territory

144799

Lecturer

doc. dr. sc.
Lucija Krešić
Nacevski

Course Description

The subject goals are to introduce students with manuscript books, and the process of making it; than to introduce them with the making of printed books. Consequently, library development in Croatian territory will be discussed.

There are no conditions for joining the subject.

The subject contributes at every study level.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define book history as a discipline.
2. Analyze "book" in different social and cultural processes.
3. Describe book-library interaction.
4. Define the role of the book in relation with social activities and conditions.
5. Explain preparation of manuscript book in medieval times.
6. Compare codex and printed book.
7. Analyze the development of printing in certain European parts.

Brain, Cognition and Education

200154

Lecturer

doc. dr. sc.
Vanja Kopilaš

Course Description

The course objective is to acquaint students with contemporary cognitive, neuroscientific and psychological interpretations of the dynamic relationship of neural basis, cognitive processes, upbringing and education.

The course is designed for students with a high school background in human biology and psychology and formed from a teaching platform of researchers and teachers interested in an interdisciplinary, cognitive-neuroscientific approach to education. The student will gain basic insights into the cognitive processes that significantly determine school achievement and educational processes with a clear emphasis on their neural basis and function in upbringing and education. In doing so, they will have the opportunity to see picturesque representations of the three basic components of the subject - the neural basis, the cognitive process, the educational outcome - and to discuss the ambiguity of their connection. They will get to know the various measures of the three basic components mentioned above, and learn about the challenges facing educational professionals trying to apply the achievements of multiple scientific disciplines. In addition to a strong emphasis on interdisciplinary dialogue, the course also addresses the gap between research and practice.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the importance of cognitive neuroscience for educational programs and practice
2. Define cognitive processes important for education and to describe their neural basis
3. Identify different measures of educationally relevant cognitive processes and to list areas of application in education
4. Analyze and correctly interpret the interaction of the brain, cognitive system (mind), upbringing and education
5. Distinguish between higher and lower cognitive processes, and discuss their interrelationships, as well as relationships with school achievement

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

I. modality Attendance → 11 to 15 credits (each unjustified absence -1 point) 2 midterm exams → up to 50 points (2x25) Extra points → up to 5 points II. modality Attendance → 11 to 15 credits (each unjustified absence -1 point) Written exam → up to 50 points Extra points → up to 5 points The final grade reflects the total sum of points for all student obligations and is determined - with possibly minor point corrections - as follows: Sufficient (2) = 33 to 40 points Good (3) = 41 to 49 points Very good (4) = 50 to 57 points Excellent (5) = 58 to (65 + 5) points

6. Relate the development of neural base and cognitive processes while growing up with learning capacities and illustrate the importance of matching these capacities with the requirements of educational programs

Catholic religious orders in Croatian culture

173127

Course Description

The course aims to explore the basic political and social developmental processes of monasticism in Croatian culture, where the mentioned topic will try to be described in a broader European cultural context.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the phenomenon of monasticism in Christianity
2. Analyze the causes of emergence of monasticism in Christianity
3. Identify and explain the first traces of church culture in early medieval Croatia
4. Identify the first traces of monasticism in medieval Croatia
5. Explain and categorize the most important church orders in medieval Croatia
6. Explain the broader context of the emergence of some of the most important church orders

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Generate and conduct historical and other types of discussions

Identify historical facts and processes from European and national history

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Apply the methodology of various historiographical fields and other research methods from the humanities

History

ECTS Credits 3.0

Challenges of modern upbringing and education

217042

Lecturer

prof. dr. sc.
Neven Hrvatić

Course Description

Introducing students to the field of pedagogy, foundation and basic terminological definitions: starting points, theoretical frameworks and practical implementation, important for teacher training.

The realization of the content of the course should ensure a complete and systematic insight into the determinants of modern upbringing and education.

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L3 (10%)

Study Hours
15
15

Grading

In addition to regular and active participation in lectures, students will present certain teaching contents within the framework of seminar obligations, individually and divided into smaller working groups: shorter thematic contents (study of sources-literature). After the realization of larger teaching units, the success will be evaluated through a colloquium, the results of which, together with the seminar obligations, will be an integral part of the final exam. Engagement in class: 10% of the grade

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the complete structure and terminology of pedagogical science and summarize basic knowledge
2. Analyze the state and problems of contemporary pedagogical theory, pedagogical practice and teacher training
3. Define and explain the meaning, structure and extended activities of upbringing, education and school in the contemporary context.
4. Compare and distinguish pedagogical models of upbringing and education from the aspect of children/students with special needs
5. Recognize the needs and readiness for involvement in lifelong learning
6. Analyze different pedagogical theories and discourses and establish similarities and differences between them

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Interpret various cultural, social and political phenomena

Communication Studies

Prepare and construct work assignments in the interdisciplinary field

Croatology

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

History

Critically judge one's own work and defend one's position in team work with arguments

Psychology

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

Sociology

Critically judge the current social situation
Compare different social phenomena in different cultures

Childhood Pedagogy

226199

Lecturer

izv. prof. dr. sc.
Katarina Dadić

Course Description

The aim of this course is to train students for a critical discussion of childhood in relation to the concepts of culture and globalization from a domestic, international and comparative perspective, bearing in mind the perspective of the child himself. The course is aimed at familiarizing students with contemporary phenomena that characterize childhood (globalization, consumer environment, local culture, technology, media, migration, etc.) and focuses on the concept of childhood, which is approached from different perspectives (history of childhood, sociology of childhood, among with a significant emphasis on the pedagogical discourse) with the aim of developing a critical attitude towards different theoretical and social perspectives, as well as constructions of childhood.

English Level	L0
E-learning Level	L1
Study Hours	30

Grading

The work of students in this course is monitored and evaluated continuously with colloquial monitoring. During the semester, students take 2 colloquiums and write one essay. Students also take a written exam that checks and evaluates their complete knowledge based on the mandatory literature offered. The final grade consists of all graded elements (colloquium (0.5)+essay (0.5 +0.5 ECTS)+written exam (1 ECTS).

- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic terms (childhood, pedagogy, culture) within the educational sciences
2. Describe and interpret the most important ideas, trends and periods in childhood development
3. Explain the place and role of childhood within educational sciences
4. Analyze theoretical discourses in relation to childhood and establish similarities, but also differences between them
5. Present the results of recent theoretical research in the field of sociology of childhood, history of childhood and pedagogy of childhood
6. Illustrate the acquired theoretical knowledge with examples from children's lives, taking into account the child's perspective
7. Interpret the functioning of the interdisciplinary concept of childhood, as well as strategies for its quality development within the framework of various social events and cultures

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Prepare and create different forms of presentations and seminar papers

Croatology

Apply basic computer skills

History

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Coatian Diaspora and Public Action

226937

Lecturer

doc. dr. sc.
Ozana Ramljak

Course Description

Course objectives: introduce students to the concept and basic theories of publics, public space and public opinion, as well as models of public action

with special emphasis on culture, politics and the media in the Croatian diaspora; to raise awareness of the public activities of the Croatian diaspora as a platform in a series of predetermined sociological, political and cultural assumptions, but also the broadest understanding of the nature of media; consciously and/or unconsciously articulates and builds on their own content and perception of themselves, Croatia, connecting and joining the new environment and the concept of Croatian development; develop students' critical thinking about issues of responsibility, ethics, influence and manipulation in the national and global environment in the context of the Croatian emigrant position in the public; to create the prerequisites for understanding, analysing, creating and acting within "media mediated reality" in the Croatian diaspora,

Croatia and in general; consider the role of the Church and other Croatian institutions in preserving the national identity of the Croatian diaspora; to introduce students to the institutions of the Croatian diaspora as well as their role and contribution.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 4th semester, 2nd year*)
- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the theoretical and methodological concepts of the public, public spaces as well as the legitimacy of the public emigrant space
2. Explain and analyse models of public activity in the Croatian diaspora
3. Explain the possibilities of applying established concepts in public action and their influence with respect to the emigrant context
4. Explain cultural, political and media processes in the Croatian

15

Grading

Attendance and discussion during class, seminar work, classroom and oral exam. In addition to classical ways of conducting lectures, seminars, exams, interviews, tests and the like, independent research works are specifically evaluated and, through mentoring, students are extended to the meet the academic requirements to be able to present and participate in scientific and professional meetings or write articles suitable for publication in appropriate journals. This particular aim is for students to develop their independence and to confirm their cognitive abilities. In this way, students can already publish and develop the required skills for future work and employment in research teams

diaspora

5. Create suitable content and communicate it in emigrant and other public spaces
6. Apply the scientific approach in explaining, analysing and synthesising the underlying concepts of emigrant public activity

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Interpret data on Croatian and global population and emigration

Communication Media Theories

228067

Lecturer

izv. prof. dr. sc.
Ivana Greguric

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

The course considers the impact of the media on the ontology and anthropology of man in today's information society as a "spectacle society". This applies both to "classic" media (newspapers, radio and television) and to the Internet as a new medium. The media as message carriers and the extended hand of man create an image of historical reality and ethical values that, under the influence of media owners and the global influence of science and technology, change today's society and become the main driver of (re)shaping the world. In this sense, it is important to reflect on the current influence and power of modern media on the creation of social processes. Through the course, students will become familiar with different media theories, mediaology and media philosophy (Harold Innis, Marshall McLuhan, Walter Benjamin, Theodor Adorno and Max Horkheimer, Regis Debray, Günther Anders, Guy Debord, Jean Baudrillard, etc.)

Study Programmes

- » Croatiaology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)

Contacts between civilizations in late antiquity and the early Middle Ages

209791

Lecturer

izv. prof. dr. sc.
Marko Jerković

Course Description

The main goal is to acquaint students with the basic processes that characterized civilizational relations in the late antiquity and the early Middle Ages. Instead of looking at late antiquity and the early Middle Ages through the prism of decay and weakness, this course aims to show that these are in fact the turning points in the transformation of European history. This transformation ultimately spawned three great and important civilizations: medieval Europe, the Byzantine Empire and the Islamic Caliphate. Also, the aim of this course is to present basic insights into the transformation of the Roman Empire during the Late Antiquity and the Early Middle Ages (200-750), and to show that much of the title of the Roman Empire remained a vital part of European history in the Middle Ages. Furthermore, the aim is to acquaint students with the most important primary sources and contemporary literature relevant to the issue under consideration. In addition to mastering basic factographies and historical processes, students will be first and foremost encouraged by comparative thinking and an interdisciplinary approach.

Teaching Assistant
dr. sc. Marko Marina

Grading

Assessment will be based on class attendance, active participation in classes, fulfillment of obligations (brief reviews of individual texts) and the results of the written exam

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic processes in the social, cultural and ecclesiastical history of the early Middle Ages
2. Analyze fundamental historiographical questions about interreligious relations in the Middle Ages
3. Explain and to put you in the context the main events, which represent the turning points in the development of medieval civilization
4. Analyze the continuity of social processes in the period of the Late Antiquity and the early Middle Ages
5. Explain the importance of the rise of Christianity in the Roman Empire and the impact it had on the transformative period of late antiquity and the early Middle Ages
6. Explain the basic features of the process of creation of three great civilizations: the Byzantine Empire, the Islamic Caliphate, and medieval Europe
7. Explain and highlight the most important representatives and protagonists of the transformation of the Roman Empire and the creation of barbarian kingdoms. Interpret the influence of church institutions on late antiquity and medieval society.

Study Programme Learning Outcomes

Dual-major studies

- active command of one foreign language in academic communication in general
- adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Croatology

History

- Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science
- Formulate and orally present knowledge about historical processes and data
- Identify historical facts and processes from European and national history
- recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic theoretical approaches and concepts within the framework of contemporary international migration trends
2. Develop understanding of new approaches to international migration research
3. Define the causes/motives and consequences of contemporary international migrations in the area of reception and origin of migrants

4. Develop understanding of the spatial and temporal dynamics and specifics of international migration flows at the world and European level
5. State the flows, causes and consequences of large migrations to Europe
6. Explain the characteristics of external migration of the Republic of Croatia and the causes and consequences of contemporary migration movements of the population of the Republic of Croatia
7. Define the features of external migration of Bosnia and Herzegovina and the emigration of Croats from Bosnia and Herzegovina
8. Develop in students the skill of presentation and presentation in front of colleagues and the public, and the skill of participating in discussions

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Carry out analytical and scientific procedures of forecasting and modeling the future

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Develop a scientifically independent opinion on demographic and emigrant issues

Interpret data on Croatian and global population and emigration

Course Description

In the second half of the 20th century, the historical regions of Croatia were mainly characterized by the communist totalitarian system. Almost 50 years of political, social and cultural indoctrination were also marked by a series of actions of the repressive state apparatus, which was no stranger to committing very cruel mass crimes or later executing individuals. However, the most massive crimes were committed at the very end of the Second World War. We try here to limit ourselves to the crimes and multiple human rights violations committed until 1949, although we must also address some aspects of later periods, because they additionally explain the context of the crimes from this first period of their commission.

For this reason, this course aims to fill the historiographical gap that has been missing on this important topic and to provide students of undergraduate history with basic information to understand the current processes in Croatian society today.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the processes to which the Croatian regions were subjected in the period of transition and conversion to the communist model of administration
2. Analyze and clarify the most important dates and events related to the most atrocious communist crimes
3. Define controversial political events in the period from 1944 to 1949
4. Describe the main social and political events that influenced the wave of repression of 1968-1972
5. Analyze of the key elements in the relationship between the repressive system and Croatian political emigration - the first wave after World War II
6. Analyze of the credibility of the individual sources and documents

Study Programme Learning Outcomes

Dual-major studies

	30

Grading

To pass the written exam, students must have 61% correct answers for each part of the exam (listening, reading with vocabulary, grammar, and writing).

Course Description

The course aims are to enable students to recognize and select the language means needed to achieve communication competence at the A2 level according to CEFR in Croatian as a foreign language. Students will be able to describe everyday life (people, destinations, events, activities), comment on simpler topics and texts, and express their own opinion with appropriate vocabulary that allows them to cope with everyday situations.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe similarities and differences between cases and verb forms in the Croatian language.
2. Distinguish word classes and their morphological, syntactic and lexical features in the Croatian language.
3. Use shorter texts of appropriate topics and vocabulary.
4. Write simpler texts and letters on familiar topics.
5. Express their own opinion and plans and describe everyday events by using simple vocabulary.
6. Compare similarities and differences between the culture of Croatian as a foreign language and the culture of the mother tongue.
7. Identify and explain basic information about Croatia (flag, coat of arms, anthem, public holidays) and everyday life in Croatia (names, surnames, food, hobbies, housing, public transport).

Study Programme Learning Outcomes

Croatology

Justify and support the need and willingness for lifelong education

Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

Croatian Catholic Missions

238017

Lecturer

doc. dr. sc.
Wolffy Krašić

Course Description

The aim of the course is to acquaint students with the role of Catholic missions in preserving Croatian national and ethnic identity in emigration. The connection between confessional and national identity maintains the continuity of Croatian identity, which requires constant confirmation specific to a foreigner in a certain social framework in an uncertain and undefined space between two identity bases.

Study Programmes

- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the importance and significance of Croatian Catholic missions in emigration and their role in preserving the Croatian national identity among emigrants and their descendants.
2. Recognize the connection between confessional and national identity, which reflects the continuity of Croatian identity, especially in times when the homeland was ideologized and atheized society, and the national and national identity was threatened by the repressive state apparatus.
3. Explain the historical development of the Croatian foreign herd and its organizational structure.
4. Explain the purpose and methods of operation of the network of Croatian Catholic missions
5. Recognize the role of Croatian Catholic missions in preserving and building elements of Catholic and Croatian identity in the diaspora and transnational social spaces

Croatian Cultural and Political History of the 16th and 17th Centuries

37435

Lecturer

doc. dr. sc.
Ivana Jukić
Vidas

Course Description

The history of Croatia in the 16th and 17th Century was marked with desintegration process of its territory. The main course objective is to explain how this process created and changed Croatian cultural and political identity. The medieval Croatian territory was dismembered in above mentioned centuries between Habsburg Monarchy, Venice and Ottoman Empire and the course will describe how those political centers influenced (or/and not) social, political and cultural life within Croatian lands.

Study Programmes

» Croatology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe socio-political processes within Early Modern Croatia in the 16th and 17th century
2. Argue why was Croatian territory desingrated and what were the implications of that process for the future
3. Analyze how different social classes faced with socio-political changes of the period
4. Compare cultural identities of Croatian lands based on their political affiliation
5. Explain how political desintegration influenced creation of the multiple Croatian identities
6. Relate socio-cultural similarities and differences of Croatian lands to neighboring countries

Study Programme Learning Outcomes

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Explain and analyze the components of Croatian culture and their connection

E-learning Level	L1
Study Hours	30
	15

Grading

Class attendance and participation in the discussion related to the topic of the seminar paper will be assessed throughout the semester and will be incorporated in the final grade (oral exam).

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the acquisition of factual knowledge about key events, processes and people from the Croatian cultural and political history of the 20th century, which implies the ability to identify, define and describe key events, processes and people, how they emerged to be and their workings in the Croatian cultural and political history of the twentieth century (Example: the identification, positioning and describing programmatic records, internal structure and political activities of political parties which operated in the Croatian countries)
2. Analyze: the students should demonstrate the ability to understand and the ability to reflect on the meaning of factual knowledge, which implies the ability to explain, generalize, classify, paraphrase, summarize and group factual knowledge gained during the course (Example: identification and contextual positioning of political and social tendencies of the rural population in the Croatian countries)
3. Apply: the students should demonstrate the ability to separate the learned content into constituent parts and understand the organizational structure of the acquired course subject matter, which implies the abilities such as selection, planning and interpretation of course content (Example: correlating key (i.e., constant) internal problems of both Yugoslav states, i.e. the issues of nationality, in particular the Croatian)
4. Analyze: the students should demonstrate the ability of personal assessment and critical approach in relation to the course subject matter, which implies the ability to separate information in different parts, which is to say point out how they relate to each other (Example: spotting and pointing out the occurrence of longer historical influences such as the harm from non-democratic systems of managing and ruling the Croatian countries)
5. Present: the students should demonstrate skills such as categorization, planning, hypothesizing, modifying, reviewing and formulating, which implies the ability to create new information based on the data collected (Example: shaping and establishing general, but also new insights, such as the need for a different type of international community's intervention in the conflicts which qualify as aggression and civil war)
6. Explain: the students should demonstrate skills such as comparison, assessment, evaluation and objective criticism (Example: after the adoption of the synthetic conclusion on the necessity of reaching a fair political and legal status of minority communities in the Republic of Croatia, by means of assessment (critical discussion) the current situation is established, followed by recommendations for improvement)

Croatian Cultural and Political History of the Middle Ages

37431

Lecturer

doc. dr. sc.
Tomislav Popić

Course Description

Course objectives is to bring closer to the students the Croatian medieval history and point out to them how the events and processes are intertwined on the Croatian and European level, in the political, social and cultural sense. The history of Croats in the Middle Ages was marked, after their arrival, by the creation of their own state, which has experienced ups and downs depending on the internal and external political factors. Uniting with the Kingdom of Hungary in a personal union (upon the arrival of the Arpad dynasty on Croatian throne) and the increasingly powerful Venetian presence on the eastern coast marked the history of Croatia during the period of the High Middle Ages, at the end of which, as a result of the Ottoman conquest, Croatia will be reduced to remnants of the remains. The underlying aim of the course therefore is to introduce to the students how these processes affected the medieval political, social and cultural development of the Croatian lands.

Study Programmes

» Croatology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the socio-political processes that affected the Croatian territory during the Middle Ages.
2. Explain why the Arpad dynasty came to hold the Croatian throne.
3. Analyze how historical circumstances led to the reduction of the Croatia to "the remnants of the remains".
4. Compare the medieval social and cultural development of the Croatian lands in the European context.
5. Describe the basic dynasties that ruled during the Middle Ages in Croatia
6. Explain the differences between cultural and social circumstances during different parts of the Middle Ages in Croatia

Croatian Cultural Tourism

213951

Course Description

To increase the knowledge, skills and understanding of the key and functional relationship between the structure and movement of the population and the economic, social and geographical legitimacy and processes of the emigrant economic, financial, academic, demographic and any other wealth and the overall development of Croatia.

To develop the ability to recognize, identify, clarify, implement and defend the need for the analysis of population and diaspora in service of societal and political decision-making.

To contribute to the development of personal traits of a student, particularly by developing a value system. This value system is defined by Croatian identity values within the framework of total population of Croatia without which it would be impossible to further analyse and focus the issues of demography and diaspora within academic and general frameworks.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop ability for correct and precise insights of cultural traces in accordance with appropriate social and political context.
2. Define fact overview of spiritual and material products of Croatian culture from ancient history until nowadays.
3. Explain synthesis of domestic cultural achievements and foreign phenomena found in that area as well as foundation of their correlations with Central European and Mediterranean cultural circles.
4. Develop ability for critical consideration of cultural heritage as a valuable tourist potential.
5. Develop interest for research Croatian emigration as an irreplaceable element for Croatian tourism development.
6. Relate with European cultural politics and develop ability of recognizing models optimal for implementation in specific geographical and cultural scope.
7. Define different features of local, regional and national cultural tourism models in Croatia.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Propose political and legal solutions based on scientific research of demographic and emigrant content

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-

Croatian emigrant media

214020

Course Description

The aim of the course is to get acquainted with the history of the development of Croatian media in different environments in the diaspora, to get acquainted with the circumstances in which they arose, the ways in which they developed or extinguished, the difficulties they encountered, etc. Special attention will be paid to specific circumstances in certain emigrant communities, also in Croatian autochthonous communities in the diaspora, because they are very different from each other.

To a large extent, it will be considered to what extent new technologies and media have influenced the development of emigrant media as a whole, but also the shutdown of individual publications. The role of the Croatian language in the development of the Croatian media in the diaspora from the 19th century to the present day will also be discussed, as well as the extent to which it is suppressed by the language of the majority community with new generations.

Students will independently research, discover and discuss new electronic media and new forms of media activity. They will consider the role of the media in the social life of emigrant and minority communities (cultural events and various other meetings, sports activities, schooling and education system, entrepreneurship, religious life, cooperation with the homeland, etc.).

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain why newspapers are an important medium for communities in the diaspora and how newspapers and public media activities can influence the social, economic and political inclusion of emigrants in the development concept of Croatia.
2. Reproduce the meaning of different genres within the press and public activities in the diaspora and their role in preserving the Croatian emigrant identity.
3. Recognize the importance of Croatian radio and television programs in the diaspora.
4. Recognize and accept as a new wealth the diversity of the media, portals, etc. of the Croatian emigrants and minority communities.
5. Analyze the advantages and disadvantages of the classical way of reporting and new technologies and media.
6. Reproduce basic cognitive, critical and analytical competencies related to classifications, typification, analysis, prediction and evaluation of the content of individual media and other patterns of public action in the diaspora.
7. Compare the basic differences between the press and other forms of public action on individual continents, as an additional emigrant wealth.
8. Recognize the basic differences between the press and other forms of public action in minority communities compared to those of emigrants.

Croatian Ethnology

188075

Lecturer

Marinko
Vuković,
nasl. izv. prof.
dr. sc.

Course Description

To introduce students to the beginnings of the development of anthropological and ethnological sciences in Croatia, and introduce them to the modern scientific and professional ethnological and anthropological developments in Croatia. Acknowledges the fact that the study of traditional culture (in an earlier stage of Croatian ethnology) and the intertwining of traditional with contemporary culture and patterns of everyday life (in the latest phase of Croatian ethnology and cultural anthropology), ethnological science analyzed and interpreted the Croatian ethnic and cultural identity in European context.

Croatian Language in the 19th Century

215163

Lecturer

prof. dr. sc.
Mario Grčević

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours

15

15

Grading

Teaching activity and knowledge of literature are assessed.

Course Description

The aim of the course is to introduce students to Croatian language history in the 19th century.

At the beginning of the first half of the 19th century, two Croatian literary languages were in use: Kajkavian and Štokavian. Due to the activities of the Illyrian movement, the Kajkavian literary language was abolished in favor of the literary language of the Štokavian stylization. The Zagreb School of Philology inherits and develops the literary and linguistic principles of the Illyrians, and representatives of the Zadar and Rijeka Schools of Philology come forward with their own normative proposals. In the standardization of the Croatian literary language at the end of the 19th century, Croatian Vukovar people - followers of the Serbian reformers Vuk Stefanović Karadžić and Đuro Daničić - imposed themselves as authoritative. Karadžić participated in Croatian linguistic and linguistic events - directly and indirectly - as early as the first half of the 19th century as the main employee of the Austro-Slavic linguistic project initiated and led by the censor for Slavic books Jernej Kopitar in Vienna.

Croatian Literary Baroque and the Ages of Enlightenment

52318

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

Based on the consideration of the Croatian literary Baroque and Enlightenment, the students will gain analytical and critical understanding of literary phenomena in general. They will become qualified for the reading of Baroque texts in their studies. Furthermore, they will acquire knowledge about the life and works of the Croatian writers of the periods of Baroque and Enlightenment. The students will become familiar with specific Croatian Baroque literary types. They will be encouraged to think critically and to develop the ability to express through writing seminar papers.

Croatian Literature of Humanism and Renaissance

188076

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

Knowledge of ideologists and ideologies will be acquired as well as changes in styles and stylistic formations, especially given the relationship between the Middle Ages and the Renaissance and the renaissance of the crisis, recognizable in the traits known as the term mannerism. Burckhardt, Huizinge and Hocke will be studied with particular attention in this set. The conceptual and thematic features of Latin-language literature in Dubrovnik and Dalmatia and at Corvinus Palace in Budapest will be described in detail, and questions of Protestants within Croatian literature will be discussed. Students will be introduced with special attention to the women's script in the Renaissance, especially with Marija Gundulić, Cvijeta Zuzorić and Nada Speranza Vittoria Bona. Comparative aspects of Croatian Renaissance literature will be emphasized, especially in relation to relations with Italian contemporary literature, comparing Croatian examples with related ones in European literatures. Numerous texts from the fringes of literature, scientific and historiographic and philosophical writings, as well as those which, although not written with literary intent, can be interpreted as the spiritual and cultural aspirations of their time. Writers in the Croatian language with those who wrote in foreign languages such as Italian and Latin are brought to the same plan.

Croatian Literature of the Middle Ages

45641

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The Course on Croatian medieval literature deals with basic issues associated with the latest developments in the knowledge on this crucial epoch of European history. The process of learning is based on the individual analysis of both literary and non-literary sources, strictly liturgical and also of fiction prose writings and historic and legislative documents. The studying of the medieval epoch is connected with the status of intellectuals in that time and also on the concept of the ideas that they had of the world. The students will become acquainted with the methodological problems of contemporary medievalism and trained for critical application of different approaches to Croatian texts of the Middle Ages, as it will improve their understanding of the European context of Croatian culture at that time, especially in relation with other European cultures. Students will study some of the basic concepts of everyday life in medieval time, they will learn about the marriage and children, love and war, about the concept of hell, purgatory and heaven, of death and of traveling to distant lands. Course objectives include: mastering the fundamental questions that are connected with the literature of that time as well as they will acquire knowledge of the architecture and music, painting and science in that time. Students will be trained to independently interpret and analyze texts from Croatian Middle Ages. Using examples from the Croatian medieval literature they will be trained to reach sovereign command of the Croatian identity during this period. At each level of instruction, students will be educated to understand the time of the dissolution of the Roman Empire and to the discovery complexity, richness and diversity that was possessed by various classes of medieval men.

1. Gottschalk on the court of Trpimir and the beginnings of Croatian literacy. Insight into the activity of the Benedictines at the time of the first Croatian national rulers. Aquileia and its significance in the cultural history of the Croats.

2. Lucidar and medieval system of education compared with the humanist of XIV. and XV century. A university life in the Middle Ages. Dominican University of Zadar. Herman Dalmatian and his contribution to the intellectual exchange between Islam and the Western civilization.

3. Physiologist and the medieval literature about animals. Novel about the fox and its poetics. The medieval bestiary in Croatian visual culture. St. Francis and animals.

9. Recognize the importance of philological discovery for the literary history of Croatia
10. Analyze the macro and micro structure of the Baška Tablet

Study Programme Learning Outcomes

Dual-major studies

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

General Competencies

After the first semester of study/learning (Croatian literature of the Middle Ages, 2 classes per week, 12 lessons units/Croatology, undergraduate), the students will be able to do the following:

- clearly perceive the development of the beginnings of Slavic literacy by means of acquired theoretical philological and historical knowledge
- acquire the skill of writing in three scripts (triliteracy) - Latin, Glagolitic, Cyrillic;
- competently interpret the historical development of the Croatian language and literature, and then observe it in the wider context of medieval Europe along with well-argued knowledge (activity of Cyril and Methodius, the development of the Glagolitic and Cyrillic script, canonical writings, Old Slavonic language evolution, the formation of redaction, transmission of literary genres);
- describe, analyze and define the beginnings of Slavic and Croatian literacy in medieval European context;
- observe in parallel the development of literacy on the Croatian territory over time (from the 7th century to the year 1396) and space (Istria, Dalmatia) in regard to the European (Byzantium, Italy, France) with well-presented historical and literary factors, applying the recent scientific achievements (supplementary literature);
- summarize the European medieval Literacy (Benedictine heritage - common values) and identify and interpret Croatian specificities such as: Angular Glagolitic script, triliteracy and trilingualism and the activity of Glagolitians in the context of medieval Slavic and Western European written cultural heritage.

Week by Week Schedule

1. 1. Gottschalk on the court of Trpimir and the beginnings of Croatian literacy. Insight into the activity of the Benedictines at the time of the first Croatian national rulers. Aquileia and its significance in the cultural history of the Croats.
2. 2. Lucidar and medieval system of education compared with the humanist of XIV. and XV century. A university life in the Middle Ages. Dominican University of Zadar. Herman Dalmatian and his contribution to the intellectual exchange between Islam and the Western civilization.
3. 3. Physiologist and the medieval literature about animals. Novel about the fox and its poetics. The medieval bestiary in Croatian visual culture. St. Francis and animals.
4. 4. Marco Polo and his travels in Asia described in the book *Il Millione*. Pilgrimage as a form of medieval life. Communications in the Middle Ages. Culinary habits in the Middle Ages.
5. 5. Toma Archdeacon and his Chronicle. The question of literary genres and their nonexistence in the Middle Ages. Analysis of the legal text from the Codex of Korčula with an insight into the relationship of reality and fiction in the literary culture of the time. The Croatian legal writings and statute of the towns.
6. 6. Prezbiter of Duklja and his Chronicle. Genesis of the addition called Croatian chronicle and its narrative about the king Zvonimir. The legend of the origin of Dubrovnik and its resonance in William Shakespeare's *Tempest*. City chronicles and narratives about patron saints of Croatian cities.
7. 7. Analysis of poetry from the Paris collections of Croatian medieval lyrics. Jacopone da Todi writer of lauds and verses against rich and immoral church. Criticism of reality in contemporary poetry. The fragment from Krleža's *Ballads of Petrica Kerempuh* and some medieval texts. The concept of Hell in the Middle Ages.

8. 8. European literature and philosophy of the Middle Ages and its main protagonists. Abelard and Heloisa. Roman de la rose. The concept of love in the European Middle Ages. Bogomilism. Crusades as a literary theme and literary laboratory of troubadours.
9. 9. Places and subjects of the cultural production in the Middle Ages and the instruments of its expansion. Difference between manuscripts and printed books. Umberto Eco's novel The Name of the Rose as a source for the study of medieval spirituality. From Orpheus to the Good Shepherd and to the Christ. The idea of traveling to the world of death and to the Hell.
10. 10. Representation of reality and everyday life in the Middle Ages. The experience of space and time and their real and unreal borders. The concept of India. General view to the medieval literature, its forms and themes and the main spiritual and philosophical influences that shaped it. Allegorizes and its examples in the works of medieval authors.
11. 11. Dramaturgy of medieval theater. The question of "evolution" of the theatrical forms. Zagreb Missale antiquissimum. The critique of evolutionism and ritualist views to medieval theater. From Planctus to the Passion. Alternative theater of medieval. Carnevalisation.
12. 12. The high mediaeval period or the autumn of medieval. Cyclical presentation of Jesus Christ and its Croatian version. The Passion of St. Margaret as the highest level in the development of Croatian medieval drama in the wake of humanism. Question of Marulić's dramatic authorship.
13. 13. Croatian medieval prose and its diachronic overview. The principles of medieval storytelling. The process of canonization as an ideal sample of inventing the narrative literature on saints. Prose from Dubrovnik legends. A novel about Troy. A novel on Alexander the Great.
14. 14. The graveyard medieval lyric, Relationship to death in the Middle Ages. The treatment of children in the Middle Ages. Apocalypse as a literary genre. Death in the fine arts. Confraternity as accompaniment to the graveyard and their poetry.
15. 15. What is of contemporary interest in the book Johan Huizinga's book Autumn of the Middle Ages. The overview at the contribution to medieval culture, spirituality and literature by the group of French analysts. Contribution of Radoslav Katičić to the knowledge of the Croatian medieval literature and education.

Croatian minority communities in Diaspora

194398

Lecturer

Marta Račić,
nasl. doc. dr.
sc.

Course Description

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concepts of migration and identity and compare their essential characteristics.
2. Apply knowledge of historical migration of older Croatian emigrants.
3. Define the consequences of the minority position of Croats in the surrounding countries in the past and present.
4. Recognize the position of older Croatian emigrants in neighboring countries: Austria (Burgenland / Burgenland), Slovakia / Moravia, Hungary (South and West), Serbia / Vojvodina (Backa, Banat, Srijem), Romania (Banat), Kosovo (Janjevo), Montenegro / Boka Kotorska, Italy (Venice / Molise).
5. Identify the consequences of the minority position of Croats in the surrounding countries in the past and present.
6. Recognize historical, sociological and demogeographical theoretical frameworks related to the issue of research on older Croatian emigration

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Propose political and legal solutions based on scientific research of demographic and emigrant content

Conduct relevant research on the Croatian resident and emigrant population

Develop the ability to demonstrate the need of the population

ECTS Credits 3.0

Semester Summer

Week by Week Schedule

1. Basic information about the course, content and method of work in lectures and seminars, fieldwork.
2. Spatial mobility: defining the demographic terms of migration and circulation and their typification as well as a comparison with historical migration and historical maps.
3. Multiplicity and complexity of identity: ethnic identity, national identity, cultural identity, social identity, hybrid identity
4. Terminological breakdown of socio-historical concepts: standardization, transformation, modernization, disintegration, integration, ethnic community, national community and their understanding from the aspect of research into older Croatian emigration
5. When and why did the first migrations of the Croatian population outside the homeland begin in XIII. century.
6. The Ottoman threat in Europe and the great chain migrations of the Croatian population in the 15th century and the 16th century.
7. Spatial distribution of Croatian migrants in the surrounding European countries since the 15th century by the end of 17th century.
8. The Great Vienna War and the liberation of Europe from the Ottoman rule - the role of the Habsburg, Venetian and Ottoman authorities in the second great wave of migration of Croatian populations outside the native Croatian territory since the end of the 17th century and at the beginning of 18th century.
9. The role of the Church in initiating, leading the second migration wave of the Croatian population towards liberated Christian lands from the Ottoman territories from the 16th to the 18th century.
10. The role of the Catholic Church in the preservation of the ethnic and national identity of Croatian emigrant communities from 15th century. to the 20th century.
11. Disintegration processes within Croatian emigrant communities in the 18th century and 19th century.
12. The Croatian National Revival and Croatian indigenous minority communities in surrounding countries-Croats in surrounding countries between accepting modernization processes of assimilation and disintegration of ethnic communities or integrating with the motherland and forming their own Croatian nation and accepting a minority position.

13. Famous Croatian public workers in preserving Croatian communities and Croatian cultural and national identity in European countries
14. The position of indigenous Croatian communities in neighboring European countries today, comparison with integration / disintegration socio-historical processes
15. Institutional activities and present-day social and cultural visibility of indigenous Croatian minority communities in their home countries and their connection with the cultural, social and political institutions of the Republic of Croatia.

15

Grading

The grade will be defined through course work

Course Description

The subject is structured through 15 teaching units that point to some important events and processes of the Croatian Modern Age. By analyzing individual sources, students will become familiar with broader social and political processes, and through independent research on topics from published sources listed in the list of supplementary literature, they will develop research skills and further expand their knowledge of modern Croatian history.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the most important historical events from Croatian modern history,
2. Write an essay on Croatian modern history
3. Recognize important figures from Croatian modern history
4. Define basic terms from Croatian modern history
5. Analyze individual sources from Croatian modern history
6. Conclude which causes and consequences determined Croatian modern history

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Generate and conduct historical and other types of discussions

Identify historical facts and processes from European and national history
 Single out historical processes and explain their topic of interpretation
 List historical sources for the study of national history
 Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science
 Formulate and orally present knowledge about historical processes and data
 Single out important historical figures from different periods of European history
 List the historical sources for studying national history
 Norm and classify historical literature and sources
 Form and write research results on historical processes and data

Screening of student's work

Croatian Morphology

188064

Lecturer

prof. dr. sc.
Mario Grčević

Course Description

Learning basic knowledge about the linguistic morphology of the Croatian language

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)
- » Croatology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and delineate morphological categories in the Croatian language
2. Explain the relation of morphology to other parts of grammar
3. Distinguish and know how to locate verb and noun types
4. Analyze and observe morphological deviations from the norm
5. Demonstrate knowledge of declension and conjugation rules of the Croatian standard language.
6. Apply acquired knowledge by noticing and avoiding errors in written and oral communication.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language

Explain the facts in the field of Croatian phonology, morphology and syntax and apply them in oral and written expression

Croatian Philosophy

227467

Lecturer

prof. dr. sc.
Zvonimir Čuljak

Course Description

1. Present the main elements of early Croatian philosophy (from the 12th to the beginning of the 19th century).
2. Analyze the main theories, concepts, and arguments of early Croatian philosophers,
3. Present the achievements of early Croatian philosophers with respect to their scientific, philosophical, social, and cultural contexts.
4. Enable students to analyze concepts used by early Croatian philosophers.
5. Enable students to analyze and evaluate arguments used by early Croatian philosophers.
6. Enable students to evaluate the achievements of early Croatian philosophers in the context of European philosophy and science.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the main elements of older Croatian philosophy (from the 12th to the beginning of the 19th century)
2. Analyze the main terms used by older Croatian philosophers.
3. Analyze the positions and arguments of older Croatian philosophers.
4. Combine the main elements of older Croatian philosophy with the relevant scientific, philosophical, social and cultural context
5. Distinguish the contents of the main scientific and philosophical terms and terms used by older Croatian philosophers
6. Evaluate the views and arguments of older Croatian philosophers in the context of the history of science and the history of philosophy

Lecturer

doc. dr. sc.
Wolffy Krašić

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	30
	15

Course Description

Course objectives: to introduce students to historical aspects of activities of Croatian political emigration and inclination to facilitate research on history

of Croatian emigration and its integration into understanding Croatian national history; within this, special emphasis will be given to political activities of the Croatian diaspora which were focused on attaining change in Croatia pertaining to individuals who lived in Croatia.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » History (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain fundamental knowledge on the history of Croatian emigration
2. Explain political activities of individuals in Croatian diaspora, such as: Antun Bonifačić, Ante Bruno Bušić, Hakija Hadžić, Stjepan Hefer, Branimir Jelić, Kazimir Katalinić, Ivo Korsky, Juraj Krnjević, Džafer beg Kulenović, Ivan Oršanić, Mile Starčević, and others
3. Demonstrate the ability to scientifically conceptualize the topic and write and present scientific papers.
4. Develop the ability to demonstrate the need to consider the population and emigration in the service of social and political decision-making.
5. Explain the seriousness of the problem of today's level of demographic negativity and emigrants' separation from their home country.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Propose political and legal solutions based on scientific research of demographic and emigrant content

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Grading

Regular attendance in class, completion of preliminary exam, participation in class discussions, submission of independent research paper.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain demogeographic and methodological concept and system
2. Explain logic and functional organisation of population on Earth's surface
3. Explain importance of population as a basis for all planning within geographical space
4. Explain and understand strategic significance of population
5. Explain the correlation between natural basis and social upgrading within geographical space
6. Explain general and regional concepts of organisation of space
7. Explain functional and sustainable organisation of space
8. Explain strategic significance of demogeographic scientific approach

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop a scientifically independent opinion on demographic and emigrant issues

Croatian Ships in the Modern Period

223531

Lecturer

Zrinka
Podhraški
Čizmek,

Course Description

To learn about the daily life of ordinary people in the Croatian territories facing the Adriatic Sea in the 18th century. Since man himself is the culture he creates, even ships and sailors are the expression of the whole coastal world of the time.

An overview of the history of ships from Antiquity to the end of the 18th century will be provided, with particular attention to the types of sailers typical of the Mediterranean and the Adriatic.

The sources from the Italian archives that preserve information on Croatian ships, captains, paroni and sailors, the Croatian Maritime Regesta of the 18th century (RMC) vol. I-III whose 16,000 documents will be available to students for the study and processing of data.

Students will learn more than 70 different names and types of ships characteristic of the Adriatic navigation in the Modern Age.

The goal is to teach students how and where to look for documents from this historical period and at the same time introduce them to the latest digital technologies of analysis and categorization of such a large amount of sources.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the history of maritime navigation: from Prehistory to the 18th century.
2. Explain the geopolitical peculiarities of the Croatian territories between the Republic of Venice, the Habsburg Monarchy, the Ottoman Empire and the Republic of Dubrovnik.
3. Recognize and discern the types of the ships in the 18th century Adriatic.
4. Identify the types of ships among 16,000 published maritime sources: the contemporary digital research systems.
5. Apply specific methodologies for the subject: research of the documents, their systematization (transcription - optional) and summary of the topics in an autonomous way, both written and oral.
6. Identify the value of historical facts and developments of the National, European and World history together with their interpretative issues. Being able to interpret and evaluate a historiographical text. Being capable to conduct independently scientific research in the field of historical sciences and write historical essays in clear and structured manner.
7. Analyze and evaluate a historiographical text.
8. Apply scientific research in the field of historical sciences and write historical papers in a clear and organized manner. After passing the exam, the student will be able: - to describe development of the ships from Antiquity to the 18th century. - to define the main types of Adriatic and Mediterranean sailers. - to identify and analyse the sources through rapid digital searches and link them with the reference bibliography. - to independently find, use, analyse and evaluate the correlated bibliography on Croatian ships and sailers.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

Analyze and evaluate scientific and professional papers from different complementary scientific fields and disciplines

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Communication Studies

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Identify historical facts and processes from European and national history

Name and describe individual historical periods

Single out historical processes and explain their topic of interpretation

Use the computer, the Internet and other technical and digital aids to process historical data

Critically judge one's own work and defend one's position in team work with arguments

List historical sources for the study of national history

Norm and classify historical literature and sources

Design and write research results about historical processes and data

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

History

Name and describe certain historical periods

Single out important historical figures from different periods of European history

Use a computer, the Internet and other technical and digital aids for processing historical data

Critically judge one's own work and defend one's position with arguments in team work

List the historical sources for studying national history

Norm and classify historical literature and sources

Form and write research results on historical processes and data

Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them with arguments

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Plan the search of literature, databases and other sources of information

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Sociology

Identify the main actors of certain social processes

Create an effective research plan

Use sources of scientific information

3
ECTS

Week by Week Schedule

1. Introductory lesson: presentation of the course, timing and responsibilities. Sources and bibliography.

Seminar:

1. Introduction to the sources: the Croatian Maritime Regesta of the 18th century (RMC) I-III vol.

2. History of the Adriatic: the links between the coasts.

Seminar:

Distribution of seminars (examples for transcription exercises - optional); analysis and synthesis; how to set up tables for analysis.

3. Habsburg Monarchy, Croatian territories and Adriatic: who were the "sudditi imperiali"?

Seminar:

Ships of the Habsburg Monarchy.

4. Serenissima, Gulf of Venice, Mare Nostrum and "sudditi veneti".

Seminar:

Ships of the Republic of Venice: who were the builders?

5. Republic of Dubrovnik between the hinterland and the sea: Libertas et consules.

Seminar:

Ships of the Dubrovnik Republic: the secrets of success.

6. Ottoman Empire, Croatian territories and the importance of the Levant; Dulcignotti et altera.

Seminar:

Ships of the Ottoman Empire.

7. The history of ships from Antiquity to the end of the 18th century - I.

Seminar:
The images of ships: from stone to paper.

8. The history of ships from Antiquity to the end of the 18th century - II.

Seminar:
Ex voto: the era of Christianity.

9. Characteristics of the inter-Adriatic navigation.

Seminar:
Ship types in RMC I-III: how to recognize and map them.

10. Trabaccolo, pielego, tartane.

Seminar:
Trabaccolo, pielego, tartane in the RMC I-III: research and categorization.

11. Frigatoon, nava, vessel.

Seminar:
Frigatoon, nava, vessel in the RMC I-III: research and categorization.

12. Brazzera, marciliana, polacre.

Seminar:
Brazzera, marciliana, polacre in RMC I-III: research and categorization.

13. Barca, felucca, ketch, grippo.

Seminar:
Barca, felucca, ketch, grippo in the RMC I-III: research and categorization.

14. Less known and unknown types of ships: the story of dynamism and inventiveness of small people.

Seminar:
Unknown types of ships: how to find and map them.

15. Concluding remarks.

Seminar:
Concluding remarks.

Croatian Social and Cultural History from the 19th Century to the present day 188007

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

Acquisition of basic cultural-historical insights into the structure, dynamics and changes of Croatian society during the 19th and 20th centuries in the context of European history. In the narrower sense, students will gain knowledge of the specificities in the development of civil society and culture during the 19th century, regional peculiarities and traditions, and the social breakdowns and phenomenon of cultural discontinuity as the main features of the 20th century.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and interpret major events and processes within 19th and 20th century Croatian cultural and social history.
2. Describe and explain cultural and social peculiarities in Croatian regions during the 19th and 20th centuries.
3. Explain the cultural-historical paradigm in the analysis of this and earlier periods of Croatian history
4. Explain and summarize the fundamental differences in cultural and historical paradigms of this and previous periods
5. Explain the differences in cultural specificities between different Croatian regions during the 19th and 20th centuries.
6. Analyze major social and political events in Croatia during the 19th and 20th centuries and compare them with neighboring countries

Study Programme Learning Outcomes

Croatian Traditional Culture and Globalization

226945

Lecturer

Marta Račić,
nasl. doc. dr.
sc.

Course Description

To acquaint students with Croatian traditional culture (material and immaterial) and to make them aware of its importance in the processes of identification and globalization. Through lectures and seminars, students will be introduced to all forms of traditional culture, from construction, home decoration, textile handicrafts to folk customs and folklore musical expressions.

To consider Croatian traditional culture in its interconnection with individualization, urbanization, (post)industrialization, atomization of society and postmodernity, as well as the adaptation and way of preserving Croatian traditional culture to the contemporary social context.

To train students to observe cause-and-effect relationships between geographically, climatically and historically conditioned determinants of traditional culture.

To make students aware that traditional culture conveys the wealth of local practices and thus participates in shaping national identity in a global context.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses 1., 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and distinguish between material and non-material forms of traditional culture.
2. List Croatia's intangible cultural heritage on UNESCO's lists.
3. Explain the relevance of Croatian traditional culture in the realization of certain types of social solidarity in the Croatian social context.
4. Explain tradition as a dynamic property
5. Differentiate elements of traditional culture according to four ethnographic areas.

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Regular attendance and active monitoring of classes (attendance at at least 12 teaching units). Regular performance of assigned duties (seminar work and independent assignments). Final exam consisting of a written and an oral part.

6. Discuss the role of traditional culture in national and global discourse.
7. Analyze the possibilities of applying elements of traditional culture for the purposes of tourism.
8. Assess the position of individual components of Croatian traditional culture within the framework of the contemporary social context.

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Discuss social issues in Croatian society
- Recognize the social specificities of Croatian society

Croatian Traditional Music

270286

Lecturer

Lidija Bajuk,
nasl. doc. dr.
sc.

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

Acquiring fundamental knowledge about defining the concept of Croatian traditional music and the development of that concept, the first recordings, and important publications, characteristics, performances, performing genres, and the most significant representatives of Croatian traditional music. Gaining knowledge and skills to recognize songs and characteristic interpretations from specific Croatian areas.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 1st semester, 1st year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 3rd semester, 2nd year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define briefly the terminology related with Croatian traditional music
2. Explain in basic terms the historical framework of Croatian traditional music
3. Name the most outstanding researchers of Croatian traditional music
4. Explain the customary-ritual context of selected examples of Croatian traditional music
5. Recognize the main features of Croatian traditional music by Croatian zones and areas
6. Analyze the interpretive genres of Croatian traditional music and identify their prominent representatives
7. Recognize Croatian traditional music as an intangible cultural asset under national and world protection
8. Apply the legal framework of intellectual property in the context of processing and (re)interpretation of Croatian traditional music

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of

the Croatian language in academic and non-academic discourse
 adherence to the principles of academic integrity and ethical norms of research and publishing

Croatology

Identify different theoretical approaches to the study of Croatian culture

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Constructively participate in discussions on croatological topics

Explain and analyze the components of Croatian culture and their connection

Describe, classify and explore Croatian art, music, theater and film arts

Justify and support the need and willingness for lifelong education

Mark, explain and interpret the role of exact sciences in the history of Croatian culture

Identify, connect, single out and argue the fundamental components of Croatian geography, enology, ethnology, gastronomy

Adhere to linguistic, spelling and stylish norms of the Croatian language in the academic and non-academic discourse

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Apply basic computer skills

Croats and Carolingians

153265

Lecturer

doc. dr. sc.
Tomislav Popić

Course Description

The aim of the course is to show the importance of the Carolingian influence in shaping the 9th century Croatian principality and early medieval Croatian society. The ninth century in Croatian history is mainly related to Carolingians who left an indelible mark in areas such as organization of rule, society and Church affairs, but also in architecture and art. Students will get to the know and use different sources for 9th century Croatian history and learn ways of their interpretation.

- » History (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define key problems of 9th century Croatian history
2. Match events in Croatia with general political and social relations
3. List main written and archaeological sources for 9th century Croatian history
4. Analyze critically relevant literature
5. Evaluate the importance of Carolingian inheritance in Croatian medieval history
6. Reproduce different opinions on interpreting sources

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

ECTS Credits 3.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

Student responsibilities: class attendance, active engagement in discussions, completion of weekly assignments. Absence: three times in semester.

Identify historical facts and processes from European and national history

Critically judge one's own work and defend one's position in team work with arguments

List historical sources for the study of national history

Week by Week Schedule

1. Introductory lecture, presentation of subjects, student obligations, bibliography, etc.
2. Historical, economic, social, cultural and political aspects of South America. Immigration policy and the importance of migration in South America. Contribution of Croatian emigrants to the modernization of the countries of South America.
3. The first emigration of Croats to South America - general characteristics, number, areas and manner of travel of emigrants, causes of emigration.
4. Mass emigration of Croats to South America - general characteristics, age, sexual marital, social structure.
5. Croats in Argentina - economic and political migration; peculiarities of Croats in Buenos Aires, Córdoba, Santa Fe, Bahía Blanca and on the "pampas", in the north (Chaco, Formosa, Misiones, Entre Ríos, Tucumán) and in Patagonia (Río Negro, Chubut, Santa Cruz, Tierra del Fuego).
6. Croats in Chile - Emigration from the Dalmatian islands. Croatian colonies in the north, center and south of Chile (Iquique, Tacna, Arica, Tarapacá, Calama, Tocopilla, Pisagua, Antofagasta, Valparaíso Santiago, Punta Arenas, Porvenir).
7. Croats in Peru (Callao, Lima, Cerro de Pasco, Arequipa) and Bolivia (La Paz, Oruro, Potosí, Uyuni, Cochabamba).
8. Croats in Venezuela (Caracas, Zulia, Mérida, Carabobo) and Ecuador (Quito, Manabí, Bahía de Caráquez, Manta y Guayaquil).
9. Croats in Brazil (Sao Paulo, Rio de Janeiro), Paraguay (Asunción, Departamento Central) and Uruguay (Montevideo, Maldonado)
10. Public opinion, organization and public action, social, cultural, political, sports and economic associations, journalism.
11. Croatian Communities in South America: Past, Present and Future Perspective. Homeland policies towards emigrants.
12. The role of Croatian emigrants in South America in the creation of the Yugoslav state.
13. The role of Croatian emigrants in South America in the Homeland War and the recognition of the Croatian state.
14. Integration of Croatian emigrants and their descendants in South America and preservation of Croatian identity.
15. Course evaluation

Cultural Anthropology

37768

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

The students will: master the basic concepts of theoretical and analytical approaches to cultural anthropology,

independently critically reflect on and demonstrate an understanding of culture and society

develop an understanding of Croatian culture and society

Understanding the basic ideas and concepts of cultural and social anthropology

Through research, understand the complexity of social processes: cultural diversity and social change

Apply acquired knowledge in research work

Demonstrate an understanding of conceptual definitions in the field of cultural and social anthropology Identify basic processes and apply specified theoretical approaches

Demonstrate critical thinking and implementation of the acquired knowledge with a special emphasis on Croatian society

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses(3rd year), 5th semester, 3rd year*)
- » Sociology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic theoretical terms in cultural anthropology
2. Criticize dimensions of the culture and society
3. Compare the different theoretical approaches
4. Describe the complexity of social processes: cultural differences and social changes

ECTS Credits 5.0

Semester Winter/Summer

English Level L1

E-learning Level L1 (10%)

Study Hours
30
30

Teaching Assistant
Marija Zelić, mag. soc.

5. Explain the importance of the theories in the conceptualization of the anthropological research

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Define sociology as a science
- Discuss social issues in Croatian society
- Use sources of scientific information
- Explain the elements of social inequality
- Recognize the social specificities of Croatian society
- Compare different social phenomena in different cultures

Sociology

- Define sociology as a science
- Discuss social issues in Croatian society
- Recognize the social specificities of Croatian society
- Compare different social phenomena in different cultures

General Competencies

Use the general knowledge of society and of social processes
 Explain the initial assumptions of the different political, religious and cultural orientations.
 Explain causal relationships between the various social phenomena.
 Explain the social change using classical and contemporary sociological approaches.
 Explain the difference between micro and macro level of the sociological analysis.
 Illustrate the relevance of the concepts of culture, socialization, stratification, social structure and social institutions in interpreting of the social phenomena.

Cultural Identity of Croatian Diaspora

214011

Lecturer

Marta Račić,
nasl. doc. dr.
sc.

ECTS Credits	2.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Course Description

The aim of the course is to acquaint students with the common features of the identity of Croatian communities in the world. Present the role and importance of language, culture, religion, customs and community in order to preserve the identity of the community. To make students aware that identity is a lasting process of transformation.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concept of identity and explain its essential features.
2. Identify Croatian emigrant communities in the world and list their cultural characteristics.
3. Distinguish and analyze the terms: diaspora, emigration, transcontinental emigration, minority community, migration.
4. Recognize and interpret the causes of the emigration of Croats throughout history.
5. Explain the causes of the emigration of Croats with economic, historical and social events.
6. Define the culture of Croatian emigrant communities and understand their significance and role in shaping national identity.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Interpret data on Croatian and global population and emigration

Screening of student's work

Culture of Memory and Places of Remembrance

227641

Lecturer

izv. prof. dr. sc.
Vlatka Vukelić

Course Description

Memory Culture and Memory Sites is a methodological-theoretical subject in which students:

- learn about the phenomena of memory, remembrance and remembering; prohibitions of commemoration and social forgetting in shaping historical consciousness, tradition, identity, in the politics of history and its influence on the writing of history;
- to learn what constitutes places of memory and how they are created,
- to understand why *historia - memoria is futuri*;
- to connect the theory and practice of historians on the above topics using examples from Croatian, European and world history. In this way, the construction of Croatian national, social and cultural identity is analyzed and a connection is made between imagined representations and real historical circumstances. The acquired conceptual value is encoded in a general system that applies the comparative method.

Study Programmes

- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)

Cyborg Ethics and Robot Ethics

227470

Lecturer

izv. prof. dr. sc.
Ivana Greguric

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

Systematically rethinking the impact of modern techniques on man and society, creating a new cybernetic, scientific-technical paradigm that lays a radically new foundation for the production of all kinds of life and the relationship between man and science and technology.

By presenting the achievements of convergent technologies and artificial intelligence (AI), the students want to be introduced to the most important aspects of human cyborgization, the application of artificial intelligence and the ways in which they lead to the creation of a new type of "man" and cause changes in the human natural structure and society. There arise fundamental questions such as: what is man today (descriptive aspect) and what should a human being be (normative aspect)?

Introduce students to discussions about important philosophical-anthropological and ontological definitions of man and society. A special emphasis will be placed on future visions of the creation of the posthuman and the reflection of the creation of a new scientific-technical reality of artificial intelligence, where the questions of the ethical position of these intelligences in their relationship to man, or man's relationship to them, are raised.

To open the basic dilemmas of technological progress through a philosophical and bioethical critical evaluation aimed at creating new post-human ethics: cyborgethics as an important philosophical and bioethical-medical-technical consideration of the essence of human improvement, and robot ethics as an essential consideration of the creation of man's new mechanical doubles - robots as a replacement for the natural man. In this way, the students want to be encouraged to apply ethical principles in order to fight for the personal and social determination of the limits of technological achievements and their application in modern society.

- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the origin, meaning and application of certain theories
2. Define the basic concepts of cyborg ethics and robot ethics
3. Apply ethical understanding and implementation of professional ethics
4. Compare certain aspects of cyborgization, the application of artificial intelligence
5. Explain the basic dilemmas of technological progress
6. Analyze the phenomena of cyborgization, robotization, transhumanism and artificial intelligence

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Psychology

Sociology

Identify the main actors of certain social processes

Use theoretical concepts in the analysis of society

Compare different social phenomena in different cultures

Screening of student's work

1
ECTS Pohađanje nastave [EN]

1
ECTS Kolokviji [EN]

1
ECTS Seminarski rad [EN]

3
ECTS

Week by Week Schedule

1. Introduction to paradigmatic changes in technology - a synthesis view of the connection between philosophy, technology and medicine and the definition of basic terms from technology for understanding the digital-robotic age.
2. Evaluation of convergent technologies in the creation of new characteristics of man in the modern age - the term NBIC, cyborg (Kline & Clynes, Haraway), the term cybernetics (Wiener), the development of cyborgization, artificial intelligence, etc.
3. Settings of transhumanist anthropology - theoretical framework and techniques for improving human beings, nanotechnology, cognitive science, genetics (Harris, Savulescu, Moravec, Kurzweil, Fukuyama)
4. Cyborgization and the post-human state - procedures and goals of cyborgization, evolutionist-eugenic aspiration to improve man

5. The body as a cybernetic system – Platonic-Cartesian dualism, the soul in the era of convergent technologies, possibilities and dilemmas (organs for exchanging information, organs for exchanging matter and energy, etc.)
6. Cyborgization of real social relations in the era of scientific humanism - society as a cybernetic organism
7. Ethical issues of body enhancement in sports and art - prostheses as aids in sports - morally not/justified (Pistorius case); the body with embedded technical accessories - the body as software and interface, computer interactive performances, post-human and (re)production of man in the computer; cyborgization in music - the time of technoculture and simulated reality
8. Ethical controversy of transhumanists and bioconservatives - representation and opposition to the use of biotechniques for human improvement
9. Cyborgoetic dilemmas and principles of improvement of human beings (Habermas, Kant, Plessner)
10. Resolution on the limits of the improvement of human beings and historical reality - setting the ethical and legal responsibility of cyborgizing the overall reality
11. Robots in the historical reality of scientific humanism - towards the mechanical immortality of conscious human copies, a kind of friendly robots
12. Ethical dilemmas of applying artificial intelligence and the possibility of developing superintelligence - the potential and dangers of artificial intelligence in research and the real environment
13. Robot ethics - creation of a robot ethics framework, i.e. regulation of the application of artificial intelligence in modern society, laws of robotics (I. Asimov)
14. Facing the challenges posed by AI in modern society. AI autonomy issues - defining issues of autonomy, privacy, trust and accountability (e.g. who or what will be held responsible when and if an autonomous system malfunctions or harms humans?)
15. General principles for ethical and value formation, development and implementation of autonomous and intelligent systems

Demographic Aspects of the Greater Serbian aggression in Croatia 1990-1998

239760

Lecturer

Zdravko Matić,
nasl. prof. dr.
sc.

Course Description

The aim of the course is to present the theoretical and methodological concept of considering the demographic causes and consequences of the Serbian aggression on the Republic of Croatia, as well as the historical laws that conditioned that aggression.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop knowledge about events in the period 1990-1998. from the demographic aspect within the theoretical understanding of the population
2. Explain the difference between aggression, civil war, occupation, military coup and the like, and especially the demographic consequences of aggression in the Republic of Croatia
3. Define the meaning of wartime demographic destruction in spatial processes, relations and security issues
4. Develop the ability of independent scientific research related to learning the truth about the aggression against the Republic of Croatia
5. Explain the specificity of branch methodologies for considering aggression against the Republic of Croatia
6. Develop the application of demographic projection methods related to direct and indirect war losses
7. Explain the war conditioning on later demographic processes and trends

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Conduct relevant research on the Croatian resident and emigrant population

Develop cognitive and operational skills for conducting research

ECTS Credits	2.0

Demography of the Croatian Island area 239761

Lecturer

doc. dr. sc.
Monika
Komušanac

Course Description

The objectives of the course are:

- acquaint students with the basic demographic indicators and processes of population development in the Croatian archipelago
- explain to students the contemporary demographic picture of the Croatian island area
- to develop the student's knowledge about the peculiarities of the development of the island population
- introduce students to the causes and consequences of depopulation processes on the Croatian islands
- explain the components and peculiarities of the identity of the Croatian island area
- explain to students the development approaches to the management of the insular Croatian space

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 4th semester, 2nd year*)
- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the term "island" and explain the basic demographic processes on the Croatian islands
2. Explain the basic social, geographical and demographic conditions of the contemporary demographic picture of the Croatian island area
3. Define and explain the fundamental development problems of the Croatian island area
4. Explain different approaches to the management of the Croatian island space using the example of selected Croatian island groups
5. Explain the significance and management of protected parts of the Croatian island area

Descriptive Statistics

186022

Lecturer

Toni Babarović,
nasl. prof. dr.
sc.

Course Description

Introducing students to different kinds of data, gathered in professional and scientific examination/measurement, and enabling students for their recognition. Presenting different kinds of empirical data description via tables, graphs, measures of central tendency and variability, and preparing the students for successful selection of the appropriate descriptors for specific kind of data. Systematic informing of students on procedures for determination the position of individuals result in a group, and procedures for evaluating the relations between two or more sets of data, but also to train the skills of appropriate application of these procedures. Training students in critically choosing proper descriptive statistics procedures based on their advantages and limitations, as well as in independently conducting of the procedures and proper interpreting of the results attained. Demonstrating crucial concepts of probability theory for statistical procedures in social disciplines (especially random variables) and integrating them into students understanding of social processes, as a basis for explaining test statistics and related theoretical distributions in inferential statistics.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Choose the most appropriate procedures for description and presentation of some data set, related to one or more variables
2. Illustrate examination results via the most appropriate graphs and tables
3. Calculate all measures of central tendency, variability and position of an individual result in a group
4. Apply basic concepts of probability calculus in social processes comprehension
5. Explain characteristics of discrete and continuous random variables and related theoretical distributions
6. Evaluate the importance of normal distribution and apply their characteristics in solving problems/exercises in psychological phenomena that assume normal distribution of related variable
7. Demonstrate and describe interrelation two and more observed variables by calculating appropriate correlation indicators

ECTS Credits 5.0

Semester Summer

English Level L1

E-learning Level L1 (5%)

Study Hours
30
30

Teaching Assistant
Klara Saganić, mag.
psych.

Grading

Class attendance - up to 12% of the course grade;
Quiz tests three times per semester - up to 12% of the course grade;
Two mid-term written tests up to 48% of the course grade;
Oral exam - up to 28% of the course grade;
Additional points- up to 5 % of the course grade.

Prerequisites for
Inferential Statistics

8. Indicate values of one variable on the bases of its relation with another variables (one or more)
9. Indicate values of one variable on the bases of its relation with another variables (one or more)
10. Categorize various scale measures, variables, measures of central tendency, variability and position of an result in a group, theoretical distributions, and correlation indicators according to relevant criteria.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

General Competencies

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Screening of student's work

0.8
ECTS Pohađanje nastave [EN]

2 ECTS Kolokviji [EN]

5 ECTS

Forms of Teaching

- » Predavanja
 - » Two hours per week
- » Auditorne vježbe
 - » Two hours per week

Week by Week Schedule

1. Introduction to Descriptive statistics course silabus; Definition, importance and division of statistics; Basic concepts of statistics: entity, sample, population and attribute/variable
2. Definitions and examples of measurement in psychology; Measurement scales: definitions, examples, characteristics and appropriate statistical procedures; Variables: definitions, divisions and examples

3. Data distributions: definition and reasons of application. Tabular data description: basic features, sorts, and grouping of results. Graphical data description: definition, purpose, sorts of, elements and rules of construction
4. Measures of central tendency (Mean, Median, Mod, Geometric and Harmonic mean): definition, purpose, assumptions, typical situations, modes of calculation. Basic distribution forms determinant of central tendency measure
5. Measures of variability (Range, inter-quartile range, M.A.D., variance, standard deviation, Coefficient of variability): definition, assumptions, typical situations, modes of calculation, advantages and limitations
6. Basic concepts of probability (probability experiment, elementary event, event); Definition of probability and relation psychological variable and statistics; Properties and basic laws of probability; Basic concepts of combinatorics: basic lemma of combinatorics, combinations and permutations without replication
7. Discrete random variable: definition, distribution, probability function, distribution function, expectation and variance; Important discrete distributions: Binom, Multinom, and Hypergeometric
8. Continuous random variable: definition, distribution, probability function, distribution function, expectation and variance; Normal distribution the most theoretical distribution in psychology: generic presumptions, probability function, distribution function and important features; Zdistribution: genesis, purpose and properties
9. General linear transformations of data in relation to standardizing; Percentiles and deciles: definitions, specific situations, modes of calculation, advantages and limitations; Other important theoretical distributions of continuous variable: uniform, t-, χ^2 -, F-distribution)
10. Statistical relations between two variables: purpose, basic logic and graphical presentation (scatter diagram); Pearson correlation: assumptions, derivation, modes of calculation, basic features, and interpretation determinants; Coefficient of determination and alienation
11. Correlation and causal relations; Correlation and linear regression; Regression line and prognosis: definition, derivation and interpretation; Prognosis error (definition and operative calculation) and adjacent concepts (homoscedascity and normality of conditional distributions, confidence interval).
12. Multiple regression: definition, basic logic, purpose and limitations; Two forms of multiple regression equation: layout, coefficient interpretation, two predictor case; Multiple correlation coefficient and prognosis error; Partial correlation: definition, purpose, coefficient derivation
13. Pointbiserial and biserial coefficient: definitions, specific situations, modes of calculation and specific problems; Spearman (r_s) and Kendall (τ) rank correlations: definition, specific situations, modes of calculation, advantages and limitations.
14. Freeman Theta and Kendal W : definition, specific situations, modes of calculation, advantages and limitations, interpretation
15. Test

Developmental neurobiology

144873

Course Description

The general aim of this course is to familiarize students with basic histogenetic and morphogenetic concepts in human brain development as well as the development of other species, from insects to primates, in order to gain a deeper and broader understanding of biological foundations of higher cognitive functions and other human-specific processes. Specific aims are elaborated according to teaching units.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic morphological and histological characteristics of different developmental stages;
2. Explain the role and the relationship between biological predisposition and external factors in neural network development;
3. Apply acquired theoretical and practical knowledge in working with children with developmental disorders;
4. Apply acquired knowledge in practical use of neuroimaging techniques (fMRI, PET, EEG, MEG) when analysing developmental disorders in children and adolescents;
5. Use educational multimedia online neuroscience resources in written reports and oral presentations;
6. Create multimedia presentations using examples that show correlation between the development of certain brain areas and the changes in the psychological status of the condition;
7. Analyze scientific review papers from developmental neurobiology;
8. Explain and present the role of biological factors in the determination of neural network development of the human cerebral cortex.

Study Programme Learning Outcomes

Psychology

General Competencies

3. Explain the biological and neurobiological foundations of psychological processes and behaviour.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
13. Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Week by Week Schedule

1. Brain morphogenesis during the embryonic and fetal period; brain morphogenesis during the perinatal and postnatal development.

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours 30

Grading

Class effort 20%, Seminar paper 20%, 2 preliminary exams 20%, Essay - 20%, Practical work - 20%, Oral knowledge assessment 20%.

Prerequisites

Fundamentals of Cellular Biology and Genetics

2. Histogenetic processes during the embryonic and early fetal period; histogenetic processes during the fetal and perinatal period.
3. Imaging of the fetal brain; structural-chemical characteristics of the fetal brain organisation.
4. Prenatal and perinatal brain damage; transient fetal behaviour - comparison of the development of a child with and without perinatal brain damage.
5. Ingrowth of axons, neuronal differentiation and the establishment of cortical connections; synaptogenesis - the role of activity and interaction with the environment.
6. Excessive production of synapses as a developmental event - phylogenetic comparison; selective stabilization of synapses as a mechanism of environmental shaping of brain structure.
7. Functional changes in brain activity during childhood and adolescence; the importance of recording functional brain activity in development disorders.
8. Changes in brain neural circuits during adolescence; risky behaviour during adolescence - biological correlates of functional brain activity changes during adolescence.
9. Neurobiology of critical periods during human development; determination of periods of critical developmental on the basis structural-functional correlation.
10. Neurobiology of autism and Asperger's syndrome; neurobiology of other developmental disorders: Down syndrome, Williams syndrome, attention disorders.
11. The role of early diagnosis in developmental disorders; brain imaging and early diagnostics for developmental disorders.
12. Time pattern of brain plasticity during development; imaging of brain plasticity during development.
13. Protracted period of human brain maturation; evolutionary characteristics of the development of human brain ("life history theory").
14. Macroscopic features of brain evolution; histological features of brain evolution; evolutionary aspect and biological basis for the emergence of higher cognitive functions in humans.
15. Comparative anatomy and histology of the cerebral cortex in primates; evolutionary aspects of neurobiology of the development of higher cognitive functions in primates; comparative anatomy of primate brain using imaging methods.

Differential Psychology

28722

Lecturer

Boris Mlačić,
nasl. prof. dr.
sc.

Course Description

Explain individual differences to students as well as meaning of those differences to society in general and psychology in particular. Explain measurement of individual differences. Look at individual differences in abilities, personality and creativity. Analyze genetic and environmental contributions to those differences. Describe development of theories and models of intelligence. Describe development of theories and models of personality. Argue for importance of intelligence and personality in everyday life.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and distinguish between different theoretical approaches in personality;
2. Explain and distinguish between different theoretical approaches in intelligence;
4. Interpret results of research in differential psychology;
5. Analyze scientific studies of individual differences.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge theoretical approaches to the study of individual differences

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Review the historical development and theoretical approaches in

Prerequisites

Inferential Statistics
Psychological
Measurement

various branches of theoretical and applied psychology

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
5. Compare theoretical approaches to the study of individual differences.
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.
10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

1.5
ECTS Kolokviji [EN]

1 ECTS Seminarski rad [EN]

5 ECTS

Forms of Teaching

- » Predavanja
 - » Lectures are held every week.
- » Seminar
 - » Seminars are held in cycles after a few lectures.

Week by Week Schedule

1. Introductory lecture.
2. History of differential psychology, dimensions and measurement of individual differences.
3. Intelligence: definitions, testing history and models of intelligence.
4. Intelligence: models of intelligence and measurement.
5. Intelligence and life outcomes (schooling and work).
6. Special and exceptional intellectual abilities.
7. Evaluation of psychology of intelligence.
8. Personality - concept and measurement of personality traits, dimensional models of personality (Eysenck's model).
9. Personality - dimensional models of personality (Big-Five and Five-factor model of personality).
10. Biological basis of personality, personality neuroscience.
11. Personality and life outcomes (schooling, work, romantic relationships, health).
12. Theories of "hot" intelligence (social, practical and emotional intelligence).
13. Creativity - intelligence, other ability or personality trait, creativity and arts and science.

14. Individual differences in motivation and emotions.
15. Evaluation of personality psychology, theories of hot intelligence and creativity.

Digital Journalism

214023

Lecturer

doc. dr. sc.
Tamara Kunić

Course Description

The increasing presence and popularity of technologies such as broadband, mobile internet, social networks and IPTV fundamentally change the way we work, that we have fun and the way we consume media. The convergence of media is no longer future, but rather a framework in which modern media and mass communication operate. What occurs is intertwining, merging and combining of various media with the help of telecommunications functionally into one. Ultimately, the convergence of media results in a change of the organization of media, content and manner of its distribution, habits and the role of consumers, who from consumers of media content become "prosumers" and, also, in new approaches to media management, advertising, marketing and public relations. The main objective of this course is to familiarize the students with this new framework, which has changed the mass media and journalism in general, but also communicology, which previously studied media as separate media platforms, and now must study them as a combination of multiple platforms and accordingly adjust research methodology. The students will also be introduced to the rules and regulations imposed by the new media and consumers themselves, and the knowledge of how to create a rounded digital identity in the 21st century (of a journalist, as well as of a media product). Accordingly, the students will during the course acquire knowledge and skills that are necessary for their work in a converged media environment and so they could exploit the opportunities offered to them on individual platforms, and ultimately allow them to create their own media product during the course, adapt it to various technological devices and place it on the market.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts of media convergence and converged journalism;
2. Identify, understand and describe the place and role of media convergence in the contemporary journalism and society;
3. List, explain, recount and apply the basic theory of the convergence of media and of journalism which arose from it;

Grading
50% fulfilling seminar assignments; 50% exam.

Prerequisites
Academic Literacy
Introduction to Journalism
Originators of
Communication Sciences
and Their Works

4. Identify, explain and critically analyze the contemporary situation, development and challenges, positive and negative, in this area;
5. Use converged media;
6. Produce announcements for converged media applying the acquired journalistic skills necessary to work in a converged media environment;
7. Distinguish, define and explain the specific characteristics of converged media, recognize the specificities of their operation;
8. Demonstrate effective completion of tasks independently and in a team;

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Prepare materials for media and public relations in Croatian and English

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Identify and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

General Competencies

Apply the knowledge about the basic concepts from communicology and journalism which are related to media convergence; Identify and describe the role and place of the convergence of media and journalism in the contemporary society; Reproduce, apply and explain the basic theories of media convergence and converged journalism; Explain and critically analyze the acquired theoretical and practical knowledge; Identify, explain and analyze the situation, innovations, challenges and problems of media convergence and converged journalism; Define, explain, distinguish and critically analyze the specific characteristics of converged media and their operation; Apply the acquired journalistic skills of converged journalism in reporting for the media.

Diplomatics with Egdotics and Chronology

270364

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

Students will get insight into the use of diplomatic documents as relevant historical sources. In addition, they will be introduced to the most important literature and methodology of scientific and professional interpretation derived from an integral and interdisciplinary approach. The course provides practical work on selected material in seminars as well as work in archives, libraries and similar.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)
- » History (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize historiographic text and its evaluation
2. Identify and use scientific sources (bibliography of documents, web pages) in different humanities related areas
3. Identify the scientific principles of historical science
4. Analyze Historical Literature
5. Apply connections in cultural and historical trends, or interactively master the knowledge and interpretation of the documents in reciprocity.
6. Produce critical awareness in scientific discourse.

Study Programme Learning Outcomes

Dynamics and determinants of emigration

194389

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

Introduce students to qualitative and quantitative research methods (used in research of Croatia diaspora). Ability to apply and use specific research procedures / methods through specific research work.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use knowledge of the methodology of research on Croatian emigration
2. Use different approaches of qualitative and quantitative methodology
3. Apply research techniques: research design, data processing and analysis, and production of a research report
4. Use specific research procedures / methods through specific research work
5. Use the basics of scientific research in the social sciences

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability to terminologically understand demographic and immigrant terms

Conduct relevant research on the Croatian resident and emigrant population

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Interpret data on Croatian and global population and emigration

Early-Modern Croatian Literature

37436

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

Subject of instruction is divided into fifteen sections. They are formed on the basis of chronology but at the same time they include the thematic and genre systems. Subject covers the following canonical authors of the Croatian Renaissance: Benedikt Kotruljević, Ivan Česmički, Marko Marulić, poets of Ranjina Collection, Mavro Vetranović, Nikola Nalješković, Hanibal Lucić, Vinko Pribojević, Petar Hektorović, Peter Zoranić, Marin Držić, Mikša Pelegrinović, Sabo Bobaljević, Antun Sasin, Brne Krnarutić, Dominko Zlatarić, Matija Vlačić, Faust Vrančić. Their texts as well as texts less typical but not less important written by literary personalities of the second grade are going to help students in building diachronic view of dominant genres in literature of early modern time. In doing so, we stress the genre of Renaissance drama in comparison with medieval poetics of the space, then also we are going to study profoundly the occurrence of tragedies in the second half of the sixteenth century, than the development of poetry of early renaissance in relation to tendencies of mannerism in early modern poetry. Also will be studied poetic and non poetic nonfiction and fiction texts from that era, as well as didactic questions. Students will acquire the knowledge of ideological concepts and ideologies as well as the changes in style and stylistic formation especially with regard to the relationship between the Renaissance and Medieval and then with the crisis of Renaissance known in stylistic terms as mannerism. In this part of subject with special attention will be studied the books of Burckhardt, Huizinga and Hocke. In details will be described literature in Latin that was established in renaissance Dubrovnik and Dalmatia and also at the Korvin court in Buda With students will be discussed the issues of Protestants within the Croatian literature and its relations with humanistic tradition. With special attention students will be familiarized with the phenomenon of women in the Renaissance, especially with the texts of Marija Gundulić Gozze and Nada Vittoria Speranza Bona. For students will be prepared material on the comparative aspects of Croatian Renaissance literature, especially the relationships with Italian literature of that time, but also the Croatian texts from renaissance will be compared with similar examples in other European literature. During the work we are going to study the numerous texts from the edge of literary space, especially scientific, history writing and philosophical works, as well as those who, though not written with the literary intention show the spiritual level and preoccupations of that time. During work with students will be discussed work of the leading writers who wrote not only in the Croatian language but in other languages such as Italian and Latin.

ECTS Credits	5.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30
	15

Grading

From the students it is required to participate actively in all forms of teaching. Monitoring and evaluative activities will be applied during the teaching process. Each program assignment (including the written seminar papers) will be included in the formation of the final grade. Students will be tested for their commitment by passing all requirements and at the end during regular examination time they will undergo the written and oral exam.

1. The role of Italians in Croatian humanism: Giovanni of Ravenna, Ciriacco from Ancona, Philippo de Diversis, Tideo Acciarini, Ludovico Beccadelli. The book *Asian War* by Coriolanus Cippico. Croatian role at the Korvin Court in Buda. Nikola Modruški as an important witness of his time. Poets in Latin Ilija Crijević, Jakov Bunić, Karlo Pucić, Damijan Beneša.

Seminar: Benedikt Kotruljević: The book on Trade and Perfect Merchant.

2. Ludovik Crijević, historian of papal Rome during the reign of the Borgias. Vinko Pribojević, and his speech on greatness of the Slavs. Literature of other Slavic nations in the Renaissance.

Seminar : Vinko Pribojević: On Greatness of the Slavs

3. The first school of Croatian poetry: Petrarchism in Nikša Ranjina Collection. Personalities of Džore Držić and Sigismund Menčetić. Hanibal Lucić his poetry and drama *The Slave Girl*. Mavro Vetranović: *History of Diana*. *Hunter and villa*. *Orfeo*.

Seminar : Lucić :*The Slave Girl*. Vetranović *Slaves*

4. Library of Marko Marulić and the question of his education. Analysis of Marulić's *Judith*. *Prayer against the Turks*. Marulić's Latin works. Davidias as humanistic example of ancient and medieval poetic knowledge.

Seminar : Marko Marulić: *Suzana*. Marko Marulić: *Carnival and Lent*. *Anka satire*.

5. New theories of drama and their metamorphosis during the sixteenth century. The development and interpretation of dramatic literature in the renaissance Europe. *Comedy Grižula* and its relations to Shakespeare's *Midsummer Night's Dream*.

6. Petar Hektorović: *Fishing and Fishermen conversation*. Petar Zoranić: *Mountains*. *Pilgrims in Dalmatia* and other foreign passengers during the sixteenth century. Bartul Gjurgjević and his Turkish episodes.

Seminar : Mavro Vetranović: *The Abraham Sacrifice*; *How Brothers Sold Joseph*.

7. Life of Marin Držić. The interpretation of the document when he was chosen to the status of canonic. The problem of truth. Siena episode in his life. Travelling with count Rogendorf. The scandal of alleged plagiarism. Statement on the death of Pero Primović.

Seminar: Držić's Conspiratorial letters to Cosimo I de 'Medici.

8. Analysis of Burckhardt book *Culture of the Renaissance in Italy*. Critics and interpreters of this book. Pastoral tradition in the fifteenth and sixteenth century, its sources and ideological signs. Tasso's *Aminta* and his Croatian anticipator. The influences of Tasso's work in Croatian literature. Seminar: Marin Držić: *Tirena*; *The Miser.ž*

9. Prolog of *Negromant* from the *Great Indies* and his interpreters. Question of literary twins in comedy *Pjerin*. Possibility of new historic interpretation of Držić's dramas and nonfiction texts.

Seminar : Marin Držić: *Uncle Maroje*; *Conspiratorial letters to Cosimo I de 'Medici*.

10. Women contribution in the Croatian literature during the sixteenth century. Circle of Cvijeta Zuzorić. The authors of the Bay of Kotor in the sixteenth century and their participation in the history of Croatian literature. Poets Bobaljević and Ranjina. Antun Sasin. Mannerism.

Seminar: Marija Gundulić Gozze: Preface to husband's book. Other Women Writings.

11. Renaissance tragedies: Držić Hecuba ; Bunić : Jokasta ; Gučetić : Dalida ; Lukarević : Atamante ; Zlatarić : Elektra ; Brne Krnarutić : Myth of Sigeth and Zrinski in the Croatian literature.

Seminar : Sabo Gučetić: Dalida

12. Comedy in Croatian literature after Držić. Commedia dell'arte and its poetics. Martin Benetović. Generic system in Croatian Renaissance literature.

Seminar : Martin Benetović : The Woman from Hvar

13. Three Renaissance writers from the central Croatia: The iconography of Turks in the works of Bartol Gjurgjević. Life and works of adventurer and religious convert Andrija Dudić. Renaissance Systematization of knowledge in the Encyclopedia of Pavle Skalić. Seminar: Croatian lexicography from Skalić to our time.

14. The relation of Protestantism to humanism. Erasmus of Rotterdam and its relations with the Croats. Baldo Lupetina case. Matija Vlačić, his life and works. The contribution of Matija Vlačić to the theory of literary texts and hermeneutics. Urach mission, its participants and achieved results.

Seminar: Matija Vlačić and his Key of Old Testament in the light of modern theory of literature.

15. Faust Vrančić at the court of Rudolph II. Mannerism in Croatian literature. Vrančić's uncle Antun as a travel writer. The impact of the early Jesuits in Croatian literature.

Seminar: Itinerary as autobiography: Antun Vrančić, Journey from Buda to Hadrianopolis.

Study Programmes

» Croatology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze of the texts from the literature of Croatian Renaissance.
2. Identify of literary genres of Renaissance and analyzing the texts.
3. Develop of the ability of thematic analysis of literary works.

Economic Potentials of Emigrants

269804

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

To develop in the participants knowledge about the economic potential of the Croatian emigration.

To analyze in more detail the specificities of individual emigrant communities according to their basic characteristics.

Consider the regional-economic aspect of emigration.

Acquaint students with the overall migration cycle: departure, stay, interest in returning, economic integration and return.

Consider the reference circle of European countries; net migration-economic balance.

Train students for inclusion in the work of migration-economic institutions.

Train students to preserve, strengthen and develop the economic links of the Croatian emigration with Croatia.

Establish a model of economic development in Croatia according to the potential of Croatian emigration.

Teaching Assistant
dr. sc. Zvonimir Savić

Grading

Attendance and discussion in class, report and oral exam. In addition to the classic methods of monitoring through lectures, seminar papers, exams, interviews, tests and the like, independent research papers are especially valued and, through mentoring, they are raised to the level of the student's possible performance at scientific and professional gatherings or publication in appropriate journals. This is a special motive for students in developing their independence and confirming their cognitive powers. Thus, students can already publish and create assumptions for future work and employment in research teams

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define economic migration cycles and trends and migration areas according to economic parameters
2. Explain the economic role of immigrant communities in countries of immigration
3. Analyze the economic cooperation between Croatia and countries with a significant Croatian emigrant population
4. Recognize the potential of expanding the scope of activities of Croatian institutions that serve or can serve for the economic/investment connection of emigration with Croatia
5. Recognize areas of possible branch economic connection between emigration and Croatia
6. Prepare appropriate studies and reports in the function of economic connection between expatriate and domiciled Croatia

To enable students to acquire basic knowledge and develop knowledge about election laws, systems and models.

To consider the legality of Croatian national and local elections and elections for the European Parliament and their reflections on the organization of the Croatian political system and society.

Show and confirm the application of democratic standards in elections in Croatia.

By comparing the Croatian electoral system and the electoral systems of European countries of developed democracies, realize the need for harmonization.

Draw a correlation between the electoral system and the overall development of Croatia.

Familiarize students with electoral units and ways of their selection.

Point out the uniqueness of Croatian constituencies, especially the 11th and 12th constituencies.

To notice the existing discrepancy between electoral units and the demographic conditions of their allocation.

Acquaint students with the need to harmonize the voter list with the permanent population in Croatia.

To develop in students the ability to scientifically approach choices, projections, potentials and probabilities.

ECTS Credits 2.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

Regular attendance at classes, attendance at at least 12 teaching units, writing a seminar paper and taking a colloquium

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic election systems and models
2. Analyze electoral processes, determination of electoral units, electoral competition, voting and conversion of votes into mandates
3. Explain the importance of electoral systems as fundamental elements of representative democracies
4. Describe the political system, electoral models and the constitutional and legal order of the Republic of Croatia
5. Explain the largest electoral systems and electoral models in the world
6. Argue the need to include the Croatian emigration in the political life of Croatia

Study Programme Learning Outcomes

Emotions

37811

Lecturer

doc. dr. sc.
Jelena Maričić

Course Description

Course objective is to familiarize students with systematic review of scientific terms and concepts in the field of emotion, and with the development, enrichment and applying scientific concept of emotion. Special emphasis is placed on the application of theoretical knowledge of psychology of emotions in everyday life and professional practice.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic principles of formation of emotional responses.
2. Explain the laws of emotional connection with the occurrence of other mental processes
3. Generalize factual knowledge about emotional phenomena to specific cases and developments in practice
4. Predict relationship between emotional and other mental processes
5. Evaluate the achievements of research projects and scientific articles
6. Formulate new research projects to verify the relationship between emotional phenomena and emotional phenomena and other mental processes

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

English for Journalists

38002

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To acquire techniques and strategies for reading comprehension related to journalism.

To improve students' language competence through the study of topic-related literature.

To develop new strategies of learner autonomy.

Study Programmes

- » Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply acquired skills and strategies for reading comprehension
2. Use authentic materials to further develop their communicative competence
3. Demonstrate the ability to rephrase the acquired topic-related vocabulary.
4. Express autonomously their views and attitudes related to the media, politics and business
5. Apply and integrate the acquired grammatical structures and language skills in writing short structured texts
6. Differentiate between the main styles and registers in quality press and tabloids
7. Compare and contrast different political regimes

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

ECTS Credits 4.0

Semester Summer

English Level L3

E-learning Level L1

Study Hours 60

Grading

Regular attendance and active participation in classes (20%); oral presentation of a topic of choice (10%); work on the course portfolio (30%); final exam (40%).

Categorize and reexamine journalistic ethics
 Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Write texts and prepare other materials for media and public relations in Croatian and English
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers
 Prepare and construct work assignments in the interdisciplinary field

General Competencies

Apply and make effective use of the acquired basic concepts related to journalism in the English language. Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations. Explain and critically analyse the acquired theoretical and practical information. Make effective use of acquired skills in reporting for the media in the English language.

English language:Journalistic Translation 38001

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To enable students to develop their translation techniques using various aspects of elements of culture and civilization in English speaking communities.

To enable students to independently apply the acquired skills and strategies in translating short structured texts from the English language into Croatian and vice versa.

Study Programmes

- » Communication Studies (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate various aspects of culture and civilization in English speaking communities focusing on socio-political terminology
2. Examine and differentiate between parts of language structures.
3. Explain the difference between formal and informal style
4. Use and integrate the acquired language skills and competencies for the purpose of translating correctly on the lexical level (false pairs, collocations and constant linguistic patterns, idioms and phrases).
5. Translate independently short structured texts (headlines, leading articles, reviews, etc.)
6. Develop skills to critically evaluate their own and peer translations in terms of style and accuracy

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Lecturer

prof. dr. sc.
Zvonimir Čuljak

ECTS Credits	3.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30
	30

Grading

On the basis of two tests results or written exam.

Course Description

Course objectives:

1. Present and explain the main epistemological concepts, theories, and arguments and enable students to understand and correlate them.
2. Enable students to analyze the main epistemological concepts and arguments.
3. Enable students for critical assessment of the major epistemological theories and arguments.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the main epistemological concepts (knowledge, epistemic justification, evidence, epistemic reasons, perception, introspection, rational intuition, testimony, a priori / a posteriori)
2. Explain the major epistemological theories (realism, anti-realism, empiricism, rationalism, foundationalism, coherentism, contextualism, infinitism, tripartite analysis of knowledge, causal theory of knowledge, reliabilism, defeasibility analysis, conditional theory of knowledge, internalism, externalism, naturalism)
3. Paraphrase the main epistemological arguments (e.g. argument from illusion, time gap arguments, argument from error, Russells hypothesis, Agrippas trilemma, brain-in-a-vat argument, Gettier counterexamples)
4. Explain the correlation between reasoning and inferential justification
5. Explain the difference between inferential and non-inferential justification
6. Distinguish between psychological and epistemological explanations of cognitive sources and processes

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods

Critically review different theories

Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Determine the position and importance of humanities in the general structure of science

General Competencies

Students will be able to: 1. understand and explain the main epistemological concepts with respect to the main logical, metaphysical and semantic problems; 2. understand and explain the major epistemological theories with respect to the related theories in metaphysics, ethics, philosophy of science and philosophy of mind, 3. apply epistemological arguments to the related problems in ethics and philosophy of science.

Screening of student's work

3	Kolokviji [EN]

Ethics for Psychologists

240092

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

The aim of the course is to introduce the students into the ethical principles, dilemmas and approaches to psychology as a profession, and to other professions. Students will acquire knowledge on basic theoretical approaches, ethical principles, the process of ethical decision making, meta-codes and codes of ethics. Students will learn about ethical aspects of psychological research, with special emphasis on research with children. This course should enable the students to acquire basic knowledge on ethical principles, as well as ensure ethical approach to their profession, and their future practice.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concepts of ethics, morals and values, as well as theoretical schools in ethics.
2. Differentiate the basic ethical principles.
3. Analyze the approaches of professional ethics and general principles of psychological ethics.
4. Compare the Code of Ethics of the Croatian Psychological Chamber and the Meta-code of Ethics of the European Federation of Psychological Associations.
5. Demonstrate, individually and in group, the analysis of ethical dilemmas in professional work with people.
6. Apply the ethical principles to different fields of professional practice (clinical, educational, organizational, etc.)

Study Programme Learning Outcomes

Psychology

Create appropriate forms of communication and cooperation in different professional environments

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Determine the need for lifelong learning and professional development

ECTS Credits	2.0
Semester	Winter
English Level	L1
E-learning Level	L2
Study Hours	30

Teaching Assistant
Lea Andreis, mag. psych.

Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 50 points according to following arrangement: Regular attendance = 10 points; Activity during class = 10 points; Written group presentation content = 15 points; Oral Presentation = 15 points. Points are turned into final grade as follows: 26-31 points = pass (2); 32-37 points = good (3); 38-43 points = very good (4); 44-50 points = excellent (5).

General Competencies

8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Forms of Teaching

- » Predavanja
 - » Two hours of lectures per week

Week by Week Schedule

1. Introduction to psychological ethics.
2. History review: Moral principles and ethics.
3. Theoretical approaches and general ethical principles. Interdependence of the four principles.
4. Professional ethics, ethics in the helping professions - fundamental principles of the psychological ethics: respect for a person's rights and dignity, competency, responsibility, integrity.
5. Demonstration of ethical standards and and comparison of codes of ethics: Croatian Psychological Chamber, American Psychological Association, European Federation of Psychological Associations.
6. Standards of ethical behaviour, ethical issues, ethical decision making, risk vs. gain relationship.
7. Research principles and ethical issues. Ethics in research on animals: Pavlov's dogs, Skinner's pigeons.
8. Ethics in psychological research: Deception in Milgram's obedience study.
9. Ethics in psychological research: role playing and simulation - stress and harm in Zimbardo's Stanford prison experiment.
10. Ethics in psychological research with children: from Pavlov, and Watson, and on. Ethical code and ethical issues.
11. Ethics in psychological research on the Internet.
12. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
13. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
14. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
15. Conclusion: What have we learned?

Ethics in Journalism

28470

Lecturer

doc. dr. sc.
Tamara Kunić

Course Description

The main objective of this course is to provide insight into the basic knowledge about journalism and media ethics, with special emphasis on its practical application in daily journalism and media work. The specific objective of this course is to prepare the students to understand journalism ethics as a practical philosophical discipline that deals with the specific morals and deontology of the profession, which must take into account the ethical codes and legal regulations which govern the journalistic and media profession, and which the students will have to adhere to themselves in journalistic practice.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare historical and contemporary ethical directions and principles of journalism and media professional ethics;
2. Explain and apply the basic universal principles, and concepts like morality, ethics, professional ethics and deontology of journalism and the media;
3. Explain the importance of knowing and respecting ethical and legal standards in as a public service profession;
4. Describe and explain the various ethical codes of journalism in the world;
5. Analyze and interpret the ethical and legal requirements which the print media, radio, television, new media, promotional activities and public relations in Croatia and abroad must adhere to;
6. Use the acquired knowledge about different ethical approaches to mass media;
7. Evaluate the quality of contemporary media from the ethical and moral standpoint;
8. Critically analyze media content from the moral standpoint;
9. Explain the reasons why it is necessary for every future communicologist to know journalism and media ethics.

Grading

5 % lecture attendance, 5 % discussion participation, 10 % work on the blog, 20 % seminar work, 60 % preliminary exams and/or final exam.

Prerequisites

Introduction to Journalism

Prerequisites for
Mass Communication:
Legal Aspects

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Categorize and reexamine journalistic ethics

Organize individual and team work

Recognize the needs and willingness to engage in lifelong learning

Prepare and construct work assignments in the interdisciplinary field

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Categorize and reexamine journalistic ethics

Organize individual and team work

Recognize the needs and willingness to engage in lifelong learning

Prepare and construct work assignments in the interdisciplinary field

Prepare and create different forms of presentations and seminar papers

General Competencies

The students will become familiar with the basic moral, ethical and legal principles, with a variety of traditional and contemporary ethical directions, especially with deontology of journalism and professional media ethics. The course will enable them to critically analyze and clearly distinguish truthful, objective and fair reporting on the events of public interest from the journalistic and media activity that is false, sensationalistic, scandal prone, morally unacceptable and legally punishable.

The students will be able support with arguments the reasons why some journalistic work is ethically acceptable, and why some is not, and in this sense they will be able to critically analyze all types of media: print, radio, television and new media. They will acquire this competence by working on a common blog, where, together with all the participants of the course they will acquire and develop skills of critical consideration, presentation and analysis of the journalism and media ethics.

Week by Week Schedule

1. Anthropological-philosophical foundation of communication: interpersonal communication and social communication; subject, its veracity and morality/ethics in communication;
2. Philosophical ethics: definition of ethics; from Aristotle to the present day; Kant: morality from reason; paradigm: Sartre-Heidegger-Marcel/Levinas; contemporary ethical directions;
3. Deontology of journalism: term and definition;

4. Social communication ethics: foundation of the communication ethics; goals and standards of social communication ethics, journalism and media ethics;
5. Doctrinal content of journalism ethics: truth, objectivity, information source, professional secret, right of privacy, correction, professional integrity, copyright and plagiarism, the prohibition of war propaganda, promotion of democracy and peace;
6. Media ethics: ethics of the press; radio ethics; television ethics;
7. Ethics in advertising/promotion; ethics in the cinema/on film; ethics of public relations/spokesmanship, the new media (Internet - Facebook) - a new morality?;
8. Self-regulation and regulation of journalists: journalistic codes: differences between regulatory and self-regulatory acts; Code of Honour of Croatian Journalists (2009);
9. International journalistic codes: Declaration of Principles on the Conduct of Journalists; Munich Declaration, UNESCO International Principles of Professional Ethics in Journalism; Danish code of professional conduct; Journalistic Code of the Voice of America;
10. International journalistic codes: Declaration of Principles on the Conduct of Journalists; Munich Declaration, UNESCO International Principles of Professional Ethics in Journalism; Danish code of professional conduct; Journalistic Code of the Voice of America;
11. Introduction to law: international documents on human rights;
12. Right to privacy: protection of dignity, reputation and honor;
13. Protection of children in the media;
14. The right of access to information, the right of reply and correction;
15. The responsibility of the recipient - the view from the other side: the Decalogue of the Italian advisory council of media users.

Everyday Life in Ancient Rome

33169

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

Purpose of this course is to become acquainted with Roman everyday life and customs, such as living space, magistracies, religion, calendar, business, diet, army, entertainment, taking into account also the repressed social groups: women and slaves. Seminar includes reading the selection of text and preparing for a discussion. Students are required to: attend classes, prepare the texts, and pass the exam after the semester is over.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*fil (17084) - elective general foundation courses, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate and comment the texts of Roman literature, understanding the context in which they were written
2. Compare the life of Romans and other people
3. Produce scientific papers on Roman civilisation and their way of life
4. Recognise and describe the remains of Roman culture in Croatia.

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L2
E-learning Level	L1
Study Hours	15
	15

Grading

Parts of the final evaluation are:
participation in class,
preparation and
presentation of specified
tasks, achievement on
written and oral exam. It
is necessary to present a
paper before the exam.

5. Explain basic concepts of ancient Roman culture, especially in areas of politics, army, religion and everyday life.
6. Specify the basic changes that Roman society went through during its historical development
7. Recognise the elements inherited from Rome in the Western civilisation.
8. Enumerate those Roman influences that marked the Western civilisation and our way of life.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them
 Interpret various cultural, social and political phenomena
 Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics
 Judge the position, importance and relevance of one's own culture in creating personal and national identity
 Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation
 Determine the need for lifelong learning and professional development

Communication Studies

Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Recognize the needs and willingness to engage in lifelong learning
 Prepare and create different forms of presentations and seminar papers
 Prepare and construct work assignments in the interdisciplinary field

History

Identify historical facts and processes from European and national history
 Single out historical processes and explain their topic of interpretation
 Express (in your own words) basic historiographical facts about world history
 recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values
 Apply the methodology of various historiographical fields and other research methods from the humanities

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the need for lifelong learning and professional development

Sociology

Screening of student's work

Forms of Teaching

- » Predavanja
 - » 1 hour per week
- » Seminar
 - » 1 hour per week

Week by Week Schedule

1. Introductory remarks on the Roman state: its history, literary sources, Roman citizen, his rights and duties etc., accompanied by the examples from ancient Roman texts.
2. Roman housing: domus, insula, villa and interior decorations; problems of Roman cities. Most famous buildings, especially on the Forum Romanum, and remains of Roman estates in Croatia are mentioned, accompanied by the examples from ancient Roman texts.
3. Roman nutrition: main dietary products, social customs, distribution of meals, organisation of feasts, etc., accompanied by the examples from ancient Roman texts.
4. Roman upbringing: childhood and education; clothing and coming of age of Roman men; accompanied by the examples from ancient Roman texts.
5. Responsibilities of a Roman adult: politics in the Roman state (magistrates, social classes, elections...), accompanied by the examples from ancient Roman texts.
6. Roman workday: most common professions, basis of Roman economy, system of currencies and measures, accompanied by the examples from ancient Roman texts.
7. Roman army: organisation in various periods of the Roman state, equipment, duties, conditions of a military life etc., accompanied by the examples from ancient Roman texts.

8. Roman entertainment: amphitheatres, theaters, circuses, baths; adult games etc., accompanied by the examples from ancient Roman texts.
9. Position of women in Rome, their rights and obligations, clothing, jobs and ways of spending free time, accompanied by the examples from ancient Roman texts.
10. Position of slaves in Rome: ways of becoming a slave, his duties, conditions of life, uprisings and manumissions; accompanied by the examples from ancient Roman texts.
11. Roman deities: 12 main gods with their attributes and functions; various minor deities, accompanied by the examples from ancient Roman texts.
12. Roman religion: foreign influences, main customs (sacrifices, burials), types of priests, temples etc., accompanied by the examples from ancient Roman texts.
13. Ancient Roman calendar: counting the hours, days, weeks, months and years, along with the Julian reform; accompanied by the examples from ancient Roman texts.
14. Fundamentals of ancient Roman law: sources; courts and litigations etc., accompanied by the examples from ancient Roman texts.
15. Students' choice: Q&A

Exact Sciences in Croatian Culture

188082

Lecturer

prof. dr. sc.
Zvonimir Čuljak

Course Description

The course is intended to:

1. explain the correlation of science and culture in general
2. present the development of exact sciences in Croatian culture with respect to the development of exact sciences in European culture,
3. explain the main determinants of that development and the main characteristics of particular periods in the history of exact sciences in Croatian culture
4. present the major discoveries and innovations as well as other contributions of Croatian scientists in the history of science and culture
4. enable students to understand and explain the role of exact sciences in the history of Croatian culture
5. enable students to analyze and evaluate the contributions of Croatian scientists in the context of Croatian and European cultures.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)

- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Relate exact sciences and the culture in general
2. Compare the development of exact sciences in Croatian culture with the development of exact sciences in European culture
3. Explain the main determinants of the development of exact sciences in Croatian culture
4. List the main characteristics of the particular periods in the history of exact sciences within Croatian culture
5. List the major discoveries and innovations as well as other contributions of Croatian scientists
6. Analyze and evaluate the contributions of Croatian scientists in the context of Croatian and European cultures

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Communication Studies

Croatology

Identify different theoretical approaches to the study of Croatian culture

Mark, explain and interpret the role of exact sciences in the history of Croatian culture

Croatology

Identify different theoretical approaches to the study of Croatian culture

Constructively participate in discussions on croatological topics

Explain and analyze the components of Croatian culture and their connection

Mark, explain and interpret the role of exact sciences in the history of Croatian culture

Experimental Methods

200133

Lecturer

Goran Milas,
nasl. prof. dr.
sc.

Course Description

The main objectives of the course are to introduce students to the basics of the experimental methodology and the different modalities of its use. Through lectures, students will get to know the basics of the experimental methodology, the reasons for its use, and basic designs through which it is applied. Students will also be acquainted with the way of conceiving experimental research and writing a report or research paper based on it.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the experimental designs and different modalities of their use - Analyze the different segments of experimental research approaches - Evaluate the experimental studies - Apply experimental designs in their own research - Create the research that will make advantage of the experimental design
2. Analyze the different segments of experimental research approaches
3. Evaluate the experimental studies
4. Apply experimental designs in their own research
5. Create the research that will make advantage of the experimental design

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and become acquainted with the facts, biographies, ideals, work and importance of individual Croatian greats outside the Motherland from the Middle Ages to the present day.
2. Explain and accept their existence as a Croatian contribution to human civilization and Croatian identity in Croatia and the world
3. Identify, explain and learn about the formation of public perception about famous Croats
4. Explain the overall social context of the actions of famous Croats in the world
5. Explain, understand and predict future opinions and the importance of their actions and sacrifices
6. Analyze the life and work of some famous Croats in the world as part of the research work.
7. Explain the historical and political conditioning of emigration, activities and appreciation of Croatian notable figures

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Female Authorship in recent Croatian Literature

270281

Lecturer

prof. dr. sc.
Dubravka Zima

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Required reading	- 30%
Participatin in class	- 20%
Research - group work	
20% Written work	- 30%

Course Description

The course Female authorship in recent Croatian literature will cover about 170 years of female authorship in recent Croatian literature - from the 1830s, when Dragojla Jarnević appeared with her prose texts, until the end of the 20th century and contemporary authors. The goal of the course is to get students to read key texts of Croatian women's literature in the specified period, to understand the concept and implications of female authorship in the context of the period covered, and to supplement the study of contemporary Croatian literature.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 1st semester, 1st year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 3rd semester, 2nd year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate poetics in the history of Croatian literature
2. Name and determine the key authors of recent Croatian literature
3. Explain the basic problems of the proces of literary canonization considering the gender of the authors
4. Apply teaching techniques and interpretations of literature

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical. orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Croatology

Single out and interpret the characteristics of the Croatian

Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms
 Constructively participate in discussions on croatological topics
 Identify, describe and argue the influence of European and world literature on the Croatian Literary Canon
 Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication
 Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

Week by Week Schedule

1. Introduction to the course. Obligations and tasks. Introduction to the study of literature. History of literature with regard to authorship. Theory of authorship. Concepts of female authorship. Seminar: review of the literature, instructions for taking the exam.
2. The history of Croatian literature from the author's perspective. Croatian recent literature with regard to female authorship. Seminar: Virginia Woolf: *A Room of One's Own*.
3. Romanticism in Croatian literature: authors. Seminar: Dragojla Jarnević: *Domoljubne poviesti*. Jagoda Brlić: *Poetry*.
4. Realism in Croatian literature: authors. Part 1. Seminar: Marija Jambrišak, Jagoda Truhelka
5. Realism in Croatian literature: authors. Part 2. Seminar: Milka Pogačić, Ivka Kralj
6. Protomodernism in Croatian literature: authors. Part 1. Seminar: Kristijana Solvejgs.
7. Modernism in Croatian literature: authors. Part 2. Seminar: Ivana Brlić-Mažuranić.
8. Modernism in Croatian literature: authors. Part 3. Seminar: Adela Milčinović, Zdenka Marković.
9. Literature in 1920's. Seminar: Mara Ivančan, Fedy Martinčić.
10. Marija Jurić Zagorka: Seminar: works of Marija Jurić Zagorka.
11. Croatian women poets in 20th Century. Seminar: Vesna Parun.
12. Croatian women novelists in 20th Century, part 1. Seminar: Višnja Stahuljak, Sunčana Škrinjarić.
13. Croatian women novelists in 20th Century, part 2. Seminar: Slavenka Drakulić, Daša Drndić.
14. Croatian authors in 21st Century. Seminar: Olja Savičević Ivančević.
15. Conclusion: on Croatian literary canon and female authorship. Seminar: evaluation.

Fieldwork 1

226646

Lecturer

doc. dr. sc.
Monika
Komušanac

Course Description

Course objectives: introduce students to methods of field research; develop in students' knowledge on the subject through field work; equip students to differentiate between and understand various approaches to field work research; introduce students to significance of population for spatial processes and relations through direct field research; equip students through field work to understand methods of discovery, identification, and defining of demographic terminology, categories, and laws; equip students for independent field research work; provide students with skills for application of standard and distinct methods and techniques of field work; make students aware of distinct field work methodology and ways of identifying spatial reflections; acquaint students with development of certain spaces of Croatia using field examples; develop in students the skills to use field work techniques; explain to students during field work the correlation between population and regional development; equip students through field work to understand, elaborate, and forecast future changes; develop in students the knowledge on vulnerability of spatial potential using case studies.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain, analyse and understand theoretical and methodological concept in demography and migrations and their applicability in field work
2. Explain, analyse and understand logic and functional organisation of space
3. Explain, analyse and understand strategic significance of population within the concept of regional balancing
4. Explain, analyse and understand correlation between natural basis, social upgrading, and political dynamics within a particular space
5. Explain, analyse and understand general and regional concept of a functioning organisation of space
6. Explain, identify, define, solve and forecasting of space-related issues
7. Explain, identify and solve spatial dissonance through field work

ECTS Credits	2.0
Semester	Summer
English Level	L0
E-learning Level	L1
Study Hours	30

Grading

Regular attendance in class, completion of preliminary exam, participation in class discussions, submission of independent research paper.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

- Demonstrate the ability to terminologically understand demographic and immigrant terms
- Conduct relevant research on the Croatian resident and emigrant population
- Develop cognitive and operational skills for conducting research essential for development concepts and homeland security
- Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making
- Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Food and the Modern Period

202959

Lecturer

doc. dr. sc.
Ivana Jukić
Vidas

Course Description

The Early Modern period was stricken with many tragedies: high rate of poverty, endless wars, epidemics, 'little ice age', famine; to stay alive and to avoid hunger was the main concern of many. The course objectives are to explain how food exchange, trade and production was prerequisite to society order but also social unrest and disbalance. However, Early Modern period was stricken with renaissance luxury and carpe diem way of life, so course will demonstrate how food was also symbol of social hierarchy, and how our contemporary menus are in many ways result of the Early Modern global food exchange.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Relate famine as catalysator of many Early modern processes such as: explorations, wars, scientific revolution, agrarian revolution,
2. Explain different historiographic interpretation about food and its influence on World history
3. Compare demographic trends all around world and improved food production
4. Describe economic trends conditioned on food production or trade
5. Identify food as status symbol in Early Modern World (tea, chocolate)
6. Distinguish food as one of the most important element of globalization in Early Modern World
7. List similiarities in Early Modern and contemporary nutrition

Study Programme Learning Outcomes

Dual-major studies

History

History

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours 30

Grading

The final grade will be result of complete student activity and attendance during course lessons. The final exam is written exam.

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Identify historical facts and processes from European and national history

Identify important historical figures from different periods of European history

Norm and classify historical literature and sources

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

General Competencies

After finishing the programme student will be able to:
write an essay on different historical period,
design his/her own conclusion on different historical events and processes,
demonstrate the importance of interdisciplinary interpretations of historical events,
differentiate specificities of historical periods,
combine a different historical processes.

Week by Week Schedule

1. Class overview, schedule, requirements
2. Follow the food, follow the civilizations
3. Food as catalyst of social changes
4. Food and Age of Exploration; Columbian exchange
5. Essay and discussion
6. Hedonism, wheel trade and food I
7. Hedonism, wheel trade and food II
8. Hedonism, wheel trade and food III
9. Essay and discussion
10. Creative-thinking, history and food
11. Beverages that changed the World
12. Food and Literature
13. Pirates, rum and trade
14. To write historical novel: with the help of the food
15. Food in Early Modern Croatia

Forms of Communication in Journalism

37896

Lecturer

doc. dr. sc.
Tamara Kunić

Course Description

The aim of the course is to create a routine students for becoming familiar with and engaging in genres of objective journalism—news story, report and interview—and teaching students how to recognize a publication-worthy event, how to obtain information and process it into a news story or report.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate knowledge functioning of the media / editorial board.
2. Identify and write the required journalistic forms.
3. Demonstrate the ability to independently monitor course of events.
4. Demonstrate the skills of independent collection and processing of information.
5. Demonstrate the skills of independent news writing, reporting..
6. Demonstrate the skills of independent independently conduct an interview.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society
Inform about journalism and public relations

ECTS Credits 6.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours 60

Teaching Assistant
Marko Pavić, dipl.nov.

Grading

Attendance and participation in exercises (30 percent), independent practical work (50 percent), oral exam (20 percent).

Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Write texts and prepare other materials for media and public relations in Croatian and English
 Recognize and describe Croatian language culture and use language skills in journalistic and proofreading jobs
 Recognize and compare the peculiarities of individual media
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society
 Inform about journalism and public relations
 Prepare materials for media and public relations in Croatian and English
 Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Identify and compare the peculiarities of individual media
 Identify and describe Croatian language culture and use language skills in journalistic and proofreading jobs
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of journalism, primarily those related to the types of information and news media coverage and practical work of journalists. Knowledge of the theoretical and practical level of basic, informative journalistic forms. Ability to independently recognize important media events and monitoring them.

Free Will

239764

Lecturer

prof. dr. sc.
Anto Gavrić

Course Description

Historical-philosophical reconstruction of the developmental sequence in the understanding of freedom from the initial understanding of freedom as the "ability to choose", that is, as a "property" belonging to the human will, to the growth of freedom into one of the central categories of philosophical thinking.

Getting to know the three fundamental developmental stages in the understanding and philosophical articulation of the concept of freedom, primarily on the basis of the texts of the key protagonists of this advancement in the awareness of freedom - Aristotle, Augustine, and Kant - on which not only the immanent development of philosophical thought but also the overall development of the Western civilization circle was based. At the first stage of development within the framework of Greek philosophy, freedom is understood as the ability or possibility of choice in the sphere of what is within the power of man. Freedom becomes a feature of the will with metaphysical and cosmic implications in the philosophical and theological thought of Aurelius Augustine. Although this crucial shift in Augustine's understanding of freedom was actually "forced", because it arose as an incidental contribution to solving the problem of evil in the world, it opened the way to Kant's conception of freedom as a special causality that establishes an equal counter sphere to the existing one (Sein - Sollen), that is, the "realm of freedom" as a counter-term to the "realm of nature".

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify political, social, cultural and spiritual movements.
2. Demonstrate competent participation in discussions on current issues.
3. Use orientational knowledge for the immediate challenges brought by modern civilization.

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Grading

The final grade includes the grade of the seminar paper and the oral or written exam.

4. Argue in individual and social life in philosophical, ethical and moral controversies in the manner of an advisory role
5. Show competence for contemporary intellectual debates.
6. Use arguments about the topic of the course in a wider scientific context

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Interpret various cultural, social and political phenomena

Critically review different theories

Differentiate most important periods of the history of philosophy and their respective philosophical schools. individual philosophers and their works

Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics

Describe the features of the humanities and their interdisciplinary aspects

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Determine the position and importance of humanities in the general structure of science

Evaluate philosophical concepts. arguments and theories

Fundamentals of Cellular Biology and Genetics

115576

Lecturer

prof. dr. sc.
Srećko Gajović

Course Description

The general objectives of the course are to learn of the role of genetic factors in the normal behavior and in the event of occurrence of mental illnesses and to understand the basic principles of cellular organization of the central nervous system. Specific objectives are elaborated according to the topics of teaching.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic parts of the cell,
2. Explain the principles of translation and transcription, the role of proteins in cellular processes,
3. Explain the principles of inheritance, the methods of regulation of gene expression,
4. Apply the acquired knowledge to understanding the mechanisms of emergence and inheritance of hereditary diseases and disorders,
5. Use e-web materials in the field of cell biology and genetics in the preparation of presentations,
6. Develop a tree of inheritance of different genetic disorders (autosomal dominant-recessive, sex-linked),
7. Analyze the reviewed scientific articles in the field of mental disorder genetics,
8. Explain and present the role of genetic factors in behavior, especially in the development of mental disorders and abnormal behavior,
9. Identify the basic parts of the central nervous system at the microscopic level,
10. Identify the basic parts of neurons and types of glial cells.

Study Programme Learning Outcomes

Psychology

Critically judge theoretical approaches to the study of individual differences

ECTS Credits 3.0

Semester Winter

English Level L1

E-learning Level L1 (20%)

Study Hours
30
15

Teaching Assistant
izv. prof. dr. sc. Nino
Sinčić

Grading

Class activity - 5%, two preliminary exams - 80%, independent seminar assignment - 5%, written knowledge assessment - 10%.

Prerequisites for
Developmental
neurobiology

Determine the biological and neurobiological bases of psychological processes and behavior

General Competencies

Preparing the students to more easily master the subject matter in the area of biological psychology by expanding their knowledge of cellular biology and genetics and the cellular organization of the central nervous system. Developing a critical approach to the understanding of the relationship of genetic determination and the environmental psycho-social factors in shaping of the phenotype.

3. Determine the biological and neurobiological bases of mental processes and behavior.

5. Critically assessing the theoretical approaches to the study of individual differences.

Screening of student's work

0.2
ECTS Pohađanje nastave [EN]

2.5
ECTS Kolokviji [EN]

0.3
ECTS Seminarski rad [EN]

3 ECTS

Week by Week Schedule

1. The development of molecular biology methods and impact on the development of psychology as a profession. Cell structure: introduction to the basic structure and function of cell parts: nucleus, cytoplasm, cell membrane, ribosomes, endoplasmic reticulum, mitochondria, lysosomes, Golgi apparatus.
2. Cell membrane system. Cell research methods.
3. Krebs cycle and energy production: introduction to the basic principle of oxidative cycle (citric acid cycle), and the forms and ways of creating and storing energy. The role of phosphorylation in cellular neural signaling.
4. Amino acids: introduction to the basic types and chemical structure of amino acids, proteins - chemical structure of proteins and conformational states. The role of proteins in the body.
5. From the nucleic acid to the chromosome 1: understanding the structure of nucleic acids and their multiplication. From the nucleic acid to the chromosome 2: packaging of nucleic acid within the chromosome, histones, coding and non-coding regions.
6. What are genes? Protein synthesis: the importance and role of protein synthesis. Mechanisms and processes of protein synthesis: messenger RNA, transport RNA, ribosomal RNA.
7. DNA replication and repair. The cell cycle and cell division - cycles and mechanisms of mitosis.
8. Mitosis and meiosis: introduce the main differences between mitosis and meiosis, spermatogenesis, oogenesis. The relationship of genotype and phenotype: understanding the concept of gene and allele.

9. Prions, viruses, viroids; reverse transcriptase and retroviruses: the central dogma of molecular biology, methods of virus multiplication, virus insertion into the cell genome. Possibilities and ways of regulation of gene expression, mechanisms of regulation of gene expression, gene regulatory sequence.
10. Genetic imprinting and cytoplasmic genetic systems; cloning - understanding the term "cloning" and distinguishing real cloning from creating a large number of identical twins. Chromosomal mutations: mechanisms of chromosomal mutations. Chromosomopathy - mechanisms of chromosomopathies, Down syndrome, Patau syndrome, Edwards syndrome, Super female syndrome, Klinefelter's syndrome, Turner's syndrome.
11. The difference between monogenetic and polygenetic disorders, methylation as a mechanism of gene expression. (The role of genes in the pathology of the Huntington's and Alzheimer's diseases, the role of genes in the pathology of schizophrenia and manic-depressive psychosis - exploring the basic clinical picture, a critical evaluation of the hypotheses about the role of genes and/or environmental factors in the development of these disorders. The role of genes in the pathology of mental and neurological disorders. (The influence of environmental factors during brain development in individuals with a hereditary predisposition to develop psychological and neurological disorders, and the possibility of reducing the incidence of these disorders. The role of genes in the pathology of autism and epilepsy - exploring the basic clinical picture, a critical evaluation of the hypotheses about the role of genes and/or environmental factors in the development of these disorders.)
12. Gene expression and the theory of evolution of human brain. The role of genes in the normal development and the environmental impact on the expression. The structure of cell membranes; receptors and ion channels. Signaling mechanisms between the cells, types of ion channels, receptor-ion channel, membrane and cytoplasmic receptors.
13. The cell structure of the nervous system: morphological and functional properties of different types of neurons and glial cells. Signaling mechanisms. Synaptic mechanisms.
14. Cellular receptors. Neurotransmitters: definition and classification. Neurotransmitters: chemical structure and functional properties.
15. Membrane potential. Action potential.

Fundamentals of Market Research

64552

Lecturers

izv. prof. dr. sc. doc. dr. sc.
 Ivan Balabanić Erik Brezovec

Course Description

The aim of the course is to teach students the application and methods of the market oriented and advertising research. To introduce to them the basic terms and concepts of market and advertising together with the main research methods in the field. To train them on how to carry out main tasks and duties of market researchers.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses(3rd year), 5th semester, 3rd year*)
- » Sociology (Studij) (*elective courses 1., 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, classify and explain concept of the market in classical sociology.
2. Apply sociological models and methods for the purpose of market and advertising research.
3. Demonstrate process of market research with its basic division on exploratory, descriptive and causal research.
4. Contrast primary and secondary data and their sources.
5. Define and explain application of the market research.

Study Programme Learning Outcomes

Dual-major studies

Sociology

Use theoretical concepts in the analysis of society
 Compare sociological theory and methodology
 Identify the basic concepts of statistics

Sociology

Use sources of scientific information
 Use statistics in social research
 Compare sociological theory and methodology
 Identify the basic concepts of statistics

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Obligatory class attendance and discussion; final written exam.

General Competencies

Upon successfully passed exam, students will be able to:

Design a simple research project.

Use the computer software for the analyses qualitative data.

Develop the research question related to the subject/process/phenomenon of social interest.

Use different social sciences methods in the analyses of the relevant data.

Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects form any possible harm.

Week by Week Schedule

1. Introduction: sociologist as market researcher
2. Defining market in classical sociology
3. Market, market society and the process of marketization
4. Process of comodification
5. Application of sociological models and methods in market and advertising research
6. Basic concepts of advertising
7. Process of market research
8. Exploratory, descriptive and causal research
9. Primary and secondary data
10. Application of market research
11. Analysis of examples of qualitative research 1. part
12. Analysis of examples of qualitative research 2. part
13. Analysis of examples of quantitative research 1. part
14. Analysis of examples of quantitative research 2. part
15. Repetitions, preparations for the exam

General Psychopathology

38642

Lecturers

Petrana Brečić,
nasl. izv. prof.
dr. sc.

Domagoj
Vidović,
nasl. doc. dr.

Course Description^{SC}

To acquaint the students with characteristics of psychiatric disorders; epidemiology, diagnosis and classification of mental disorders. To understand the basic notions in general psychopathology. To acquaint with the application of research methods in the study of abnormal psychology. To understand the methods of clinical assessment and methods of communicating with patients with mental disorders.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define general psychopathological conditions
2. Differentiate and describe the basic notions related to mental disorders
3. Classify psychological disorders into categories
4. Identify the terms of psychopathological epidemiology
5. Design the hypothesis within different theoretical approaches in psychopathology
6. Explain the specifics of different research methods in psychopathology
7. Plan research in the field of psychopathology
8. Apply the principle of confidentiality in the relationship between psychologist and patient
9. Apply knowledge on conducting clinical interviews
10. Support the application of ethical standards in the work with patients

Study Programme Learning Outcomes

Psychology

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Assess mental status and classify diagnostic criteria for different psychological disorders

ECTS Credits	5.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30
	15

Grading

Participation in class - 10%; Seminar essay and its oral presentation - 20%; Clinical interview - 10%; First test - 30%; Second test - 30%. If a student does not take tests or achieve unsatisfactory result on one or both tests, student will take written exam that corresponds the tests by its scope, content and the ECTS.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Assess the mental status and classify the different diagnostic criteria for mental disorders.

Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.

Geographic Information System (GIS) - 214007 Analysis of population

Lecturer

prof. dr. sc.
Roko Mišetić

Course Description

Acquire knowledge about the possibilities of applying GIS in demographic analysis.

To train students in the skills of designing, planning and performing demographic analysis with the help of GIS and making cartographic and graphical representations based on analysis.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic methods of analysis of dynamic and structural characteristics of the population.
2. Explain the spatial units in the study population.
3. Reproduce sources of population data.
4. Use basic methods of analysis of dynamic and structural characteristics of the population.
5. Develop skills for creating a given thematic map of demographic content, processes, connections and relationships in GIS.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Use statistical, quantitative, graphic and geographic software packages

Propose political and legal solutions based on scientific research of demographic and emigrant content

Carry out analytical and scientific procedures of forecasting and modeling the future

Conduct relevant research on the Croatian resident and emigrant population

Interpret data on Croatian and global population and emigration

Global Strategy

226637

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

Course objectives: explain historical genesis of the global strategy and gain understanding of a strategic aspect of interrelated global processes and relationships; differentiate the contents and significance of specific scientific fields, subfields and disciplines, as well as their mutual interconnectedness in the process of research; explain spatial dynamics, development of human activity and socio-economic relationships analyse and connect the concepts of spatial development and shifting of the international centres of gravity, as well as the process of formation of countries and nations; explain national instruments of power; demonstrate a thorough understanding of the system of international security as one of the phenomena in the contemporary society; explore global relationships through the aspect of international security, factors of security architecture and mechanisms of spatial gap prevention as one of the causes of security threats; explain the influence of global processes on security of both Croatian and international geographic space; provide students with relevant know-how to conduct individual scientific research; enable students to understand, interpret and predict future global processes and relationships (i.e. global strategies) and their impact on the Croatian national security.

Study Programmes

- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the historical genesis of global relationships
2. Explain the process of formation of countries and nations
3. Explain, connect and interpret the significance of natural resources in the context of advancement of civilizations and increasing of national/global strength (power)
4. Explain the mutual relationships both of the scientific-technical civilization and culture (value system) in the context of advancement , and sources of contemporary security threats and challenges
5. Define, explain and connect the concepts of global processes and relationships in the context of determining national interests and devising the national strategy and its components
6. Explain the security aspect of the global/national strategy both orally and in a written form
7. Explain and graphically depict global processes, relations and relationships

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Demography and Croatian Diaspora

Propose political and legal solutions based on scientific research of demographic and emigrant content

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Glottodidactics

223567

Lecturer

doc. dr. sc.
Antonia Ordulj

Course Description

To provide a contemporary and historical overview and insight into the theoretical, psychological, neurolinguistic and sociological aspects on which glottodidactics as an interdisciplinary science is based. Explain and judge glottodidactics problems and individual factors that directly affect the second language acquisition. Discuss the process of second language acquisition in the context of other disciplines in the field of social sciences (psychology, pedagogy, sociology, demography) and humanities (linguistics, philosophy, history).

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe basic theories and concepts in the field of glottodidactics as an interdisciplinary science throughout history.
2. Analyze psychological, neurolinguistic and sociological aspects of glottodidactics.
3. Define communication competence.
4. Explain the process of first and second language acquisition and its historical development.
5. Explain and discuss individual factors of second language acquisition.
6. Describe similarities and differences between receptive and productive language skills in second language acquisition.
7. Differentiate research methods in second language acquisition.

Study Programme Learning Outcomes

Greco-Roman Religion

37562

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

Purpose of this course is to become acquainted with Roman religious customs and regulations, with priests, devotion to major deities, taking into account the findings about original Roman beliefs and the influences from Greece and the Orient. The focus will be put on the religious year and the mythological stories that form the inevitable part of Roman literature. Parallels in the Greek, Illyrian and other Indo-European, Mediterranean, and Etruscan religion will be mentioned. Seminar includes reading the selection of text and preparing a presentation of a particular myth. Students are required to: prepare the texts, present the given myth and pass the exam after the semester is over.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History -> Dual-major studies (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

ECTS Credits 3.0

Semester Winter/Summer

English Level L2

E-learning Level L1

Study Hours
15
15

Grading

Parts of the final evaluation are:
attendance, preparation and presentation of specified tasks, achievement on written and oral exam. It is necessary to present a paper before the exam.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Enumerate most important features and deities of Greek and Roman religion
2. Recount the most famous myths of ancient Greece and Rome
3. Recognise religious elements and allusions in the works of classical and Croatian latinist authors
4. Understand the religious background of classical texts, as well as the beliefs and customs mentioned in those texts
5. Produce a translation and critical commentary of a Latin text in regards to religion

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Interpret various cultural, social and political phenomena

Describe the features of the humanities and their interdisciplinary aspects

Apply basic techniques of correct logical reasoning and conceptual analysis

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Determine the position and importance of humanities in the general structure of science

Evaluate philosophical concepts, arguments and theories

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Recognize the needs and willingness to engage in lifelong learning

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

Croatology

Explain and analyze the components of Croatian culture and their connection

Describe, classify and explore Croatian archeological heritage

Describe, classify and explore Croatian art, music, theater and film arts

Justify and support the need and willingness for lifelong education

Recognize, describe and argue the influence of European and world literature on the Croatian Literary Canon

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Generate and conduct historical and other types of discussions

Identify important historical figures from different periods of European history

Single out historical processes and explain their topic of interpretation

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

History

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Plan the search of literature, databases and other sources of information

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the need for lifelong learning and professional development

Sociology

Create an effective research plan

Use sources of scientific information

Critically judge the current social situation

Recognize the social specificities of Croatian society

Compare different social phenomena in different cultures

Greek

185331

Lecturer

prof. dr. sc.
Šime Demo

Course Description

The course objective is to (1) introduce students to basic grammatical forms of

ancient Greek language; (2) provide an overview of ancient philosophical terminology; (3) Explain the influence of ancient Greek philosophical terminology on Latin and Croatian; (4) allow Comparison of philosophical terminology in Old Greek, Latin, Croatian, English and German language.

Study Programmes

- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*latin or greek, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the rules of correct reading and accent on ancient Greek text
2. Explain and understand ancient Greek philosophical terminology
3. Define the development of philosophical problems on the example of the development of philosophical terminology in Old Greek, Latin, Croatian and other languages
4. Show the linguistic and content influence of ancient terminology on Croatian scientific terminology
5. Analyze a simpler sentence in ancient Greek
6. Identify the basic grammatical forms and structure of the ancient Greek sentence

ECTS Credits	5.0
Semester	Winter/Summer
English Level	L1
E-learning Level	L2 (10%)
Study Hours	15 45

Grading

Based on attendance and activity during class, solving home exercises and through colloquia and oral exam.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods
Analyze the basic assumptions for scientific understanding of the world
Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them
Interpret various cultural, social and political phenomena
Judge the position, importance and relevance of one's own culture in creating personal and national identity
Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition
Determine the position and importance of humanities in the general structure of science

Greek Influence on Roman Culture

86146

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

The goal of this course is to introduce students to introduce the students to basic aspects of Ancient Greek culture, from Minoan to Roman times. This gives them insight to the influence that the Greek culture exerted on the Roman, extremely profoundly in almost every aspect of life. Students will be acquainted with these influences through the lectures as well as by text examples read during the class. Obligations of the students include: regular attendance, preparation and discussion of selected texts and passing the exam after the semester has finished.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*fil (17084) - elective general foundation courses, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours
15
15

Grading

Student will be evaluated according to the accomplishment on his final exam (in writing and oral), as well as according to the regular attendance and participation during classes.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish the original Roman aspects from the Greek influence in the everyday life of Romans.
2. Describe a day in a life of a certain Greek's class (rich man, slave, woman...).
3. Indicate the areas of most profound influence of Greek culture upon the Roman.
4. Describe the functions, characteristics and specialties of certain aspects of Greek life (army, politics, religion).
5. Identify the Greek terms and transcribe from alphabet to Latin script and vice versa.
6. Explain the importance of Greek culture in the development of the Western civilisation.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Interpret various cultural, social and political phenomena

Differentiate most important periods of the history of philosophy and their respective philosophical schools, individual philosophers and their works

Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics

Describe the features of the humanities and their interdisciplinary aspects

Apply basic techniques of correct logical reasoning and conceptual analysis

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Determine the position and importance of humanities in the general structure of science

Evaluate philosophical concepts, arguments and theories

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Recognize the needs and willingness to engage in lifelong learning

Prepare and construct work assignments in the interdisciplinary field

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Explain and analyze the components of Croatian culture and their connection

Describe, classify and explore Croatian archeological heritage

Describe, classify and explore Croatian art, music, theater and film arts

Justify and support the need and willingness for lifelong education

Mark, explain and interpret the role of exact sciences in the history of Croatian culture

Recognize, describe and argue the influence of European and world literature on the Croatian Literary Canon

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

History

Identify historical facts and processes from European and national history

Name and describe individual historical periods

Express (in your own words) basic historiographical facts about world history

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Plan the search of literature, databases and other sources of information

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the need for lifelong learning and professional development

Sociology

Use sources of scientific information

Critically judge the current social situation

Present research results regarding particular social phenomena

and issues to a specialist and non-specialist audience alike
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application
 Compare different social phenomena in different cultures

General Competencies

Students will be able to compare the authentic Roman features of the everyday life and culture with its Greek counterparts. They will be able to describe the characteristics, functions and specialties of the various aspects of Roman society. They will be able to compose the scientific works regarding both Greek and Roman world view in the various areas of culture, and to recognise the influence of Greek culture in the works of the Roman literature that they shall study throughout their education and work.

Week by Week Schedule

1. Introductory class on the location of Greece and its history, especially the Mycenaean period and the alphabet.
2. The greatest Greek influence is evident in the Roman religion, and that is the subject of this class. We examine the most important beliefs, customs and deities.
3. Everyday life of Greeks: housing and customs.
4. Greek education: conditions, subjects, materials ...
5. Organisation, equipment and the tasks of Greek army, especially the Spartan one.
6. The everyday life of the Greeks, their dressing and food customs (e.g. symposia).
7. The political systems of Greek 'poleis'.
8. The "underdog" classes: women and slaves; comparison of their positions in Greek and Roman society.
9. The overview of the Greek literature, an area with influence as big as that of Greek religion or greater, with special focus on the works that influenced the Roman authors.
10. In continuation from the preceding class, we discuss the Greek philosophy and rhetoric and the influence it exerted on the Romans.
11. Greek colonisation enabled the contact between the Romans and the Greeks, and expanded the Greek culture throughout the Mediterranean world, as well as the coasts of the Black Sea and further. We also deal with the economy of the Greek and Roman civilisation.

12. We examine the contribution of Greek science to the Western civilisation, as well as the adaptations of the Roman calendar in the time of Caesar.
13. The various pastimes of the Greeks, especially festivities, such as Olympian games, dramatic festivals etc.
14. Greek art and architecture and its influence on the Roman, mentioning the most important artists and their works.
15. Summation class: review of the data acquired during the semester and resolving certain problems (according to the students' needs.)

High and Popular Culture in Croatian Literature

117209

Lecturer

prof. dr. sc.
Dubravka Zima

Course Description

Introduce the students to the theories of popular literature and popular Croatian literature. Distinguish the high from the popular.

Study Programmes

- » Croatology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective courses, 4th semester, 2nd year*)
- » Croatology (Studij) (*elective courses, 6th semester, 3rd year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the difference between the high and the popular in literature;
2. Explain and support with arguments the concept of popular culture in relation to canonical culture;
3. Explain and give examples of the popular Croatian literature;
4. Write their own short academic text that will demonstrate elementary academic literacy.

Study Programme Learning Outcomes

Dual-major studies

Croatology

Explain and analyze the components of Croatian culture and their connection

Recognize, describe and argue the influence of European and world literature on the Croatian Literary Canon

Sociology

General Competencies

Define the difference between the high and the popular in literature. Explain and provide an argued interpretation of the concept of popular culture in relation to canonical culture.

Historical demography

194400

Lecturer

doc. dr. sc.
Wolffy Krašić

Course Description

The objectives of the course are to familiarize students with the importance of historical demography, to provide an understanding of the basic demographic concepts and processes that have taken place in the population in the past, and to present the possibility of interpreting historical processes based on historical sources.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define social and economic relations in the past through the prism of historical demographics
2. Develop writing and presentation skills for seminar work
3. Describe the basic processes of population demographic development in the past;
4. Recognize the basic concepts of historical demographics
5. Use basic literature and sources to study population history

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Develop a critical attitude towards statistical data and literature

Course Description

The course goal is to familiarise you with the basic paradigms of the Croatian culture and art from the middle ages to the present day. So, during this course, you will get some knowledge and be able to recognize the most important cultural-historical facts about Croatia. These facts include basic knowledge about the origin of Croats and Croatian Glagolitic script. After that, you will learn about Croatian history including main events and influential people in cultural, social and political life. The oldest written texts, monuments and architecture will be presented to you using maps and other similar material. In the next step, you will be able to recognize some of the most important paintings of Croat painters, sculptors and architects. In the third step, the most important scientists, philosophers and writers will be presented to you. You will be able to also recognize some of specific art styles across Croatian cultural heritage.

History of Croatian Sociology

172543

Lecturer

prof. dr. sc.
Renato Matic

Course Description

The history of Croatian sociology is comparative-analytical and reflexive historical and sociological discipline that deals with the reconstruction of the social circumstances that have influenced the formation and development of sociology in Croatia, examines the process of its institutionalization and theoretical and empirical development, provides an overview of sociological heritage (typology of ideological orientations and theoretical directions of its main representatives, founders of special sociology), and evaluate their scientific relevance and contribution with regard to contemporary Croatian society and recent sociological research.

Reconstruction of the social circumstances means exploration of political, economic, cultural and social changes of the Croatian society of the period of formation of sociology in Croatia up to the present day.

In addition to the application of knowledge in the specific fields of sociology (sociology of Croatian society, systematic sociology, sociology of knowledge and science, social history of ideas, sociology, sociology), involves the use of additional scientific fields (history, ethnology, political science, law, economics, literature). In this sense is reflected in the general education function of the object.

History of Dubrovnik and the Dubrovnik Republic 214655

Course Description

Introduction to specific components of the history of Dubrovnik, its basic economic, political, social and cultural peculiarities and processes. Pointing out the importance of the Adriatic-Balkan and Mediterranean area in the context of Croatian medieval and modern history. Studying relevant literature.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the historical and geopolitical preconditions and peculiarities of the origin and development of the Dubrovnik Commune, later the Republic.
2. Analyze the key social and economic processes that led to the rise of the city-state.
3. Compare the order in the Republic of Dubrovnik with neighboring states and empires.
4. Interpret the reasons for the centuries-old success of Dubrovnik politics and diplomacy.
5. Analyze the economic rise, especially maritime affairs as the foundation of the Dubrovnik economy.
6. Evaluate the importance of the Republic of Dubrovnik as a Croatian historical affirmation.
7. Classify the components of political power and social strata in the Republic of Dubrovnik
8. Explain the influence of the Republic of Dubrovnik on the Adriatic and Mediterranean Seas

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Identify historical facts and processes from European and national history

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

The final grade is composed of the results of the written examination and the evaluation of the students' activities during the lecture.

History of Media Communications in Croatia

28467

Lecturer

Mario
Stipančević,
nasl. izv. prof.

Course Description

The course will enable students to understand the phenomena and concepts crucial to the development of journalism and the role of the media in the Croatian past. An overview of the development of journalism will enable an analysis of the link between socio-economic development and the emergence of journalism and the role of the media in political development. Reflections will be encouraged on the role of the media in society and the conditions that must be fulfilled for the media to play the role of "Fourth Estate". The aim of the course is to give students an account of the chronological sequence of the historical development of the Croatian media from the time of printing the first newspapers in Croatia to the appearance of radio and television as new media.

Study Programmes

- » Communication Studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain most important turning points in history of Croatian journalism.
2. Identify the connection between journalism and social development.
3. List the most important newspapers and historical figures that have been marked by Croatian journalism in history.
4. Explain examples of the influence of technological and social development on journalism.
5. Explain the role of media in Croatian society throughout history.
6. Identify the challenges of new media and their interdependence with social development.
7. Assess the position of media in modern society in the historical context.
8. Explain the importance of understanding social processes in the Croatian past.

Study Programme Learning Outcomes

ECTS Credits	4.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Grading

Attendance, required reading and taking part in discussions with professor and the colleagues (25% of the final grade), student paper (25% of the final grade) and exam (50% of the final grade).

Prerequisites

Media and Communication History

Prerequisites for

Republic of Croatia:
Information Systems

adherence to the principles of academic integrity and ethical norms of research and publishing
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Recognize and compare the peculiarities of individual media

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Present knowledge about journalism, public relations, communications and society using different communication methods

Apply social science methods and identify research topics suitable for journalism, media, public relations and communications research

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of journalism;
 Specify and explain key events and processes in the history of Croatian media communication or journalism,
 explain and analyze political, social and economic turmoil and their influence on the development of journalism in Croatia,
 knowledge of and application of fundamentals of usage of historical materials in Croatian libraries and archives,
 application of basics of scientific and media presentation of research results.

History of Modern Cities

223534

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

Get an overview and insight into the complexity of modern cities and urban society through selected examples of Croatian cities, always placed in the context of European phenomena of urban development. The expansion and development of cities was one of the most visible factors of modernity in the 19th and 20th centuries. In this course, students will learn about social changes and urban processes in the 19th and 20th centuries: the relationship between the city and the environment, the construction of cities, population growth, housing issues, the definition and experience of urban space, cities as places of power and, more generally, the political, cultural, social and economic features of the development of modern cities, using the example of Croatian cities, but always in the context of European and world cities. In this way, students will become familiar with various methodological approaches to the history of the city in general and contemporary methods of urban research.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the interdisciplinarity of history and its relevance to other fields of knowledge and to promote a set of moral, social and cultural values.
2. Analyze different information and viewpoints and critically evaluate the credibility of claims, assumptions, and arguments communicated through various media.
3. Describe the historical facts and processes of national, European and world history and their interpretive issues.
4. Explain and analyze the phenomena, processes and structures that make up modern cities using selected examples
5. Apply modern methods of historical science in researching the history of cities
6. Apply the knowledge and skills acquired in this course to other similar research problems
7. Reproduce the knowledge about urban and social changes in the 19th and 20th centuries and compare and analyze them

History of the Croatian Standard Language

188081

Lecturer

prof. dr. sc.
Mario Grčević

Course Description

The main objective of this course is to provide the students with a comprehensive description of the history of Croatian standard language in one place. In order to obtain an integral image of this phenomenon, the students will firstly adopt basic concepts of the theory of standard language with a special emphasis on the delimitation of concepts of literary and standard language. History of the Croatian standard language will be accessed in two ways: from the perspective of the so-called external linguistic history and from the perspective of internal linguistic history. The students will see the developmental path of Croatian standard language, while the main emphasis will be on the Croatian philological production over the centuries, as well as the basic features of development of language standards (grammatical, lexical and graphic). Through compiling seminar papers, the students will be encouraged to explore the abundant literature in this area, to an interdisciplinary approach to the problems of the history of the Croatian standard language, as well as applying the knowledge acquired through their education.

How Language Works: Introduction into Pragmatics 228390

Lecturer

prof. dr. sc.
Šime Demo

Course Description

This course deals with the relationship between language and its context. Whatever we say or write has an incomplete meaning until it is embedded into a concrete situation (e.g. time, place, goal, previous events, participants). By acquiring basic notions of pragmatic theory and analysis, we shall learn how people complement the said or written words with contextual information and in this way obtain the complete message. Through discussion and workshops, we will become aware to which degree our everyday communication depends on the context, but also how manipulating the relations between linguistic and extralinguistic reality is crucial for domains such as humour, advertising, and political polemics. We will learn how people coming from different cultures frequently understand the same utterances in different ways. Through the speech act theory we will observe the ways in which, if certain conditions are met, language can modify reality. The theory of politeness will show us how language helps shape hierarchical social relationships.

Knowledge of pragmatics will enable a better understanding of the mechanisms of verbal communication, which will help us build our own language and a critical approach to everything we hear or read.

Study Programmes

Human Rights

177435

Lecturer

izv. prof. dr. sc.
Vanja-Ivan
Savić

Course Description

The goal of the course is to acquaint the students with the historical development as well as political and philosophical foundations of human rights, the main concepts, ideas and controversies of the discipline, as well as the international, regional and national systems of human rights protection, so that they could apply in practice the knowledge gained. That way, the students will be encouraged to work for the promotion and the protection of human rights in their daily and professional lives.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

- » Sociology (Studij) (*elective courses 1., 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic human rights
2. Explain the basic theoretical concepts of human rights
3. Distinguish the different human rights theories
4. Identify and analyse violations of human rights in practice, its causes and consequences

5. Evaluate different human rights policies and practices
6. Apply innovative solutions to the problems in human rights theory and practice and reconstruct traditional canon of human rights
7. Argue the importance of the values of dignity and equality, the basic values of human rights

Hungarian History

38069

Lecturer

doc. dr. sc.
Ivana Jukić
Vidas

Course Description

The course objectives are to describe Hungarian past and relate it to the history of neighbouring countries and European history in general. Due to the fact that Croatia was in centuries long political union with Hungary, course will analyze and compare histories of both countries and demonstrate how they influenced each other and created perception of the Other.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)
- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 1st semester, 1st year*)
- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 3rd semester, 2nd year*)

- » History (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain complexity of Hungarian past from 9th to 21st Century.
2. Define major issues of the Hungarian past shaped by its geographic position.
3. Relate events and persons important for Hungarian past.
4. Explain cause and effect relations of different events within Hungarian past.
5. Demonstrate how different processes were conditioned by Hungarian geo-political status.
6. Compare events in Hungarian past with Croatian experiences.
7. Evaluate contributions of Hungarian culture to European civilization.

Study Programme Learning Outcomes

Identity of Molise Croats

214021

Course Description

To acquaint students with the origin and historical aspects of the emigration of Molise Croats.

Present and point out to students the role and importance of language, traditional culture and community in order to preserve the identity of the community.

Show students what traditional culture and heritage are (language, religion, customs, dress, diet, handicrafts, music, etc.) and

to confirm on the example of Molise Croats how certain elements of traditional culture and heritage affect the creation and preservation of identity

values of the whole community.

To teach students about the connection of the emigrant community with the home country.

To point out to students the total wealth of emigrated Croatia on the example of numerically small emigrant communities.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain basic concepts such as culture, traditional culture, identity, diaspora and language-speaking characteristics.
2. Explain the causes of the emigration of Croats to Italy from the XV. century and connect with the socio-historical context of the time.
3. Recognize the most important features of the identity of Molise Croats and understand their significance in the context of European policy on minority languages and cultures.
4. Compare the Molise-Croatian community with other communities of Croatian emigrants in terms of its formation and possibilities of survival
5. Recognize the importance of the diversity of minority communities and cultures.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

ECTS Credits 2.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

Attendance and discussion in class, seminar paper and written and oral exam. In addition to the classic ways of following through the lecture. exams, interviews, tests, etc. are especially valued independent research papers and through mentoring raised to the level of possible student appearance at scientific and professional conferences or publication in appropriate journals. It is a special motive for students in developing independence and in affirming their cognitive power. In this way, students can publish and create preconditions for future work and employment in research teams during their studies.

15. 15. Closing lecture.

Independent State of Croatia

214680

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

The Independent State of Croatia (NDH) is an integral part of Croatia's past, which has so far been a one-sided and not clearly presented topic. Although this topic is constantly present in the Croatian public, it is not specifically addressed on the basis of original documentation and relevant scientific literature. The aim of this course is to systematically inform, analyze and critically address various aspects of NDH from a historical perspective.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the complex nature of NDH, a topic that continues to cause controversy and division in society today
2. Explain the short but substantively rich NDH period. An argumentative and critical approach focuses on developing an interest in understanding the nature of NDH.
3. Explain the position of the NDH in the context of European history
4. Explain the fundamental differences between NDH and other constituents on European soil of the period
5. Define the material learned through constant student-professor discussion
6. Explain the basic knowledge acquired that is important in modern democratic society

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Inferential Statistics

200127

Lecturer

Toni Babarović,
nasl. prof. dr.
sc.

Course Description

Introducing students to the basic concepts of inferential statistics and enabling them for statistical inference from sample to population, using basic parametric and non-parametric procedures; Explaining Central Limit Theorem and its implications on calculation of confidence intervals for μ , as well as on various forms of t-tests and analysis of variance models. Generating students adoption of statistical power concept, its importance, determinants and calculation in various test situations. Generating students systematic insight in prerequisite assumptions of specific inferential test and analysis of variance models and their application in proper choosing of parametric/nonparametric procedures for statistical hypothesis testing. Training the students skill for autonomous usage of parametric/non-parametric statistical tests for central tendencies measures, dispersion measures or correlation. Preparing students for critical analyzing of professional and scientific texts employing the basic inferential statistics procedures.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish statistical from non-statistical inference
2. Interpret and use one-tailed and two-tailed statistical hypothesis testing;
3. Generalize the basic logic of rejecting and not rejecting the null hypotheses (H_0) at t-test on all other tests (F, χ^2)
4. Reproduce derivations of test statistics and the characteristics of related theoretical distributions
5. Identify prerequisite assumptions of specific inferential tests and by using them properly decide to use or not the specific test.
6. Explain the errors in statistical testing and the importance of statistical power concept; apply parametric and non-parametric statistical procedures for testing the hypotheses on central tendency, dispersion and correlation measures.
7. Calculate the confidence interval for central tendency, dispersion and correlation measures.
8. Apply ANOVA models (one-way, two-way and repeated measures) to empirical data and test the accuracy of hypotheses using a computer program

Grading

Class attendance - up to 12% of the course grade;
Quiz tests - up to 23% of the course grade;
Two mid-term written tests - up to 39% of the course grade;
Oral exam - up to 26% of the course grade;
Additional points- up to 5 % of the course grade.

Prerequisites

Descriptive Statistics

Prerequisites for
Differential Psychology
Experimental Methods

9. Evaluate advantages and limitations of specific hypotheses testing procedures applied in solving a research problem, and evaluate the selection of the most appropriate procedure.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

General Competencies

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Forms of Teaching

- » Predavanja
 - » Two hours per week
- » Auditorne vježbe
 - » Two hours per week

Week by Week Schedule

1. Introduction to Inferential statistics course syllabus; Probability sampling, kinds of samples and sampling distributions; Parameters and statistics; Basic logic of statistical hypotheses testing; Null-hypothesis (H_0) and alternative hypotheses (H_1)
2. One-tail and two-tail H_0 testing: normal and other sampling distributions; Central Limit Theorem; z- versus t- distribution at H_0 testing on mean; Confidence interval for μ
3. General assumptions on t-test between two means; Dependent samples t-test: definition, research frame, H_0 , sampling distribution. Testing procedure in dependent samples t-test (small and large samples).
4. Independent sample t-test: definition, research frame, H_0 , sampling distribution. Assessment of standard error of mean difference (small and large samples) in relation to homogeneity of variance (Behrens-Fischer problem)
5. Confidence intervals for mean differences and variance; Type I, and Type II errors in statistical tests; Introduction to statistical power.
6. Statistical power calculation for 1 sample mean, for difference between two independent sample means, and for difference between two dependent sample means; Pearson correlation hypotheses testing. Testing the hypotheses on difference between two Pearson rs (dependent and independent samples).

7. Statistical power at Pearson r . Hypotheses testing on: (i) linear regression coefficient, (ii) difference between two linear regression coefficients, (iii) multiple correlation and multiple regression coefficients, (iv) partial correlations, and (v) other alternative correlation coefficients (point-biserial, biserial, and rank)
8. χ^2 -distribution and χ^2 -test: definition and importance; χ^2 -test at one-way classification (inductive derivation, H_0 , general formula, calculation). χ^2 -statistic and prerequisite assumptions.
9. χ^2 -test at two-way classification (typical situation, H_0 , general formula, calculation); Contingency tables 2x2 and Yates correction. Discussion on minimal f t and one-tail/two-tail H_0 testing. Contingency coefficients (C , Φ , Φ_c).
10. Non-parametric tests for two samples (independent and dependent): Run test, Siegel Tukey test of variability equivalence and Wilcoxon Matched Pairs
11. Non-parametric tests for three or more samples (independent and dependent): Kruskal-Wallis test, Cochran Q test, Friedman's Rank test.
12. Definition and uses of ANOVA. Central Limit Theorem and the fundamental logic of a one-way ANOVA for independent samples. Assumptions and sources of variance in one-way ANOVA for independent samples. Sum of squares and degrees of freedom (total, between groups and within groups). F-ratio and operational calculation of one-way ANOVA.
13. Two-way ANOVA for independent samples: definition and reasons for its introduction, basic concepts, assumptions, sources of variance and dividing up the variance, calculation of the sum of squares and degrees of freedom.
14. Repeated measures ANOVA: key features and differences compared to the ANOVA for independent samples. Logic of the Repeated measures ANOVA and dividing up the variance. The calculation of the Repeated measures ANOVA (sum of squares, degrees of freedom and F-ratio). Assumptions for Repeated measures ANOVA.
15. Test.

Innovation Society

239920

Lecturer

prof. dr. sc.
Miljenko
Šimpraga

Course Description

To acquaint students with the importance of innovations and creations in the development of the economy and society as a whole. Also, point to innovation as the third mission of public universities, which are today the biggest innovation centers in the Republic of Croatia, especially the University of Zagreb. One of the objectives of the course is to point out that the development of society today is based on an innovative economy, which in the developed societies of the world is based on research, innovation and the transfer of knowledge and technology from universities, institutes and research and development centers to the economy. A special goal is to introduce students to the protection of intellectual property as one of the important elements in the commercialization of innovations. And finally, to acquaint the students with good practice examples of how innovations can be commercialized at the university, but also to the development of economic entities that operate successfully on the domestic and international market based on innovative products.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain innovation and innovation ecosystems
2. Explain the importance and role of innovation in the development of the economy and society as a whole
3. Explain the importance of innovation development at Croatian universities
4. Explain the complexity of the system from idea, through innovation to commercialization
5. Explain the fundamental determinants of the creation of a plan and strategy for the development of innovations in the Republic of Croatia
6. Identify basic knowledge about intellectual property
7. Identify intellectual property protection procedures
8. Develop the ability to work independently and as a team in innovative projects

Integration of Croatia with its Diaspora

226639

Lecturer

izv. prof.
Mirjana
Milićević

Course Description

Identify and compare the theories and models of diaspora integration with its homeland and relate these to the Croatian context.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and compare the theories and models of integration and apply them in the Croatian emigrant context.
2. Explain concepts relating to the social, cultural, educational and financial potential of utilising transnational spaces.
3. Identify and compare the theories and models of transnational virtual social communities.
4. Identify and compare transnational processes and practices.
5. Explain, analyse, apply and find similarities and differences between the ideas and concepts of world models relating to diaspora policy, cultural tourism and diaspora, health tourism and diaspora for the potential integration of Croatia with its diaspora.
6. Identify patterns and create new ideas for Croatia's integration with the Croatian Diaspora

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop a sense of security and correctness in the research process in order to prove the conditionality of the population, emigration and economy

Develop a critical attitude towards statistical data and literature

Integrative Bioethics

214015

Lecturer

doc. dr. sc.
Matija Mato
Škerbić

Course Description

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the subject and methods of bioethics
2. Explain certain bioethical topics
3. Apply bioethics methodologies
4. Analyze, argue and orient in the key dilemmas of modern humanity
5. Compare and weigh options in moral dilemmas in professional and public life
6. Apply bioethical methods and insights for competent participation in the work of ethical and bioethical bodies

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Demography and Croatian Diaspora

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

ECTS Credits 2.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

The final grade is a combination of grades from seminar work, oral examination and assessment of the quality of participation during the classes.

15

Grading

In addition to regular and active participation in lectures, students will present certain teaching contents within the framework of seminar obligations, individually and divided into smaller working groups: shorter thematic contents (study of sources-literature). Part of the teaching duties will be realized by the students in field classes (selected examples). After the realization of larger teaching units, the success will be evaluated through a colloquium, the results of which, together with seminar obligations and field teaching, will be an integral part of the final exam.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, recognize and apply the basic terms of intercultural pedagogy (multiculturalism/interculturalism, intercultural upbringing and education, ethnocentrism-ethnorelativism, prejudices, stereotypes, cultural relativism, intercultural curriculum...)
2. Compare and analyze the most important approaches to interculturalism (holistic, anthropological, sociological)
3. Explain the fundamental characteristics of intercultural education and (co)construction of intercultural curriculum
4. Explain the importance of intercultural upbringing and education for working in multicultural environments (schools/teaching)
5. Apply intercultural curriculum in school/teaching and upbringing and education for diversity, equality and social justice
6. Explain research approaches in intercultural upbringing and education

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Interpret various cultural, social and political phenomena

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Determine the need for lifelong learning and professional development

Communication Studies

Croatology

Justify and support the need and willingness for lifelong education

History

Psychology

Evaluate basic content from complementary social, humanistic and biomedical disciplines.

Interlingual features and structure of the Croatian language 190408

Lecturer

Bojan Marotti,
nasl. izv. prof.
dr. sc.

Course Description

The Croatian cultural space is a meeting point for different peoples, cultures, and even pleasures, and thus a multi-millennial space for touching a range of languages.

The Croatian people were in multi-ethnic communities or governed by different peoples whose languages were thus in strong contact with the Croatian. In these connections and touches, the Croatian language was an active recipient as well as an influencer. Students will become familiar with Croatian international contacts with other nations and countries in the context of linguistic influences.

Study Programmes

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours

15

15

Grading

Active monitoring of teaching. Research and presentation of seminar work. Oral exam.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate terms: egzonim, eponim, izmjjenica, međunarodnica, novotvorenica, oživljenica, posuđenica, prevedenica, prilagođenica, prihvaćenica, smjenica, tuđica, tvorenica, usvojenica, zamjebenica, zastarjelica
2. Differentiate terms: Anglicisms, Bohemisms, Gallicisms, Germanisms, Greekisms, Hungarianisms, Latinisms, Orientalisms, Ruteisms, Serbianisms, Italianisms and Turcisms
3. Analyze how the language influenced the structure of the Croatian language, or to which lexical and articulatory fillings it contributed: for example Greek and Latin - toponomastics, scientific and vocational terminology (international), which are contemporary English influences in the scientific terminology of modern electronic technologies
4. Develop a creative approach to the Croatian language
5. Analyze and adopt a good basis for mastering the remaining linguistics courses in the study of croatology

Study Programme Learning Outcomes

Dual-major studies

Introduction to Artificial Intelligence

227468

Lecturer

izv. prof. dr. sc.
Sandro Skansi

Course Description

Introduce the student to topics related to artificial intelligence (through the paradigm of deep learning), its foundations, applications, and challenges.

Learn to present the basic ideas of deep learning and develop basic artificial intelligence systems independently, as well as define the tasks that are currently posed to artificial intelligence.

Be able to precisely define the individual's relationship to artificial intelligence technologies and their role in society, as well as identify problems related to the security of artificial intelligence and its potential misuse, with an emphasis on ethical issues related to the security challenges of today's artificial intelligence.

Learn the basics of deep learning with Python (Anaconda distribution), from the fundamentals of Python to the implementation of a multi-layer artificial neural network that recognizes handwritten numbers.

- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Argue and rationally defend one's own philosophical understandings.
2. Evaluate interdisciplinary and take into account different scientific methodologies and views on special issues and problems of artificial intelligence.
3. Explain and judge the justification of various theoretical and practical proposals, respecting the peculiarities of various areas of life and work environments.
4. Use critical thinking and structural formal thinking
5. Assess the role of artificial intelligence and deep learning in society.
6. Evaluate security aspects and possible abuses of deep learning.

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Critically review different theories

Describe the features of the humanities and their interdisciplinary aspects

Evaluate philosophical concepts, arguments and theories

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Determine the need for lifelong learning and professional development

Introduction to Clinical Psychology

38645

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Course objectives: Introducing students with basic concepts of clinical psychology, teaching of the basics of clinical approach in psychology, differentiation and systematization of clinical interventions, presentation of the main ethical principles in the work of clinical psychologists, overview of the most commonly used methods of psychodiagnostics, critical thinking of the contemporary problems of clinical evaluation and psychotherapy, specification of abnormal behavior and perception.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and evaluate the criteria for defining normality.
2. Compare the field of clinical psychology with other areas of psychology and related disciplines.
3. Compare and analyze the differences and similarities between different theoretical systems in clinical psychology
4. Explain the specifics of the clinical approach.
5. Demonstrate the basic principles and methods of psychological assessment
6. Analyze and link individual clinical interventions
7. Evaluate areas of clinical psychologists' actions
8. Classify basic theoretical approaches and legality of psychological evaluation and counseling in different areas of applied psychology.

Study Programme Learning Outcomes

Psychology

Analyze the findings of psychological research in Croatia in the relevant cultural and social context and to recognize the possible peculiarities of the subject phenomenon for the Croatian population, in relation to other - European, or wider global - populations

Classify the basic theoretical approaches and laws of psychological assessment and counseling in different areas of applied psychology

ECTS Credits	3.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

The condition for acquiring the right to attend the exam is attendance at the lectures and a maximum of 3 absences will be allowed. Students can pass a written part of the exam by passing both sessions. For passage to the colloquy, more than 52% of the correct response is required. Students who do not wish to attend the colloquia, as well as students who are not satisfied with the success of the colloquia, will take a written exam. Students are also required to access the oral exam, which corresponds to essay type questions.

Assess mental status and classify diagnostic criteria for different psychological disorders

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

General Competencies

6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.

7. Assess the mental status and classify the different diagnostic criteria for mental disorders.

15 % class attendance, 25 % participation in the discussions, 60 % colloquium and / or final exam.

Prerequisites for Semiotics in Mass Communication

4. Evaluate the effects of communication on different areas of human activity;
5. Create different persuasion strategies and analyze their effectiveness;
6. Relate the functioning of interpersonal communication in different contexts;
7. Analyze critically media content and new media communication facilities;
8. Argue the reasons why it is necessary to know the dynamics of communication in everyday and business environment.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Critically review different theories

Evaluate philosophical concepts, arguments and theories

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

Croatology

Adhere to linguistic, spelling and stylish norms of the Croatian language in the academic and non-academic discourse

History

Formulate and orally present knowledge about historical processes and data

Critically judge one's own work and defend one's position in team work with arguments

Judge the social and ethical context of historical science with an

argumentative attitude and supporting clear principles of the subject science

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

Sociology

Identify the main actors of certain social processes

Use theoretical concepts in the analysis of society

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Students will become familiar with the anthropological, philosophical and communicology approach to the communication at all levels. They will especially be well versed to properly use verbal communication and learn to properly evaluate and interpret non-verbal communication in different social and cultural environments. Students will be able to use arguments to express the importance of knowledge of communicology and will develop skills of critical perception, presentation and analysis of modern communication and dynamic models, particularly in relation to interpersonal communication and communication through new media.

Introduction to Croatology

144284

Lecturer

izv. prof. dr. sc.
Davor Piskač

Course Description

Systematization of knowledge about the major aspects and developments in the Croatian culture of the Middle Ages until the 21st century

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*required course, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*fil (17084) - elective general foundation courses, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop an awareness of the historical journey of Croatian culture and the culture across the historical Croatian lands.
2. Analyze and direct: gain basic orientation in the field of the history of art (literature, visual arts, music, film).
3. Analyze and direct: gain basic orientation in the field of the history of scientific production (natural science, social sciences and humanities).
4. Develop the awareness of multicultural and supranational dimensions of the Croatian intellectual and material culture.

ECTS Credits 5.0

Semester Winter/Summer

Introduction to Developmental Psychology

37808

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Course content allows students to familiarize themselves with basic concepts and theories in the field of developmental psychology and acquire competencies for their description and differentiation. Students will acquire knowledge of different methodological approaches to human development studies and develop critical thinking when considering ethical research questions in the human population. They will also acquire basic knowledge of the normal and abnormal course of human development as well as implications for working with different age groups due to their specific development needs. Students will receive information on the developmental process from the prenatal age, with descriptions of major developmental tasks and changes in the biological, cognitive, social and emotional field of development.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	30

Grading

To complete the final exam and to form a final grade, it is compulsory to attend lectures, with a maximum of 3 absences. Students can pass a written part of the exam by passing both colloquia, each carrying 40% of the final grade. For passage to the colloquy, more than 52% of the correct response is required. Students who do not wish to attend colloquia, as well as students who are not satisfied with the success of the colloquy, have a written exam that meets the requirements of the colloquium conducted during the semester with the volume, content and the corresponding ECTS credits. Students are also obliged to access the oral exam, which corresponds to the essay type questions. The oral exam scores 20% of the final grade.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish development theories regarding their contribution to the explanation of human development and the utilization of scientific research methods.
2. Compare methodological approaches to scientific research in developmental psychology
3. Describe developmental changes during the breastfeeding period
4. Explain the course of physical, cognitive and socio-emotional development of children
5. Compare orderly development, individual differences in development and developmental difficulties in areas of physical, cognitive and social-emotional development in first two years.
6. Prepare proposals for organizing a stimulating environment and involving children in activities that will encourage their development
7. Interpret the impact of parenting on child development and the implications of early research results for working with children, parents and educators;

Study Programme Learning Outcomes

Introduction to Journalism

86089

Lecturer

doc. dr. sc.
Tamara Kunić

Course Description

The aim of the course is to familiarize the students with journalism, the characteristics and specificities of journalistic activity. Furthermore, they will become familiar with the journalistic profession and the role and functions of journalists, the tools and specific conditions of their work. The course enables the students to understand and use the basic concepts of journalism, both in theory and practice, and facilitates further study.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*required course, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*fil (17084) - elective general foundation courses, 4th semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the basic concepts of journalism.
2. Employ the fundamental concepts in journalism both in other courses in the study and in practice.
3. Distinguish and explain the different theories and theoretical approaches to journalism.

Introduction to Psychology and Theoretical Systems in Psychology

200121

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

The main objective of the course is to acquaint students with the development of psychology, psychological knowledge and thinking through considering and analyzing the development of paradigms and schools, shaped by theoretical systems or directions in psychology. Throughout the course, students will be provided a historical overview of the development of psychology as a scientific discipline (psychology and antiquity, philosophical and scientific roots of psychology), will be provided an overview of the basic theoretical branches of psychology (eg developmental psychology, social psychology) and provide knowledge-based competencies for critical analysis major "classical schools", theoretical systems in psychology, with an emphasis on the possibility of comparing and comprehending. Different branches of applied psychology and the specific jobs of psychologists in those branches will be presented.

Study Programmes

- » Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the historical development of psychology
2. Recognize the philosophical and scientific roots of psychology
3. Compare basic and applied fields of psychology
4. Describe and explain the meaning of the theoretical approach, the schools and the scientific paradigm in psychology.
5. Describe the contribution of a particular theoretical system and direction to the development of psychology and its contribution to particular contemporary topics being explored in psychology.
6. Analyze and compare the results of Croatian and foreign research in the field of development of psychology and theoretical systems in psychology, and to explain cross-cultural similarities and differences
7. Describe the basic characteristics of the different fields of applied psychology and the different work places of psychologists
8. Compare and analyze differences and similarities between different theoretical systems in psychology.

ECTS Credits	5.0
Semester	Winter

Introduction to Public Relations

28500

Lecturer

doc. dr. sc.
Davor Trbušić

Course Description

One of the objectives of the course is to introduce students with basic concepts of public relations: those concepts that should be abandoned as well as with the contemporary concept of public relations. The main goal of the course is to present the communication of organizations through contemporary model of public relations. Thus, after the main theoretical approaches, the course will bring students closer to the communication process of institutions and the rules that apply in this process to contemporary communication theories and research in the area of public relations. It is also one of the objectives of the course to encourage students' interest and increase awareness of ethical aspects of work in public relations.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the contemporary concept of public relations
2. Define the most important terms in public relations
3. Explain the most important communication theory relevant for public relations
4. Apply communication theory to public relations
5. Explain contemporary research in the area of public relations
6. Define managing process of public relations
7. Describe each phase of the public relations management process

» Students should study and analyze texts and research and then present them, explain them and link them to

public relations field and also encourage discussion about them:

European Communication Monitor 2016;
 Aristotel (1989.) Retorika, prev. M. Višić, Zagreb: Naprijed. (Str. 81-125.)
 Lippmann, W. (1995) Javno mnijenje, Zagreb: Naprijed. (Str. 65-117.)
 McCombs, M. (2014) Setting the Agenda,, 2. izd., Polity Press, str. 79-110.
 Noelle-Neumann, E. (1993) The Spiral of Silence: Public Opinion-Our Social Skin, University of Chicago Press. (Str. 175-219.)

Students should study and analyze one of the most important public relations associations, and then present them and stimulate debate on their role: Global Alliance, ICCO, PRSA i CIPR.

Week by Week Schedule

1. Overview of the course and class obligations, the concept and definition of public relations
2. Clarifying the terms: public relations / press agency / journalism / advertising / propaganda / marketing.
3. Current situation of the profession: profile of employees in public relations, employment, employers, education.
4. Current situation of the profession: overview of public relations by activities, role in public relations.
5. Historical development of public relations (US, Europe, Croatia).
6. The position of the public relations department in the organization; the difference between two types of managers; the difference between the internal, external and mixed structure of public relations.
7. Public relations as a scientific discipline; system theory: the difference between system and subsystem, the difference between closed and open systems.
8. Communication and public opinion: Lippmann and public opinion, Shannon and Weaver's communication model, Schramm's communication model in korrelation with the Cutlip and Center's model of public relations.
9. Communication and public opinion: the Theory of the Stereotype, agenda setting theory, spiral silence theory.
10. Communication and public opinion: situational theory of publics (Grunig).
11. P James Grunig's Excellence theory of public relations and the theoretical communication model of Luke Brajnović.
12. The first phase of public relations management according to Cutlip and Center: research.
13. The second phase of public relations management according to Cutlip and Center: planning.
14. The third phase of public relations management according to Cutlip and Center: action, basic types of techniques and tools.
15. The fourth phase of public relations management according to Cutlip and Center: Measurement.

Introduction to Scientific Research

37789

Lecturer

prof. dr. sc.
Mirko Lukaš

Course Description

Introducing students with basic principles of scientific work, developing critical thinking and introducing them to principles of reading scientific literature. The students will get acquainted with basic principles of scientific reasoning, basic components of scientific research and basic scientific methods in social sciences. They will also get introduced to the principles of writing the scientific paper and with ethical principles in scientific work.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish scientific and pseudoscientific approach.
2. Judge the question of causality in science.
3. Evaluate critically scientific papers and theories.
4. Analyze scientific methodology and fundamental elements of research process.
5. Assess dependent and independent variable in scientific research.
6. Distinguish research approaches, designs and methods.
7. Plan the control of relevant factors in experiment.
8. Prepare research report.
9. Appraise ethical questions in scientific research.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific

Introduction to Scientific Work

159876

Lecturer

doc. dr. sc.
Dario Pavić

Course Description

The aim of the course is to provide students with basic knowledge of science and scientific research, as well as enable them to make independent critical appraisal of scientific content.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17098) -elective courses (1 st year), 1st semester, 1st year*)
- » Sociology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and use the concepts of scientific theories, hypotheses, scientific methods and explanations in science, as well as contributions by authors such as Carl Hempel, Karl Popper, Thomas Kuhn and others.
2. Explain the key concepts and ideas in the text and their interconnections.
3. Recognize and avoid basic logic, rhetoric and statistical error in the argument.
4. Analyze the visual elements of a scientific paper (tables, graphs) and avoid common mistakes.
5. Prepare a summary and paraphrase the text read, and formulate a written argument with the evidence and topic sentence .
6. Prepare a formal draft of the research paper.
7. Distinguish types of scientific work and effectively analyze them.
8. Identify the topic eligible for scientific research and explain the stages of the research project.
9. Analyze the sources of scientific information.
10. Use techniques to format citations and scientific work in accordance with the requirements of the profession and publishers.

Introduction to Social Research Methods and Statistics 270490

Lecturer

izv. prof. dr. sc.
Ivan Burić

Course Description

The aim of the course is to provide insight into the proper conduct of social research methods and to train the students for the proper use, evaluation and interpretation of obtained data. The course objective is to introduce the students to the basic concepts in statistics and the techniques which are necessary for various applications in the field of communicology.

Study Programmes

- » Communication Studies (Studij) (*required course, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, describe and apply the basic methods of social research.
2. Apply the statistical literacy and methodological competences and realize their importance in the modern society.
3. Employ the basics of statistics in order to use the media on the reflexive and productive level.
4. Apply statistical thinking within the framework of an educational process.
5. Use a computer and basic statistical programs.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Organize individual and team work

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Apply methods of social research and statistics

Introduction to the Auxiliary Sciences of History 153264

Lecturer

doc. dr. sc.
Tomislav Popić

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L1
E-learning Level	L1
Study Hours	15
	15
	30

Course Description

The aim of the course is to introduce students to the basic skills of research (paleography, diplomatics, chronology, heraldry, seals, historical metrology, numismatics, genealogy, historical demography, geography historijska mapping, etc.) Introduction to fundamental skills of research and achieve insight into the technical knowledge and procedures particularly for work on medieval original material in archives, libraries, etc.

Grading

Evaluation of the active participation and preparation for classes, evaluated colloquium, seminar. The final exam is oral.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 2nd semester, 1st year*)
- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 4th semester, 2nd year*)
- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 6th semester, 3rd year*)
- » History (Studij) (*required course, 4th semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the most important sources of Croatian medieval history written in Latin language,
2. Describe the importance of the Latin script in its meaning for Croatian cultural identity,
3. Explain the origin and development of each of the Latin script
4. Identify developmental stages and main characteristics of each Latin script for dating the manuscript,
5. Analyze and transcribe manuscripts written in Beneventan script, Carolingian minuscule, Gothic minuscule and Humanist minuscule
6. Analyze public and private documents,
7. Explain different ways and styles when dating a medieval document,
8. Define the types and methods of sealing medieval documents,
9. Explain epigraphic inscriptions.

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Design and write research results about historical processes and data

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

History

Sociology

General Competencies

After finishing the programme student will be able to:
 tell what is the interpretation of history,
 demonstrate the importance of interdisciplinary interpretations of historical events,
 reconstruct historiographic tools in making conclusions of historical processes and events.

Week by Week Schedule

1. Introductory lecture
2. What is history? - Concept and content, creators of history: the old world and the Middle Ages, the emergence of modern erudition, erudition of the historical science (19/20 c.)

3. Palaeography: Greek, Roman and medieval Latin paleography (capital cursive minuscule, uncials, minuscule roman, italic letter, Beneventan, Carolingian, Gothic and humanistic minuscule)
4. The system stands: nomina sacra, notes iuris, abbreviation signs
5. Epigraphy: Greek and Roman epigraphy; role inscription in ancient period and the Middle Ages; epigraphic documents and history; contribution inscriptions historical science, and how to use the old labels
6. Cryptography (SECRET)
7. Diplomacy: historical development, general and special; document types (public and private); development office (Imperial, Royal, Pontifical, notary, loca credibilia)
8. Analysis of documents: the original, authentic copies, forgeries
9. Chronology - time and place in historical science: duration, rhythm and continuity; climate fluctuations, cycles and solar activity, calculation of the calendar, weather categories: short and long periods of time; Church liturgical calendar (Computus) periods, eras and styles
10. Sphragistic: Antiquity and the early Middle Ages, the technique seals, sealing manner; royal seal, physical and moral persons, modern navigation studying seals, stamps and postal stamps
11. Heraldry
12. Archival (general and specific)
13. Numismatics: the meaning of money in economics and sociology, life and death, money, typology, aesthetics and art history, and the history of money
14. Historical geography: identify sites; relationship geography and history; geohistory (historical geography), historical cartography (methods)
15. Historical metrology (old measures and weights)

E-learning Level	L1 (10%)
Study Hours	30

Teaching Assistant
Ivan Nađ, nasl. pred.

Grading

Preliminary exams replace the written exam, if passed successfully.

Course Description

Course objectives:

Introduce students to basic notions of Linear algebra, calculus, integrals and differential equations with applications to demography. Develop the ability of analytical and logical thinking.

Course content (syllabus):

1. Linear algebra. Matrices and types of matrices. Matrix operations. Determinants. Systems of linear equations. Applications to demography.
2. Differential calculus of one real variable. Real functions of one real variable. Limits. Continuous functions. Derivatives and computing derivatives. Increasing and decreasing functions. Convex and concave functions. Applications to demography.
3. Integral calculus. Indefinite integrals. Methods of integration. Definite integrals. Linear differential equations. Applications to demography.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply matrix operations to solve problems in demography.
2. Compute derivatives of functions of one variable.
3. Apply differential calculus of one real variable to solve problems in demography
4. Compute integrals.
5. Apply integral calculus to solve problems in demography
6. Solve linear differential equations.
7. Recognize problems in demography which can be modeled by using linear differential equations and solve them.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Illustrate the need for scientific studies on demographic and immigration issues

Use statistical, quantitative, graphic and geographic software packages

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Interpret data on Croatian and global population and emigration

Language and Style Practicum

130703

Lecturer

izv. prof. dr. sc.
Vladimira Rezo

Course Description

The aim of the course is to convey to the students the theoretical and practical knowledge of Croatian standard language with special emphasis on its polyfunctionality and on its use in mass media. Language will be viewed primarily from point of view of its functional, social, individual and territorial multifacetedness. The main part of the course will consist of the comprehension of grammar and linguistic norms of the Croatian standard language so that the students will later be able to apply them in their writing, but also in verbal communication.

Study Programmes

- » Communication Studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the main characteristics of the Croatian standard language
2. Identify functional styles present in Croatian standard language and their particular features
3. Select the appropriate language aids in solving linguistic and stylistic issues
4. Use linguistic norm of standard Croatian language
5. Distinguish between good and bad linguistic expression
6. Apply the knowledge in their written and oral communication

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Organize individual and team work

Recognize and describe Croatian language culture and use language skills in journalistic and proofreading jobs

Prepare and create different forms of presentations and seminar

ECTS Credits	6.0
Semester	Winter
English Level	L1
E-learning Level	L1

Latin

185332

Lecturer

prof. dr. sc.
Šime Demo

Course Description

Subject goals are adoption of basics of Latin phonology, morphology and syntax. On that way, the interested students will be prepared for a more extensive encounter with the grammatical structure of the Latin language as well as, in the end, with more complex Latin texts important for Croatian culture; To provide a review of Latin philosophical terminology, to explain the influence of Latin philosophical terminology on Croatian; to allow the comparison of Latin and contemporary English philosophical terminology. Enable students to independently study the Croatian philosophical heritage of Latin expression.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*latin or greek, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the rules of correct reading and accent on ancient Latin text
2. Recognize forms of Latin changeable word
3. Apply learnt vocabulary in translating of simple philosophical Latin text in Croatian
4. Analyze the correlation between words from the Latin sentence to the corresponding syntax structures
5. Explain basic philosophical terminology which appears in Croatian language
6. Analyze and understand textx from Croatian philosophical and latin heritage

Study Programme Learning Outcomes

Legal Aspects of Emigration and Return Migration 269751

Lecturer

doc. dr. sc.
Kristijan Turkalj

Course Description

Introducing students to the legal, social and political position of Croats outside Croatia in relation to their home country and the countries of their residence.

Students will also get acquainted with the forms of legal protection and foreign policy (multilateral and bilateral) and domestic policy (constitutional and legal).

obligations of the Republic of Croatia towards Croats outside Croatia and the promotion of their interests.

Consider the legal issues of emigration and returnees and train students for analytical and critical interpretation and evaluation of issues related to

legal protection of Croats outside Croatia in order to be actively involved in defining the social, political and legal context of their protection.

Acquire basic knowledge and develop skills on comparative legal forms and measures of return and immigration and mechanisms of demographic renewal

population by accepting and valuing emigration as a developmental factor.

Teaching Assistant
dr. sc. Danijela Rupčić

Grading

Class attendance and discussion, project development and defense and oral exam. In addition to the classic ways of monitoring through lectures, seminar papers, exams, interviews, testing and the like, independent research papers are especially valued and through mentoring they are raised to the level of possible student appearance at scientific and professional conferences or publications in appropriate journals. It is a special motive for students in developing independence and in affirming their cognitive power. In this way, students can publish and create preconditions for future work and employment in research teams already during their studies.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the status, rights and obligations of Croats outside Republic of Croatia, returnees and immigrants
2. Explain the international and national legal framework and areas of protection of Croats outside the Republic of Croatia, returnees and immigrants, legal documents and implementing acts in the field of protection of emigrant rights and obligations, rights and obligations of returnees and implementation of demographic measures and policies
3. Identify entities involved in the programming and implementation of legal protection of emigrants and returnees, in particular the bodies responsible for the implementation of protection policies for emigrants and returnees and their general and specific competencies
4. Describe political, diplomatic, economic, cultural, social, educational, informational, organizational measures and activities for the protection of Croats outside the Republic of Croatia and returnees.
5. Analyze the political rights, especially the active and passive suffrage of Croats outside the Republic of Croatia and the measures of their inclusion in the political processes in the Homeland.
6. Identify specific items and the most significant measures of budgetary and tax policy in relation to Croatian emigrants

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Compare the values of different methods used in expert-scientific research on population and emigration in planning and development services.

Week by Week Schedule

1. Introductory lecture
2. Legal sources for regulating the status and protection of emigrants and returnees
3. Domestic and foreign policy protection of Croats outside Croatia
4. Multilateral and bilateral agreements and the principle of reciprocity
5. Strategy and Law on Relations of the Republic of Croatia with Croats Outside the Republic of Croatia

6. Legal status of Croats outside the Republic of Croatia and acquisition of Croatian citizenship
7. Legal protection of Croats in Bosnia and Herzegovina - the role of the Republic of Croatia in the protection of their equality and constitutivity
8. Legal protection of Croatian minorities in European countries
9. Legal protection of Croatian emigrants in other countries
10. Institutions responsible for the protection of the rights of Croats outside the Republic of Croatia and the issue of return
11. Active and passive suffrage of Croats outside the Republic of Croatia and their inclusion in the social and political life of the Republic of Croatia
12. Croatian emigration as a development factor - legal, political and social aspects
13. Legal regulation of return issues as demographic measures
14. Comparative overview of the legislation of Ireland, Italy, Israel and Poland in the issues of protection of emigrants and definition of measures for exploiting their development potential
15. Legal status of returnees and immigrants; legal framework, measures and activities of return and immigration to the Republic of Croatia

Course Description

Introduction to sociologically relevant specifics of Croatian local communities and regions and their development potentials.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 1st semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce sociological knowledge about local communities and regions
2. Illustrate the skills to notice and critically evaluate the specifics of local communities.
3. Analyze knowledge of contemporary demographic, environmental and economic challenges facing the local community.
4. Analyze the basics of sociological subdisciplines (sociology of risk, sociology of space, social ecology).
5. Justify the selection of optimal methodological instruments for research of specific phenomena in local communities.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Sociology

Discuss social issues in Croatian society

Identify the main actors of certain social processes

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Critically judge the current social situation

Explain the elements of social inequality

Describe the concepts of sustainable development

Screening of student's work

Logic 2

214825

Lecturer

izv. prof. dr. sc.
Sandro Skansi

Course Description

Introduce the student to more complex logical topics, such as meeting theory, fuzzy and modal logic, induction formalizations and Turing machines. This introduces the student to both advanced methods in the logic and formation of language and with the basics of technology that defines today's society and culture. Special emphasis was placed on connecting logical topics with topics from other branches of philosophy and other logic of related sciences (linguistics, computing and mathematics). The College contributes to the development of critical thinking and structural formal thinking. It also contributes to the development of general logical-philosophical-methodological competences of students as well as to explaining advanced philosophical aspects of logic.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the adequacy of classical logic for the analysis of philosophical problems
2. Evaluate various nonclassical logics
3. Evaluate the possible formalizations of induction and machine learning
4. Evaluate the relevance of various logical formalisms
5. None
6. None
7. None
8. None

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

30
30

Grading

Two written exams and a final oral exam

Prerequisites

Logic 1

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods
 Create formal and informal fallacies in philosophical and non-philosophical discourse
 Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines
 Apply basic techniques of correct logical reasoning and conceptual analysis

General Competencies

After successfully finished course students will be able to (1) describe and interpret the philosophical (especially ontological) relevance of logical methodology, (2) apply the logical methodology in the treatment of philosophical problems like the relationship of truth and proof, objective world and abstract syntactic systems, scope and limits of mechanical procedures, the relationship between abstract and concrete objects etc.

Macrosociological Theories

269831

Lecturer

doc. dr. sc.
Marica
Marinović
Golubić

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems through the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Sociology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define social issues as research topics.
2. Evaluate different theoretical approaches.
3. Demonstrate conceptual basics of independent research.
4. Relate different approaches in solving of theoretical issues.
5. Modify and integrate actual social theories and write complex scientific papers.
6. Evaluate and judge critically and connect different theoretical approaches.
7. Show the importance of classical sociological theory teaching in its generality and specificity,
8. Synthesize learned through attempts of own contribution by writing written work, oral presentations, and setting up critical issues

Class attendance and participation in the course discussions are particularly taken into account, in addition to writing articles and the final written and oral exam.

Dual-major studies

Communication Studies

Communication Studies

General Competencies

Apply knowledge of the basic concepts of communication sciences and journalism related to the subject; Identify and describe the place and the role of journalism and mass media in society; Explain and critically analyze the acquired theoretical and practical knowledge; Identify, explain and analyze the situation, innovations, challenges, and issues in the media and journalism; Apply acquired journalistic skills in reporting for magazines and periodicals;

Week by Week Schedule

1. Introductory lecture: Introduction to the course content and duties and tasks - the layout of the course.
Seminar: Introduction: the questionnaire is handed out for the purposes of a quality individual work and progress. Writing an article without using the computer for the sake of a better insight into the current writing ability of each student.
2. 2nd lecture: General standards of journalistic writing - general presentation of writing rules in journalism.
Seminar: Individual work with each student on the questionnaire and an article in order to gain a better insight into the current state of a student's journalistic writing, and then determine thematic areas in which each student will create topics for an impromptu editorial board and write articles.
3. 3rd lecture: Differences between daily and weekly / monthly publications: differences in the way of work, approach and thematic content of the publications.
Seminar: Surveying weekly and daily editions and identifying important differences.
4. 4th lecture: The role and importance of the editorial board. What is an editorial board, what purpose does it have and what is expected of a young journalist?
Seminar: Understanding the psychology of the editorial committee and the work on the topic development. How to identify appropriate topics and how to present them?
5. 5th lecture: From the editorial staff to the final text: a piece of journalism from the editorial staff to a text that is ready for printing.
Seminar: Incorporating TEXT FEATURES (headline, title and subtitle).
6. 6th lecture: The writing style and language: the manner in which a text is written, the basic rules, what we must, and we should not do in the text. Special emphasis on writing in magazines and periodicals.
Seminar: Incorporating TEXT FEATURES (headline, title and subtitle).
7. 7th lecture: Text composition: the 5W rule, the importance of the first and last sentence, introducing new people and information, the sequence of events.
Seminar: Shortening the text to a preset size, adjusting it to the available newspapers space.

8. 8th lecture: Developing the topic in writing: setting, presenting research results, new insights, conclusion-making and commentary.
Seminar: Shortening the text to a preset size, adjusting it to the available newspapers space.
9. 9th lecture: Relationship towards information sources: personal contacts and responsibilities towards people from whom we receive information; written/tangible/sources; where and how to verify information.
Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
10. 10th lecture: Relationships and duties in the newsroom: the importance of cooperation with other colleagues in the newsroom.
Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
11. 11th lecture: Responsibility towards the editor, owner and reader.
Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
12. 12th lecture: Journalistic forms. Special reference to magazines and periodicals.
Seminar: Individual presentations of finished research projects and presentation of content.
13. 13th lecture: Establishing a journalist profile - professionalization: how journalists can improve their skills.
Seminar: Photograph selection and signing.
14. 14th lecture: Responsibility and ethics! The most common mistakes in magazines and periodicals.
Seminar: Photograph selection and signing.
15. 15th lecture: A visit from the chief editor of one of the leading Croatian weekly or monthly newspapers.
S: Writing an article of 3 standard pages + an outline of 600 characters.

Marin Držić

215209

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The course is a monographic study on Croatian renaissance playwright Marin Držić with references to all of his non-literary and literary texts. Course is divided into sections concentrated on the most important points of Držić's life, all of his dramas will be studied in according to the knowledge of normative poetic and than in relation to the situation that reigned in their own time in visual arts, in music, sciences and this will be connected with the state of spiritual and ideological consciousness. Special attention will be paid to the erudite strata with regard to the possible parallels between experiences of Siena humanistic circle and Držić's results in his Sheppard dramas. During the course will be studied the forms of political consciousness in the Renaissance and their reflection on the reality of Dubrovnik and Držić attempts to change the rules of the game with the power. Students will investigate the impulses that Držić could receive from his predecessors at the scenes of Dubrovnik and his parody of their models and scenic languages. Special attention will be given to the multi-layered Držić's messages. During the course will be studied the circumstances and the iconographic consciousness during the performances. Insight will be taken to the concept of Renaissance from Burckhardt book on Culture of the Renaissance in Italy to the latest views on this epoch produced in the studies of new historicism. Attention will be given to the concept of mannerism in Držić's plays, as well as intertextual relations in his plays to the most important authors of his time Pietro Aretino, Thomas Morus, Niccolo Machiavelli and Baldasare Castiglione. The generic system of renaissance drama will b studied due to the standardization of comedy and tragedy, and the so-called. middle genre, pastoral drama. There will be described and studied numerous thematic domain in Držić' texts emphasizing the glossary in which will dominate fortune, conspiracy, utopia, love and beauty. Držić's place in the Croatian literary canon and cultural history will be established during this course and the students will become aware of the canonization process of Držić that was specially intensive in the last hundred years and was subject of various ideological strategies.

1. Establishing Držić's place in the Croatian and European literary canon. Contributions of Đuro Matijašević, Ignjat Đurđević, Saro Crijević, Sabo Dolci, F. M. Appendini, Šime Ljubić and Franjo Petračić's edition of Držić's dramas in 1875. Rešetar's contribution in the fixing of Držić's opus. Questions of authorship and their resolution. Partially preserved texts. Lost literature of Croatia.

ECTS Credits 3.0

Semester Winter/Summer

Grading

Students are required to actively participate in all forms of teaching. Monitored activity of students during the teaching process. Each of program assignments including the elaboration of seminar participates in the formation of the final rating. Students commitment will be tested by passing a regular examination period in written and oral exam.

2. Writer's biography is analyzed on the basis of all known sources. The assumption about the year of the writer's birth. The lacunae in the documents from author's maturity to the unclear circumstances of his death in Venice after the conspiracy against the rulers of Dubrovnik. Analysis of some key documents: the election at the position of the rector of the Church of All Saints in 1526. Travel and stay in Siena and election for student rector. Travels with Count Rogendorf to Vienna and to Constantinople; attacks on Držić in Dubrovnik after return and after the performance of his first play Tirena. The document about the death of Držić's friends Pero Primović in Venice. Political memorandum from the 1566.

3. Theater and dramatic literature before Marin Držić in Dubrovnik: Plays by Džore Držić, Mavro Vetranović and Nikola Nalješković and their opus. The circumstances of early theatrical presentation in Renaissance Dubrovnik as well as outline of cultural and spiritual life of the city since the arrival of Ivan from Ravenna to the birth of Marin Držić. Filippo Diversis book as an important source for the cultural history of the Dubrovnik Republic. Book of Benedict Kortruljević as a source for mentality history in the time before Marin Držić.

4. Marin Držić in Siena. The development of the Italian Renaissance theater. The experience of Elijah Crijević with Plaut and his study on the prologues written for the Roman Academy of Pomponius Leto. The outlines of the Italian Renaissance dramaturgy: Poliziano, Ariosto, Machiavelli, Aretino, Dolce, Grotto. The term Renaissance from Burckhard to today and the causes of its metamorphosis.

5. Držić 's comedy Pomet. The secret of its lost text. Modern reconstruction of Pomet. Tirena and accusation of plagiarism. Views of various literary historians on the affair with accusation and the interpretation based on Držić's and Vetranović's statements. The performance of Tirena and its first and second Prologue. About the pastoral genre in the Renaissance. Excursus: Tirena as the source of Gundulić's Dubravka

6. Novel od Stanca. The interpretation of the text with special regard to the attitude towards the III.th Comedy by Nikola Nalješković. Linking of this texts with Hektorović prose letter to doctor Vanetti. Motif of the beard cutting from the ancient tragedy to the Renaissance comedy. Topic of syphilis in literary and non-literary texts, of the early modern period. Aretino's Imaginations. Amataus Luzitanus in Dubrovnik and his text about the treatment of Sabo Bobaljević.

7. Theater within the theater in Držić's Venus and Adonis. Analysis of mannerist style in this drama. Mythology in the Renaissance and its iconography. Pictures from Bagnocavallo with the theatrical scene in Dubrovnik from 1519. Držić 's poetry. What is the collection and about its place in Croatian literature. Petrarch and his followers in Croatia. The reasons and results of antipetrarchism. 8. Comedy Uncle Maroje as Držić's most successful drama. The circumstances of its performance 1551.and the problem of chronology. About the realization of Držić's dramas during performances in the private houses, public spaces and in the main square. Držić stages and their relation to related experiences in the renaissance theaters of Europe at that time. Analysis of Negromant speech as utopian text. Different interpretations of Uncle Maroje by: Živko Jeličić, Leo Košuta , Frano Čale, Slobodan Prosperov Novak.

9. City and cities in Uncle Maroje. Držić's cities. Connections of Držić with Machiavelli's Il Principe. Female figures in comedy Uncle Maroje. Amendments to the end scenes of Uncle Maroje: Mihovil Kombol, Ranko Marinković, Antun, Šoljan.

10. Theme of twin brothers in theater history: Menaechmi and Amphitryon of Plaut .Držić's Pjerin. Damaged play Đuho Krpeta as an example of the mixture of the pastoral and the comic genre.

11. Analysis of two Držić's smaller comedies: Arkulin and Mande. Comic theories from Plato and Aristotle to the surrealist, Bakhtin and Frye.

12. Marin Držić and his interpreters. Views of literary historians who have interpreted Držić's place in national history of literature from Vatroslava Jagića to our time. Problems of plot in the renaissance comedy. Analysis of Držić's relations to Plaut comedies. The description of Dubrovnik oligarchs rule in Držić's conspiratorial letters.

13. Mannerism in Pastoral drama Grižula. Parody and the play with the words in this drama. Marin Držić William Shakespeare's predecessor. Direct parallels among their works. Shakespeare connection with Croatian literature. The premiere of Falstaff in Zadar, Romeo and Juliet theme in Gučetić's tragedy Dalida, the same sources in Palmotić's Pavlimir and in Shakespeare's The Tempest. 14. The tragedy Hecuba from 1559. and her relations with Euripides and Italian writer Lodovico Dolce.. Hecuba read in mannerist key. Prohibition of two Hecuba's performances and reasons for that practice. Manuscripts of Hekuba. Nikola Gučetić as an actor in Hecuba. Nikola Gučetić and his circle Figure of woman slave as the former queen. Comparison with Posvetilište Abramovo by Mavro Vetranović.

15. Držić's conspiratorial letters to Cosimo I de 'Medici 1666. Jean Dayre. The conspirators in the Renaissance. Utopia by Thomas Morus. Death in Venice as a literary theme and as a part of Držić's biography. Držić's death as a literary theme of the playwrights in 20th century.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)

- » Croatology (Studij) (*elective courses, 6th semester, 3rd year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze literary and non-literary texts of Marin Držić and other writers of Croatian Renaissance.
2. Analyze of changes in the treatment of drama writing during various epoch and capability to explain the causes of these changes from the ideological point of view and also through the changes of poetic conventions and norms. The capability to identify literary genres: comedy, tragedy and pastorals and analyze their individual examples
3. Develop the capability for thematic analysis of literary works especially glossary dominated by keywords such as: fortuna, virtù, conspiracy, utopia, love, beauty. The capability of analyzing individual works from the perspective of renaissance poetic and also through most prolific contemporary methodological instruments.
4. Develop of the ability to read and to interpret literary works as sources for the history of ideas, of mentality and of Croatian national identity. The students will be capable to read Držić's texts as sources for the cultural history of Croatia.
5. Recognize the development of national and supranational literary I canon, and be prepared to determine the position of the Croatian writer in both European and national canon.
6. Recognize terminology characteristic for the study of dramatic works in the analysis of the major works of Marin Držić.
7. Use the glossary connected with drama, theories in the analyses of most important Marin Držić's dramas.
8. Develop the ability of critical thinking based on primary and secondary literature and skill in writing term papers on the opus of Marin Držić and of contextual and intertextual relations that are formed by his texts

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Croatology

Sociology

Week by Week Schedule

1. 1. Establishing Držić's place in the Croatian and European literary canon. Contributions of Đuro Matijašević, Ignjat Đurđević, Saro Crijević, Sabo Dolci, F. M. Appendini, Šime Ljubić and Franjo Petračić's edition of Držić's dramas in 1875. Rešetar's contribution in the fixing of Držić's opus. Questions of authorship and their resolution. Partially preserved texts. Lost literature of Croatia.

2. 2. Writer's biography is analyzed on the basis of all known sources. The assumption about the year of the writer's birth. The lacunae in the documents from author's maturity to the unclear circumstances of his death in Venice after the conspiracy against the rulers of Dubrovnik. Analysis of some key documents: the election at the position of the rector of the Church of All Saints in 1526. Travel and stay in Siena and election for student rector. Travels with Count Rogendorf to Vienna and to Constantinople; attacks on Držić in Dubrovnik after return and after the performance of his first play *Tirena*. The document about the death of Držić's friends Pero Primović in Venice. Political memorandum from the 1566.
3. 3. Theater and dramatic literature before Marin Držić in Dubrovnik: Plays by Džore Držić, Mavro Vetranović and Nikola Nalješković and their opus. The circumstances of early theatrical presentation in Renaissance Dubrovnik as well as outline of cultural and spiritual life of the city since the arrival of Ivan from Ravenna to the birth of Marin Držić. Filippo Diversis book as an important source for the cultural history of the Dubrovnik Republic. Book of Benedict Kortruljević as a source for mentality history in the time before Marin Držić.
4. 4. Marin Držić in Siena. The development of the Italian Renaissance theater. The experience of Elijah Crijević with Plaut and his study on the prologues written for the Roman Academy of Pomponius Leto. The outlines of the Italian Renaissance dramaturgy: Poliziano, Ariosto, Machiavelli, Aretino, Dolce, Grotto. The term Renaissance from Burckhard to today and the causes of its metamorphosis.
5. 5. Držić's comedy *Pomet*. The secret of its lost text. Modern reconstruction of *Pomet*. *Tirena* and accusation of plagiarism. Views of various literary historians on the affair with accusation and the interpretation based on Držić's and Vetranović's statements. The performance of *Tirena* and its first and second Prologue. About the pastoral genre in the Renaissance. Excursus: *Tirena* as the source of Gundulić's *Dubravka*
6. 6. Novel *od Stanca*. The interpretation of the text with special regard to the attitude towards the III.th Comedy by Nikola Nalješković. Linking of this texts with Hektorović prose letter to doctor Vanetti. Motif of the beard cutting from the ancient tragedy to the Renaissance comedy. Topic of syphilis in literary and non-literary texts, of the early modern period. Aretino's *Imaginations*. Amataus Luzitanus in Dubrovnik and his text about the treatment of Sabo Bobaljević.
7. 7. Theater within the theater in Držić's *Venus and Adonis*. Analysis of mannerist style in this drama. Mythology in the Renaissance and its iconography. Pictures from Bagnocavallo with the theatrical scene in Dubrovnik from 1519. Držić's poetry. What is the collection and about its place in Croatian literature. Petrarch and his followers in Croatia. The reasons and results of antipetrarchism.
8. 8. Comedy *Uncle Maroje* as Držić's most successful drama. The circumstances of its performance 1551, and the problem of chronology. About the realization of Držić's dramas during performances in the private houses, public spaces and in the main square. Držić stages and their relation to related experiences in the renaissance theaters of Europe at that time. Analysis of *Negromant* speech as utopian text. Different interpretations of *Uncle Maroje* by: Živko Jeličić, Leo Košuta, Frano Čale, Slobodan Prosperov Novak.
9. 9. City and cities in *Uncle Maroje*. Držić's cities. Connections of Držić with Machiavelli's *Il Principe*. Female figures in comedy *Uncle Maroje*. Amendments to the end scenes of *Uncle Maroje*: Mihovil Kombol, Ranko Marinković, Antun, Šoljan.

10. 10. Theme of twin brothers in theater history: Menaechmi and Amphitryon of Plaut. Držić's Pjerin. Damaged play Đuho Krpeta as an example of the mixture of the pastoral and the comic genre.
11. 11. Analysis of two Držić's smaller comedies: Arkulin and Mande. Comic theories from Plato and Aristotle to the surrealist, Bakhtin and Frye.
12. 12. Marin Držić and his interpreters. Views of literary historians who have interpreted Držić's place in national history of literature from Vatroslava Jagića to our time. Problems of plot in the renaissance comedy. Analysis of Držić's relations to Plaut comedies. The description of Dubrovnik oligarchs rule in Držić's conspiratorial letters.
13. 13. Mannerism in Pastoral drama Grižula. Parody and the play with the words in this drama. Marin Držić William Shakespeare's predecessor. Direct parallels among their works. Shakespeare preconnection with Croatian literature. The premiere of Falstaff in Zadar, Romeo and Juliet theme in Gučetić's tragedy Dalida, the same sources in Palmotić's Pavlimir and in Shakespeare's The Tempest.
14. 14. The tragedy Hecuba from 1559. and her relations with Euripides and Italian writer Lodovico Dolce. Hecuba read in mannerist key. Prohibition of two Hecuba's performances and reasons for that practice. Manuscripts of Hekuba. Nikola Gučetić as an actor in Hecuba. Nikola Gučetić and his circle Figure of woman slave as the former queen. Comparison with Posvetilište Abramovo by Mavro Vetranović.
15. 15. Držić's conspiratorial letters to Cosimo I de 'Medici 1666. Jean Dayre. The conspirators in the Renaissance. Utopia by Thomas Morus. Death in Venice as a literary theme and as a part of Držić's biography. Držić's death as a literary theme of the playwrights in 20th century.

Marketing Communications and Publicity 28502

Lecturer

doc. dr. sc.
Davor Trbušić

Course Description

The main objective of this course is to introduce students to the basics of marketing communications and publicity, as well as their role in the marketing process. Students should acquire the basic concepts and theories and be able to apply them.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 4th semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 6th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, understand and apply integrated marketing concepts, principles and the terminology in a business and non-profit environment.
2. Explain and understand the role of integrated marketing communications and of the professionals who use it in an organization;
3. Define, explain and use the skills of advertising campaigns, press releases, sales promotion, and other elements of the promotional mix;
4. Develop a unique promotional plan for real companies;
5. Demonstrate the ability to understand the role and importance of publicity of organization and its products.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

- Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society
- Inform about journalism and public relations

ECTS Credits 5.0

Mass Communication Research: A Historical Overview

38841

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of this course is to introduce students to the historical development of the media and mass communication research and to direct them to its current systematics as well as to the different approaches and theories that emerged from these researches. In the practical part, students will conduct their own research projects based on the most important theories of mass communication.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and describe the role of communication sciences in society
2. Describe and explain the key events and processes in the history of communication science, the development of the most important research and authors
3. Define the research topics for scientific research in communication science
4. Reproduce and explain the most important research topics of mass communication studies, their authors and the theories derived from them
5. Explain and apply methods of critical analysis to the acquired theoretical knowledge.
6. Apply theoretical knowledge on their own research projects.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

ECTS Credits	4.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Grading

Of particular importance for grading are the attendance of classes and taking part in discussions. Papers (presentations and student papers) and written exam.

Prerequisites

Academic Literacy
Introduction to Journalism
Originators of Communication Sciences and Their Works

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Identify and describe Croatian language culture and use language skills in journalistic and proofreading jobs

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Recognize and describe Croatian language culture and use language skills in journalistic and proofreading jobs

General Competencies

Identify and describe the position and role of communication science in society. Indicate and explain key events and processes of history of communication science, especially the most important researches. Define research topics for scientific research communications. Reproduce and explain the fundamental research of mass communication, and theories arising from them.

Media and Journalism Genres

117213

Lecturer

Zlatko
Vidačković,
nasl. doc. dr.

Course^{SC} Description

The aim of the course is for students to acquire knowledge on the classification in the field of journalism in order for them to understand the journalistic discourse as a specific discourse in public communication. Classification of areas is a fundamental prerequisite for a scientific approach to study and understanding of the types and genres. The types and genres are the basis of all communication, including the communication in the media.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 4th semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 6th semester, 3rd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognise the characteristics, values and goals of certain media and journalistic genres
2. Distinguish specific characteristics and importance of genres as means of journalistic expression
3. Describe and analyze individual media and journalistic genres (talk show, diary, daily news, interview)
4. Compare genres with respect to the type of media (print, radio, television, web portal)
5. Assess the impact of convergence and converged media on the structure of genres
6. Critically analyze the deforming of certain basic journalistic genres in the process of development of commercialization, tabloidization and sensationalism in the media

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

ECTS Credits 3.0

Semester Winter/Summer

English Level L2

E-learning Level L1

Study Hours
15
15

Grading

50% seminar paper, 50%
exam

Communication Studies

Inform about journalism and public relations

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Inform about journalism and public relations

Identify the foundations and theories of communication science and journalism, public relations and mass media

Identify and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply the knowledge of basic concepts from communicology and journalism;

Reproduce, apply and explain the basic theories of journalism and mass media that relate to genres;

Explain and critically analyze the acquired theoretical and practical knowledge; Recognize, explain and analyze the situation, innovations, challenges and issues in the media and journalistic genres.

Screening of student's work

Media Relations

50140

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

The aim of the course is to explain the importance of media relations by applying the relevant communication theory and the contemporary model of public relations. The introductory lectures will present also the historical development of media relations, which enables the students to gain insight into the differences with the contemporary model of media relations, which is the subject of teaching in this course. Contemporary model are based on research: both media and organizations. Therefore, students will be introduced not only to the importance of research, but also to methods of analyzing both the media and the organization. Furthermore, the mediation of information as well as the information management process will be explained more closely. In this context, the vertical and horizontal flow of information within the organization will be defined. Also, the basic values needed to achieve quality relations with journalists will be highlighted. For a contemporary model of media relations, strategic planning and valuation methods are of crucial importance, therefore to these topics will be also given a significant space. With particular emphasis on form and style, students will be introduced to the most important tactics in media relations, such as press releases, interviews, press conferences. Organization's web sites and organization's social networks will be also included.

Course Description

The main aim of this course is to provide students with basic knowledge about the medieval period, and to acquaint them with the main political, institutional, social, economic, cultural and religious medieval trends. Besides acquiring knowledge in basic data, students will be encouraged to analyse characteristically medieval processes in comparative perspective and to develop sensibility for changes that were occurring during a thousand year long period. Students will be able to perceive peculiarities of medieval society, and to detect social, religious and political continuities and discontinuities from the late antiquity to the early modern and even until modern era. The aim is, also, to elaborate medieval history topics which were insufficiently analysed in historiography and those which require new interpretations.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » History (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify causes of new political geography of the European territories from 4th to 7th century
2. Describe main processes in social, cultural and political history of medieval times
3. Describe key turning points in the development of medieval civilisation
4. Analyze process of layering medieval civilisation onto Western and Eastern societies
5. Describe main directions of Arab conquest
6. Explain changes in European society around the year 1000
7. Describe medieval political systems
8. Analyze relations between Church and the state in the Middle Ages
9. Identify changes in society in the late medieval period

Study Programme Learning Outcomes

Dual-major studies

ECTS Credits	5.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30
Grading	
Written exam: 40 %; oral exam: 60%.	

History

History

- Identify historical facts and processes from European and national history
- Name and describe individual historical periods
- Identify important historical figures from different periods of European history

General Competencies

After finishing the programme student will be able to:
 describe historical processes,
 explain cause and effect relations of historical events and processes,
 identify major issues in interpretation of history,
 tell what is the interpretation of history,
 design his/her own conclusion on different historical events and processes,
 demonstrate the importance of interdisciplinary interpretations of historical events,
 reconstruct historiographic tools in making conclusions of historical processes and events.

- » Lectures

Week by Week Schedule

1. What are the "Middle Ages": question of periodization
2. Continuity and discontinuity with Roman civilization
3. Reconstruction of Europe: barbarian invasion and the birth of medieval civilization
4. Realm of Franks
5. Emergence and development of the Byzantium in the Middle Ages
6. Arab conquests
7. Christianization
8. Transformation of the year 1000 and the concept of the Three orders society
9. "Feudalism": reality or construct
10. Medieval society: nobility, peasantry, burghers
11. Medieval monarchies
12. Relations between papacy and secular rulers
13. Scandinavia and east-Slavic states
14. Christian society: the age of monasteries and the age of cathedrals
15. City-states and the Renaissance

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain schools and philosophical currents in the Middle Ages.
2. Name important philosophers and important works
3. Explain how knowledge was transmitted, how authors' works were circulated.
4. Explain key terms and definitions and show their development and reception.
5. Reconstruct and evaluate important theses and topics.
6. Differentiate and evaluate the reasons presented in the medieval method of debates (*quaestiones disputatae*).

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Interpret various cultural, social and political phenomena

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Determine the need for lifelong learning and professional development

Methodology of Historical Science and Academic Literacy

130892

Lecturer

izv. prof. dr. sc.
Mladen
Tomorad

Course Description

The aim of the course: to develop the ability and skills associated with the basic methodology of the scientific work and research in historical sciences, to gather sources and literature relevant with the various historical topics, to review and analyse them, and to write various scientific works with the help of the IT technologies.

Study Programmes

» History (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce methodology of the scientific work related with historical sciences
2. Explain historical sources and literature
3. Relate and reproduce types of historical sources
4. Identify and compare the various problems of the methodology in historical sciences
5. Reproduce the important selection of sources for various historical research
6. Use of tables, graphs in scientific research
7. Classify the scientific works and their structure
8. Reproduce of the main terms related with the writing of the scientific works and preparation for print
9. Use of the gained knowledge in writing of the scientific works and bibliographies
10. Identify plagiarism and know how to avoid it

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

History

Single out historical processes and explain their topic of

	15

Grading

Grading of the students has several elements: - bibliography - review of the book - colloquium - seminar essay

interpretation

Express (in your own words) basic historiographical facts about world history

Use the computer, the Internet and other technical and digital aids to process historical data

Create a game, quiz or questionnaire based on historical figures and events from different periods of the Croatian past

Norm and classify historical literature and sources

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

General Competencies

After successful course students will be able to:

explain methodology of the scientific work related with historical sciences,

name types of historical sources and discuss sources and literature,

identify the importance of historical sources in historical research,

produce tables, graphs and databases in historical research,

define the main terms related with the writing of the scientific work and prepare it for print,

evaluate the importance of the gained knowledge and to use it in process of writing,

identify plagiarism,

name the most important institutions in which the historical sources are kept.

Microsociological Theories

269846

Lecturer

doc. dr. sc.
Erik Brezovec

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems through the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Sociology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define concepts of sociological theories established in 1960s and 1970s.
2. Explain three main theoretical approaches: symbolic interactionism, phenomenology and exchange theory.
3. Use acquired analytical tools for understanding of social phenomena.
4. Apply all mentioned sociological theories.
5. Combine sociological theories and write complex science papers.
6. Evaluate approaches and individual interpretations of sociological theories.
7. Explain the importance of modern sociological theories in their generality and specificity
8. Analyze the appropriateness of contemporary thought about society in the current empirical situation and concrete social and cultural conditions

Prerequisites

Macrosociological Theories

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality
 Use theoretical concepts in the analysis of society
 Critically judge the current social situation
 Explain the elements of social inequality
 Compare sociological theory and methodology
 Divide the types of scientific research
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Define sociology as a science
 Identify the main actors of certain social processes
 Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality
 Use sources of scientific information
 Use theoretical concepts in the analysis of society
 Critically judge the current social situation
 Explain the elements of social inequality
 Compare sociological theory and methodology
 Divide the types of scientific research
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Upon successfully passed exam, students will be able to:
 Use the general knowledge of society and of social processes.
 Explain the key structural factors that are shaping society.
 Explain the social change using classical and contemporary sociological approaches.

Migration theory

194394

Lecturer

Snježana
Gregurović,
nasl. doc.

Course Description

Introduce students to the basic concepts and theoretical concepts, causes and consequences of migration. A critical and interdisciplinary approach to migration topics through a historical and contemporary perspective on migration. Develop an understanding of the complexities of ethnic relations in migration and post-migration processes with an emphasis on the identity of Croatian emigrant communities in a European and overseas perspective.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize migration, ethnic and post-migration processes
2. Recognize the causes and consequences of migration waves from the Croatian area
3. Identify Croatian emigrant communities and describe their ethnic and identity characteristics
4. Apply theoretical frameworks for historical migration
5. Apply theoretical frameworks of contemporary migration
6. Use terms related to migration, ethnic and post-migration processes

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability to terminologically understand demographic and immigrant terms

Propose political and legal solutions based on scientific research of demographic and emigrant content

ECTS Credits 2.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours

15

Teaching Assistant
Nikolina Šimetin Šegvić,
mag. hist.

Grading

Activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is oral.

List the historical sources for studying national history
 Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Single out historical processes and explain their topic of interpretation

List historical sources for the study of national history

Norm and classify historical literature and sources

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

General Competencies

After finishing the programme student will be able to:
 write an essay on different historical period,
 defend his/her own opinion in discussions on different historical events and processes,
 reconstruct historiographic tools in making conclusions of historical processes and events,
 interpret historical sources,
 combine different historical processes.

Week by Week Schedule

1. Getting to know the students with the course commitments - insight into the geographical area of Vukovar and its surroundings
2. The historical context of the battle for Vukovar
3. Media reports on the battle of Vukovar
4. The role of CDF's in the battle of Vukovar
5. The attitude of state authorities towards the battle of Vukovar
6. The role of the international community in the battle of Vukovar
7. Croatian Radio Vukovar
8. General Blago Zadro
9. Vukovar hospital
10. Ovčara
11. The role of women in 1991
12. The media image of Vukovar in 1991
13. Vukovar defenders - guardians of Croatia
14. Vukovar defenders on other Croatian battlefields
15. Vukovar during the period of occupation until 1998

Modern English and the Media

38845

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To make effective use of sociolinguistic competences.

To enable students to develop strategies of successful communication.

To enable students to apply the acquired strategies through discussions in complex linguistic situations.

To enable students to express their personal attitudes on a particular topic.

Study Programmes

- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate registers and conventions of communication processes in the context of changing socio-cultural environment.
2. Explain their personal views and attitudes closely reasoned in different communication situations.
3. Recognize and make correct use of English idioms and phrases to accomplish communication.
4. Demonstrate and contribute to discussions and debates by effective use of modern professional terminology related to the media and communication sciences in the English language.
5. Demonstrate autonomous presentation of a topic of choice in the English language.
6. Write autonomously a seminar essay in English.
7. Use expressions and structures characteristic for language of the media

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Categorize and reexamine journalistic ethics

ECTS Credits 4.0

Semester Winter

English Level L3

E-learning Level L1

Study Hours 60

Grading

Regular attendance and active participation in classes 20%; presentation of a topic of choice 10%; seminar essay 30%; oral final exam 40%.

Prerequisites

Writing in English

Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Write texts and prepare other materials for media and public relations in Croatian and English
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers

General Competencies

Apply and make effective use of the acquired basic concepts related to modern journalism in the English language.
 Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations.
 Explain and critically analyse the acquired theoretical and practical information.

Neurobiology of behavioral disturbances and psychiatric disorders 144875

Lecturer

prof. dr. sc.
Zdravko
Petanjek

Course Description

The general aim of the course is to familiarize students with the basic characteristics of the most common mental illnesses and their biological background, with special emphasis on the characteristic features visible with methods of brain imaging.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic psychological and neurological characteristics of the major psychopathological disorders
2. Explain the relationship between biological predisposition and external factors in the development of behavioral disorders and mental illness,
3. Apply the theoretical and practical knowledge in understanding of symptoms of major mental disorders and abnormal behavior
4. Apply their knowledge in practical work with patients, using functional brain imaging (EEG, fMRI, PET, MEG)
5. Create multimedia presentations with clinical examples which show the correlation between damage/dysfunction of certain brain areas and psychopathological condition,
6. Analyze the scientific articles in the field of neurobiology of psychopathology
7. Explain the role of biological factors in the development of mental disorders and abnormal behavior

Activity in class 20%, seminar 20%, two written tests 20%, essay 20%, practical work 20%, final exam 20%.

Week by Week Schedule

1. Imaging of brain structure (MRI, CT, ultrasound) in the study and diagnosis of psychomotor and cognitive disorders.
Imaging of brain function (fMRI, PET, SPECT, EEG, MEG) in the study and diagnosis of psychomotor and cognitive disorders
2. Classical neuro-histopathological methods.
Methods of molecular biology in the research and diagnosis of psychomotor and cognitive disorders
3. The neurobiology of schizophrenia – brain imaging methods.
The neurobiology of schizophrenia - structural and chemical change
4. Neurobiology of manic-depressive psychosis - brain imaging methods.
Neurobiology of manic-depressive psychosis - structural and chemical changes
5. Neurobiology of normal aging - brain imaging methods.
Changes in the structure of the brain in normal aging and its correlation with psychological changes
6. Brain imaging and methods used in dementia diagnostics.
Neurobiology of Alzheimer's disease and other dementias
7. Brain imaging and methods used in dementia diagnostics.
Neurobiology of Alzheimer's disease and other dementias
8. Parallel processing in the visual system and disorders of the visual recognition.
Functional classification of associative visual areas and the correlation with specific visual dysfunctions
9. Consciousness and attention: the functional activity of the brain in normal and abnormal states of consciousness
10. Neurobiology of cerebral palsy.
Neurobiology of degenerative motor disorders
11. The biological predisposition for development of addiction.
Changes in functional brain activity in addicts
12. Stress and brain.
Neurobiology of PTSD
13. The neurobiology of learning and memory.
Functional brain activity in learning and memory disorders
14. Pathophysiological mechanisms of stroke.
The neurobiology of brain hemorrhage
15. Mechanisms of brain plasticity in the adult human.
Visualization of brain plasticity using fMRI.
Anatomical, histological and molecular changes in the brain during normal and abnormal aging

Neuropharmacology

200162

Lecturer

prof. dr. sc.
Ante Tvrdeić

Course Description

The objectives of the course are to familiarise students with chemical compounds and drugs acting on CNS and their actions on human behaviour and biological processes in the human brain. Also, the objective of this course is to give basic insight into the pharmacological properties of the main groups of neuropsychopharmacological drugs. The course will contribute to additional understanding of neurobiological basis of mental processes (perception, memory, learning, motivation, emotions, awareness, social behaviour). These mental processes are not exclusively affected by endogenous compounds from our brain, like neurotransmitters and neuromodulators. They are also under the influence of exogenous compounds like food and drinks, drugs, food supplements and abused substances (coffee, alcohol, nicotine etc.).

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the main pharmacodynamic and pharmacokinetic terms
2. Explain the meaning of term blood brain barrier and its structure
3. Name the main neurotransmitter systems in CNS and explain their functions
4. Define each group of CNS acting drug and explain its mechanism of action
5. List and explain the main therapeutic and unwanted effects of CNS acting drug
6. List and define the main groups of abused drugs
7. List and explain the effect of substance abuse on behaviour and biological processes in CNS

Week by Week Schedule

1. Pharmacodynamic - drug targets (receptors, enzymes, transporters, ion channels, genes, other) and type of drug actions (agonists, antagonists, partial agonists).
2. Pharmacokinetic - absorption, distribution, metabolism and excretion of drugs and xenobiotics. Penetration of drugs through the blood-brain barrier.
3. The review of the main neurotransmitter system in the human brain (noradrenaline, dopamine, serotonin, acetylcholine, GABA, glutamate, opioid peptides).
4. "Anxious mouse" - experimental models for testing potential anxiolytic drugs
5. Pharmacology of anxiolytics and sedative-hypnotic drugs (benzodiazepines, barbiturates, Z-drugs)
6. "Depressive mouse" - experimental models for testing potential antidepressive drugs
7. Pharmacology of antidepressant drugs (tricyclics, heterocyclics, SSRIs, SNRIs, MAOIs)
8. Pharmacology of drugs used to treat bipolar disease (lithium salts, mood stabilising drugs).
9. "Mad mouse" - experimental models for testing potential antipsychotic drugs
10. Pharmacology of antipsychotics.
11. Pharmacology of opioid analgesics
12. Drugs which produce amnestic or promnestic effects.
13. Abused substances 1 (alcohol, nicotine, caffeine, marijuana, psychedelics)
14. Abused substances 2 (cocaine, amphetamine and derivatives, extasy, heroine).
15. The exam term.

sc.

ECTS Credits	3.0
Semester	Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Class attendance and discussion, colloquium, written exam and seminar paper. In addition to the classic ways of following through the lecture, colloquium, seminar papers, exams, interviews, tests, etc. are especially valued independent research papers and through mentoring is raised to the level of a student's possible appearance at scientific and professional conferences or publishing in appropriate journals. It is a special motive for students in developing independence and in confirming their cognitive forces. In this way, students can publish and create preconditions for future work and employment in research already during their studies teams.

Navigation icons: Sun, COM, COM, CRO, CRO, DEM, HIS, HIS, PHI, PSY, SOC, SOC

Course Description

develop students' knowledge and skills related to the organization of space and society

□ to enable students to understand the functioning of administrative-territorial organizations

□ to acquaint students with the basic identity forms of the state

□ to enable students in discovering, recognizing and defining concepts, categories and laws related to statehood

□ to train students for independent scientific research work related to the consideration of state concepts

□ to enable students to apply standard and special methods and techniques in research of state models

□ explain to students the specifics of Croatian statehood

□ to acquaint students with the development of global and regional influence on statehood

□ to develop in students the application of developmental projection methods and models of assessment of state functionality

□ explain to students the basic conditionality for the development of the Croatian geographical area and society

□ enable students to understand, explain and anticipate future development issues, trends, conditionality and

consequence of the spatial and social organization of the total Croatian population

□ to develop students' knowledge of endangering basic systems in Croatian society and space

□ to enable students to learn about the foundations of the survival of Croatian statehood

□ to develop in students a sense of the need for a common identity as a precondition for a new state concept

□ consider Croatian identity as the foundation of a new concept

□ to look at the Croatian population in a unique concept

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define spatial, social, theoretical and methodological concept of the new statehood
2. Combine thinking, graphic, cartographic, computational and other methods in considering state processes, connections, relations and models, strategic significance of the new concept of the state
3. Define, observe, define, address and forecast changes in the new concept of the state
4. Explain the spatial discrepancy of the existing statehood
5. Develop the skills of written and oral consideration and explanation of the basics of the new model
6. Explain the spatial and social logic and the overall Croatian potential

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop a scientifically independent opinion on demographic and emigrant issues

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Interpret data on Croatian and global population and emigration

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

1 ECTS Kolokviji [EN]

1.5
ECTS Pismeni ispit [EN]

3 ECTS

Week by Week Schedule

1. Introductory considerations and theoretical-conceptual approach
2. Existing traditional and new models of statehood
3. Spatial control as a confirmation of power
4. A historical view of Croatian statehood
5. Population as the foundation of statehood and the main factor of all activities
6. Demographic framework of statehood

7. Decadence, demographic destruction or a new concept of Croatian statehood?
8. Examples of a new concept of the state: Ireland and Israel
9. Total population and wealth
10. Spatial, social, political and economic functionality
11. Strategic partnership
12. The concept of a single and unique Croatia
13. Demographic and development projections
14. Croatian model of statehood
15. Concluding consideration of the model

New ethical culture

187891

Lecturer

doc. dr. sc.
Matija Mato
Škerbić

Course Description

The primary aim of the course is to introduce to the students the basic categories and the categorical limitations of traditional ethics in facing the challenges of scientific and technical civilization. Next aim is to help students to properly approach the historical circumstances ("heuristics of fear") and conceptual flows that articulate the need for a new understanding of responsibility (the "ethics of the future"). Furthermore, to introduce students the most important projects within the new ethical culture, but also to the deviations that are manifested modern forms of abuse of ethics, ethical bodies and procedures. By combining lectures, student presentations and seminar discussions students will be able to achieve the didactic goals of existential enjoyment and competent approach to the problems of the contemporary world. Problem deepening and additional attractiveness of the content will be achieved by involving guest experts on specific topics. In addition to acquiring theoretical competences, the aim of the course is to train and capacitate the students for proper participation in the work of ethical and bioethical bodies in the society.

15

Grading

In agreement with the teacher, the student chooses one of the programmatic texts (under numbers 3, 9 or 13) and 1-2 books/articles from the list of compulsory literature.

- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe the underlying concepts and the distinction of ethics
2. Analyze and evaluate the features of scientific and technological progress within the social environment and the reasons for the emergence of bioethics
3. Define and describe the underlying concepts, persons, authors and publications that are crucial to the development of bioethics or new ethical cultures
4. Prepare, demonstrate and explain the underlying framework of new ethical or bioethical problems and their social manifestations
5. Select and orientate in bioethical and scientific thinking
6. Apply integrative thinking, respect the principle of interdisciplinarity and multiperspectivity
7. Analyze and orientate in the key moral contemporary human dilemmas, as well as on possible moral dilemmas in professional and public life
8. Identify and detect forms of abuse of ethics, ethical bodies and procedures

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Analyze and evaluate scientific and professional papers from different complementary scientific fields and disciplines

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods

Describe the features of the humanities and their interdisciplinary aspects

Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition

Determine the position and importance of humanities in the general structure of science

Non-Experimental Methods

86410

Lecturer

Goran Milas,
nasl. prof. dr.
sc.

Course Description

The main objectives of the course are to introduce students to the basics of the non-experimental methodology and the different modalities of its use. Through lectures, students will get to know the basics of the non-experimental methodology, the reasons for its use, and basic designs through which it is applied. Students will also be acquainted with the way of conceiving non-experimental research and writing a report or research paper based on it.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the non-experimental designs and different modalities of their use
2. Analyze the different segments of non-experimental research approaches
3. Evaluate the non-experimental studies
4. Apply non-experimental designs in their own research
5. Create the research that will make advantage of the non-experimental design

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organisational Psychology

28729

Lecturer

doc. dr. sc.
Maša Tonković
Grabovac

Course Description

The course provides a detailed overview of the basic psychological knowledge in the area of human labour. Through learning about different topics such as job analysis, working capacity and performance, selection and training of personnel, evaluating work performance, motivation to work, absenteeism and accidents and the impact of physiological processes in the performance, the students will acquire the knowledge necessary for psychologists working in the organization.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Assess critically work capacity and performance.
2. Select measurement instruments for the selection process.
3. Evaluate the advantages and disadvantages of different organizations of work in shifts
4. Plan the procedures of job analysis
5. Assess the need for professional training.
6. Assess the critical factors that impact work motivation.
7. Assess causes of absenteeism and work accidents.
8. Select interventions able to reduce the negative physiological effects on performance that are caused by changes.

Study Programme Learning Outcomes

Psychology

Analyze the findings of psychological research in Croatia in the relevant cultural and social context and to recognize the possible peculiarities of the subject phenomenon for the Croatian population, in relation to other - European, or wider global - populations

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

15

Grading

Midexam 40%, seminar 10%; final exam 50%

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Classify the basic theoretical approaches and laws of psychological assessment and counseling in different areas of applied psychology

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Plan the search of literature, databases and other sources of information

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the need for lifelong learning and professional development

General Competencies

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.

16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

ECTS Credits	5.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

The main intention of this subject course is to present the skills and techniques of effective communication in an organization. Introduction to communication theory is briefly presented, but the emphasis is primarily on written communication, with limited insight into verbal and visual-tactile technique. Students should be prepared to deliver critical evaluation of different forms of communication in the organization. The focus is on concrete problems and learning through practical examples.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 5th semester, 3rd year*)

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Inform about journalism and public relations

Explain and describe public relations

Organize individual and team work

Identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Explain and describe public relations
 Organize individual and team work
 Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media
 Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of public relations related to communication in the organization;
 Identify and describe the place and role of public relations, ie communication in the organization of society;
 Reproduce, apply and explain the basic theory of communication in the organization;
 Identify, explain and analyse the situation, innovations, challenges, problems in communication in organizations;
 Effective working independently and in a team.

Grading

STUDENT OBLIGATIONS
Class attendance is obligatory (minimum of 70%); Students are obliged to actively participate in classes; Students are obliged to write two essays; ECTS CREDITS: Class attendance 1 credit, class activity 1 credit, first essay 1,5 credits, second essay 1,5 credits;
GRADING AND EVALUATION: Student class attendance and participation are graded – exam essays
ATTENDANCE AND ACTIVITY Students are required to attend classes (minimum of 70%) in order to qualify for grading. For ten points from activity the students shall receive a higher grade by one. **ESSAYS** Students are obliged to write two essays. The first essay must be submitted to the address kroatologija@gmail.com by 15/11/2013 at the latest. The second essay must be submitted to the address kroatologija@gmail.com

6. Distinguish, evaluate and assess the learners and support the decision in this regard with arguments.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Croatology

Croatology

Justify and support the need and willingness for lifelong education

Identify, describe and argue the influence of European and world literature on the Croatian Literary Canon

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Sociology

General Competencies

The overview of the history of world literature is a part of the teaching of literature in primary and secondary schools. In terms of the taught subject matter it presents extremely important cultural knowledge about the development of the human spirit. With regard to human rights it raises the awareness of the relationships in the society, the family and the internal psychological processes of the individual. After finishing the course "Overview of the History of World Literature", the students will be able to: notice the differences in terms of content and meaning in the field of literature and culture. This will contribute to the development of their cognitive skills and aesthetic sensitivity. As a result, the students will be able to better and more fully understand the traditional and contemporary culture across a diachronic and synchronic overview.

Forms of Teaching

- » Predavanja
 - » heuristic class
- » Seminar
 - » Problem solving oriented class

Week by Week Schedule

1. Course details elaborated according to the schedule of teaching
2. Calendar:
3. The concept of world literature and of literary periods
4. The beginnings of literature (reading: Gilgamesh)
5. Literature of antiquity (reading: Sophocles: Antigone)
6. Medieval literature (reading: Carmina Burana)
7. Renaissance literature (reading: Dante: Inferno)
8. Baroque literature (reading: Pedro Calderon de la Barca: Life Is a Dream)
9. Literature of Enlightenment and Classicism (reading: Moliere: The Miser)
10. Literature of Romanticism (reading: Goethe: The Sorrows of Young Werther)
11. Literature of Realism (reading: Dostoevsky: Crime and Punishment)

by 13/12/2013 at the latest. There are three available topics for the first essay: 1. The influence of antiquity on the Medieval, Renaissance and Baroque literature; 2. The character of a woman in the Medieval, Renaissance and Baroque literature; 3. The development of drama from the period of antiquity to the Enlightenment and Classicism. The students may choose from three topics for the second essay: 1. The conflict of reason and senses in the literature of Romanticism; 2. The attitude of the social system toward the individual in the literature of Realism; 3. The influence of the Avant-garde on the contemporary literature.

ESSAY GRADING AND POINTS: Each essay should have between 1200 and 1500 words (3-4 pages). Each essay shall receive between 1 and 10 points. An essay may not receive more than the maximum number of points from the presented areas: 1. Knowledge of the theoretical literature 2 points 2. Good understanding of the topic 2 points 3. Good knowledge of the context surrounding the topic 1 point 4. Good use of professional language and expression 1 point 5. Systematically supported facts and meaning 2 points 6. Originality of ideas and their presentation and support 2 points. Essays are graded in the following manner: 6 points - sufficient (2), 7 and 8

12. Literature of Moderna (reading: Charles Baudelaire: The Flowers of Evil) points - good (3), 9 points
13. Contemporary literature (reading: Alessandro Baricco: Ocean Sea) - very good (4), 10 points
14. Final knowledge assessment and grading - excellent (5).

Grading

Students will be monitored in all three stages of the course delivery. In the first stage, when the basic concepts of pedagogy are taught, the student's motivation is monitored based on active engagement in class, as well as regular attendance (20% of the final grade). In the second stage, the student's individual and group work in research on a specific pedagogical problem, multimedia presentation and reporting on it in front of colleagues, and participating in the same assignment of other students are monitored (30 % of the final grade). The third stage refers to the evaluation of the student's systematic knowledge of pedagogy by means of a written exam (15 questions) based on obligatory literature and professor's lectures (50% of the final grade).

7. • Compare educational needs according to different theoretical backgrounds (natural sciences on education, social sciences and humanities on education, social problems in behaviour);
8. • Summarize the content of certain educational policies

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

History

Psychology

Sociology

Forms of Teaching

» Predavanja

» Professor's lectures, with up-to-date novelties published in the field of pedagogy in relation to student, education, the discipline of pedagogy etc.

» Seminar

» Individual preparation for the presentation of a book from the field of pedagogic practice and participation in seven similar preparations and presentations of other students.

Week by Week Schedule

1. •The educatee as the centre of not only education, but entire pedagogy. Various perspectives on man, from chemical materialism and different historical versions on the nature of man to the view shaped by different cultures and civilizations (European, Asian, African).
2. •The possibility of and the need for education (education as an activity that creates both man and society, looked at from the point of view of different scientific disciplines and professions that all have contributed to the interdisciplinary approach in pedagogy as a science and the practice based upon it).
3. •With maximum respect for education as a possibility and a need, limits of education are discussed as well, whereby both pedagogical optimism and pessimism are elaborated as an introduction to the informed opting for pedagogic interactionism, i.e. pedagogic realism.
4. •Pedagogy as a distinct science (educational science or sciences, basic concepts of pedagogy, the difference between pedagogy and educational science(s), the objectives of pedagogy, the fields of educational sciences, pedagogy and related sciences (sociology, psychology, anthropology, neurosciences, biology), epistemological division: humanistic-scientific pedagogy, empirical educational science, critical educational science.
5. •New challenges facing pedagogy (concern about its scientism, education and its references, interaction of education and pedagogy, interaction of pedagogy and culture).
6. •Communication in education (relevant characteristics of education, education as the change of behaviour, intentional and functional learning, education as interpersonal activity, education as social interaction, education as social communication, education as purposeful help in learning).
7. •Learning and teaching as parts of education

8. •Theories of behaviour change in education (psychoanalysis, behaviourism, insight, defence mechanisms, urge, and libido).
9. •Authority in education (authority as the triple relationship of the instructor, the subject, and the field; the difference between authority and authoritarianism, the relationship between paedocentrism and types of authority, educational models, who is an ideal educator).
10. Highly talented and disabled persons in education
11. Problematic behaviour of educatees in education and schooling,
12. Still insufficiently explored man
13. Alternative education
14. Different degrees of education and schooling
15. Learning as a pedagogic problem, education – the concept of human growing up, educational policy.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Maintain quality social contacts in the context of peer support
2. Examine the social context and their own attitudes/values towards people with disabilities
3. Recognize ethical challenges in providing peer support
4. Explain and support with arguments the applicability of social policy in direct work with people with disabilities
5. Write work plans for providing peer support
6. Provide peer support to students with disabilities in the academic setting

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Communication Studies

Communication Studies

Croatology

History

Psychology

Sociology

Discuss social issues in Croatian society

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Critically judge the current social situation

General Competencies

The course is declared as a university course and is not tied to a particular study programme.

Week by Week Schedule

1. Peer support (1 lecture + 1 exercises): Introduction to peer support. The analysis of concrete examples, a student with a disability and his peer - provider of support - establish adequate and appropriate form of support.
2. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of the persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
3. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.

4. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
5. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
6. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
7. Human rights (2 lectures + 0 exercises): Introduction to the importance of human rights, especially of persons/students with disabilities. International and regional instruments for the protection and promotion of the rights of persons with disabilities. National frameworks and institutions for the protection of the rights of persons with disabilities. Advocating for the rights of people with disabilities.

8. Human rights (2 lectures + 0 exercises): Introduction to the importance of human rights, especially of persons/students with disabilities. International and regional instruments for the protection and promotion of the rights of persons with disabilities. National frameworks and institutions for the protection of the rights of persons with disabilities. Advocating for the rights of people with disabilities.
9. Accessibility of higher education to persons with disabilities (2 lectures + 3 exercises): A review of existing legal regulations that enables work on assuring equal opportunities for students with disabilities in the higher education system of the Republic of Croatia; overview of the special rights of students with disabilities; analysis of the current state of accessibility to higher education institutions in the Republic of Croatia. Specific needs of students with disabilities and the obstacles they encounter in the academic environment through practical examples. Forms of support for students with disabilities (institutional, individual).
10. Accessibility of higher education to persons with disabilities (2 lectures + 3 exercises): A review of existing legal regulations that enables work on assuring equal opportunities for students with disabilities in the higher education system of the Republic of Croatia; overview of the special rights of students with disabilities; analysis of the current state of accessibility to higher education institutions in the Republic of Croatia. Specific needs of students with disabilities and the obstacles they encounter in the academic environment through practical examples. Forms of support for students with disabilities (institutional, individual).
11. Basics of multiculturalism (2 lectures + 2 exercises): Introduction to the theory and practice of multicultural education and multicultural counseling. The three-part model of multicultural competence. Sensitization to work with people with disabilities.
12. Basics of multiculturalism (2 lectures + 2 exercises): Introduction to the theory and practice of multicultural education and multicultural counseling. The three-part model of multicultural competence. Sensitization to work with people with disabilities.
13. Attitudes toward people with disabilities (1 lecture + 2 exercises): The definition of attitude and attitude components. Origin of attitudes. The relationship between attitude and behavior. Changing attitudes. Attitudes towards people with disabilities. Using a questionnaire on the attitudes toward people with disabilities.
14. Ethics (2 lectures + 2 exercises). Ethical principles in the relationship between a student and an assistant - a student with disabilities. Ethical issues and dilemmas in the relationship between a student and an assistant - a student with disabilities. Peer support skills (0 lectures + 10 exercises): The importance of recognizing our own feelings and the feelings of others. Appropriate display of feelings. The importance of empathy in human relations. Developing skills of empathy. Setting boundaries in relationships. Assertiveness skills. Academic skills (0 lectures + 2 exercises): The components of responsible and assertive learning. Cooperative learning. Planning and organizing time. Devising individual plans (0 lectures + 5 exercises): On the basis of acquired knowledge and skills, each student, under supervision, devises an individual support plan for the upcoming semester.

15. Ethics (2 lectures + 2 exercises). Ethical principles in the relationship between a student and an assistant - a student with disabilities. Ethical issues and dilemmas in the relationship between a student and an assistant - a student with disabilities. Peer support skills (0 lectures + 10 exercises): The importance of recognizing our own feelings and the feelings of others. Appropriate display of feelings. The importance of empathy in human relations. Developing skills of empathy. Setting boundaries in relationships. Assertiveness skills. Academic skills (0 lectures + 2 exercises): The components of responsible and assertive learning. Cooperative learning. Planning and organizing time. Devising individual plans (0 lectures + 5 exercises): On the basis of acquired knowledge and skills, each student, under supervision, devises an individual support plan for the upcoming semester.

Peer Support for Students with Disabilities

262093

Associate Lecturer

Martina Horvat,
mag. paed.

Course Description

The course holder is the University of Zagreb, and it is held at the Faculty of Education and Rehabilitation Sciences, University of Zagreb.

The course can be enrolled through 3 models (A, B, C):

A. Preparatory workshop (15 Lectures + 30 Exercises), provision of peer support (75 Exercises + group consultation 15 Exercises):

5 ECTS: 2 ECTS preparatory workshops (education) + 3 ECTS realization of peer support during one semester (achieving ECTS points is confirmed by "passed". Student work is not graded.)

B. Providing peer support (75 Exercises + 15 hours of group consultation):

3 ECTS: implementation of peer support during one semester (prerequisite: previously completed model A or C; the achievement of ECTS points is confirmed by "passed". Student work is not graded.)

C. Preparatory workshop (15 Lectures + 30 Exercises): 2 ECTS: preparatory workshop/education (Achieved student competencies are monitored through the activity of participating in a preparatory workshop and through an oral exam, and are evaluated grade.)

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)

ECTS Credits	2.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L2
Study Hours	15 30

Grading

Models A and B: The achievement of ECTS credits is confirmed with a "pass." Students' work is not graded. The students' achieved competencies are monitored through the quality of creating Individual Plans and the quality of providing peer support. Model C: The achievement of ECTS credits is confirmed with a "pass." The students' achieved competencies are monitored through their participation in a preparatory workshop and an oral exam. They are graded as follows: excellent (5), corresponding to the letter grade A; very good (4), corresponding to the letter grade B; good (3), corresponding to the letter grade C; sufficient (2), corresponding to the letter grade D; and insufficient (1), corresponding to the letter grade F.

Week by Week Schedule

1. Preparatory Workshop (15 hours of lectures + 30 hours of exercises):

Peer Support (1 hour of lectures + 0 hours of exercises):
Introduction to peer support.

2. 2. General Characteristics of People with Disabilities (9 hours of lectures + 9 hours of exercises): Defining basic concepts, classification of impairments/disabilities, active policy measures, and support models (2 hours of lectures, 1 hour of exercises).
Motor impairments and chronic illnesses: Etiology and phenomenology of motor impairments and chronic diseases, abilities and limitations of students with motor impairments and chronic diseases, barriers for these students in higher education, and ways to overcome them (1 hour of lectures, 1 hour of exercises).
Visual impairments: Blindness and low vision; characteristics, abilities, and specific functions of students with visual impairments; difficulties in everyday academic life for students with visual impairments; possibilities and importance of support (1 hour of lectures, 2 hours of exercises).
Understanding hearing impairments: Deafness and hearing loss; specifics in speech and language acquisition; sign communication; needs in higher education; support systems. Specifics, characteristics, abilities, and needs of students with deafblindness and their support system in everyday academic activities (1 hour of lectures, 1 hour of exercises).
Specific learning disabilities: Features and definition of dyslexia; support for students with dyslexia, dysgraphia, and dyscalculia (1 hour of lectures, 1 hour of exercises).
Students with ADHD: Difficulties for students with ADHD; adaptations and support for students with ADHD in higher education (1 hour of lectures, 1 hour of exercises).
Students with Asperger's syndrome: Asperger's syndrome; neurodiversity and perspectives of individuals on the spectrum; functioning of students with Asperger's syndrome; support and forms of adaptation (1 hour of lectures, 1 hour of exercises).
Mental illnesses and disorders: Types of mental illnesses and disorders; causes and prevalence; support options in higher education. Sensitization for the needs of students with disabilities in the academic environment (1 hour of lectures, 1 hour of exercises).
3. 3. Human Rights (1 hour of lectures + 1 hour of exercises): Introduction to the significance of human rights, especially the rights of people/students with disabilities. International and regional instruments for the protection and promotion of the rights of people with disabilities. National frameworks and institutions for the protection of the rights of people with disabilities. Advocacy for the rights of people with disabilities.
4. 4. Accessibility of Higher Education for People with Disabilities (1 hour of lectures + 1 hour of exercises): Overview of existing legal regulations that enable activities aimed at equalizing opportunities for students with disabilities in the higher education system in Croatia; presentation of the special rights of students with disabilities; analysis of the current state of accessibility in higher education institutions in Croatia. Specific needs of students with disabilities and barriers they face in the academic environment through practical examples. Forms of support for students with disabilities (institutional and individual).
5. 5. Basics of Multiculturalism (1 hour of lectures + 1 hour of exercises): Introduction to the theory of multiculturalism and the practice of multicultural education and counseling. A three-part model of multicultural competence. Sensitization for working with people with disabilities.

6. 6. Attitudes Towards People with Disabilities (1 hour of lectures + 1 hour of exercises): Definition of attitude and its components. Origins of attitudes. Relationship between attitude and behavior. Changing attitudes. Attitudes towards people with disabilities. Application of an attitude questionnaire towards people with disabilities.
7. 7. Ethics (1 hour of lectures + 1 hour of exercises): Ethical principles in the student assistant – student with disabilities relationship. Ethical issues and dilemmas in this relationship.
8. 8. Peer Support Skills (0 hours of lectures + 10 hours of exercises): Importance of recognizing one's own feelings and the feelings of others. Appropriate expression of feelings. Importance of empathy in interpersonal relationships. Developing empathy skills. Setting boundaries in relationships. Assertiveness skills.
9. 9. Academic Skills (0 hours of lectures + 2 hours of exercises): Components of responsible and assertive learning. Collaborative learning. Planning and organizing time.
10. 10. Creation of Individual Plans (0 hours of lectures + 4 hours of exercises): Based on all acquired knowledge and skills, each student, under supervision and in collaboration with a student with disabilities, creates an Individual Support Plan for the student with disabilities.
11. Implementation of Peer Support (0 hours of lectures + 75 hours of exercises + 15 hours of supervision): After the preparatory workshop, based on the created individual plan, peer support is provided for 75 hours per semester, in agreement with the student with disabilities, with 15 hours of supervision and an evaluation meeting (depending on the chosen model).

Course^{SC} Description

To familiarize students with the concepts and theories in the field of perception.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe human sensory system and the way how sensation is formed.
2. Compare different sensory systems regarding to stimulus, sensory organs, the way sensation is formed.
3. Explain perception of depth, perception of shape, perception of motion, and constancy of perception.
4. Explain connection between stimulus and sensation.
5. Describe phenomena of attention.
6. Compare different perceptive illusions and explain their background.
7. Analyze subjective factors of in perception.
8. Name perceptual disorders.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Create appropriate forms of communication and cooperation in different professional environments

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the biological and neurobiological bases of

Philosophical and Cultural Anthropology 214823

Lecturer

prof. dr. sc.
Ivo Džinić

Course Description

The objective of this course is to introduce students with basic topics from philosophical and cultural anthropology. Starting from the philosophical-anthropological precept of the man as a Being in the world; his social, spiritual, traditional and operative dimension; it will be present diversity of cultures and the possibilities of their interpretation. The second aim is to analyze the historical development of philosophical and cultural anthropology as a scientific discipline and to get acquainted with the most important cultural-anthropological theories and their main representatives. Furthermore, there is a judgment and evaluation of approaches and research questions of cultural anthropology as well as a critical judgment on the possibility of applying theoretical knowledge at their own local level.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define important concepts and characteristics of philosophical and cultural anthropology
2. Recognize the need for interdisciplinary collaboration of cultural anthropology with other scientific disciplines, especially with philosophy
3. Distinguish between the philosophical and scientific orientation of cultural anthropology
4. Analyze the basic ideas of significant cultural-anthropological theoretical directions and their principal representatives
5. Analyze cultural phenomena and changes
6. Reproduce cultural-anthropological knowledge in their own environment

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Interpret various cultural, social and political phenomena

Critically review different theories

Evaluate philosophical concepts. arguments and theories

Course Description

The main goal is to educate and train students for understanding, critical analysis, as well as the ability to communicate complex cultural phenomena, observed in the context of historical, social, ideological, political, and other circumstances. To this end, the teaching methodology will be adapted to allow a philosophically based approach to the multidimensionality of culture.

- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define cultural phenomena
2. Explain the methodological postulates of the philosophy of culture
3. Analyze the cultural phenomena of the modern world
4. Name the most important authors of the philosophy of culture and theoretical approaches to culture

ECTS Credits 4.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
30
30

Teaching Assistant
Jakov Erdeljac, mag. phil.

Grading

For the final grade, attendance at classes, activity at seminars, successful preparation of a seminar paper and taking an oral exam are monitored.

5. Write a seminar paper on a selected cultural phenomenon
6. Explain the most important philosophical approaches to culture

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

- Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods
- Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them
- Interpret various cultural, social and political phenomena
- Critically review different theories
- Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Week by Week Schedule

1. Introduction: thematic review; subject specificity; defining culture and its determination towards the non-cultural; forms and ways of cultural manifestation; culture and education; culture and civilization; ways of researching cultural phenomena; holistic approach; methodology (pluriperspectivity).
2. Critique of the bipolar scheme that rationalities and formal methods of opposing humanistic sensibility;
3. I. Kant and his notion of the Enlightenment; German Romanticism; Herder i 'the idea of education (Bildung); A. Bastian: 'basic ideas' (Elementargedanken; Humboldt and 'Weltanschauung';
4. English Romanticism; M. Arnold and the Opposition of Culture and Anarchy; culture as a humanistic ideal; culture as a form of civilization; folklore; J.J-Rousseau: Culture and the 'Natural Order'; Anthropologist E. Tylor - the first use of the meaning of culture in its universal meaning;

5. Cultural evolution; Understanding cultural processes using Darwin's theory; W. James: a comparison of biological and sociological evolution; natural selection and social variability; H. Spencer: application of evolutionary principles to cultural thought ('social Darwinism'); Cultural 'heritage' and biological model of evolution; R. Dawkins: Theory of memes - analogies between biological and cultural evolution (memes - genes); Critiques of Dawkins Theory; An attempt to overcome the biology-culture analogy and to perceive their mutual influence and conditioning (how culture production affects gene expression).
6. Instead of memes - symbols; E. Cassirer: Man as an animal symbolicum; What makes a symbol? Symbolic forms: myth, language, science, art, religion, history; Essay on Man (selected chapters).
7. E. Cassirer, Philosophy of Symbolic Forms (1-3); Cassirer - a philosopher who significantly contributed to overcoming the gap between the natural sciences (Naturwissenschaften) and the humanities (Geisteswissenschaften) and to finding links between the analytical and continental philosophical tradition.
8. E. Cassirer: The 'Logic' of Humanism (The Logic of the Cultural Sciences); Determining the new science of culture in relation to Hegel and Heidegger. While the natural sciences are characterized by a representative function (Darstellungsfunktion), the cultural sciences rely on the expressive function (Ausdrucksfunktion).
9. M. McLuhan (Gutenberg Galaxy; Global Village) and the idea of collective identity. Culture, mass media, and mass media.
10. Culture and cognition. Contrary to the beliefs of classical cognitivism, the idea will be affirmed that cognition cannot be reduced only to mental processing that can be expressed in a propositional form, but that cognition is essentially articulated through meanings generated by cultural creativity; The relationship of cognition and emotion.
11. Culture in the context of the philosophy of mind; Understanding the mind from the perspective of contemporary cognitive and neuroscience; Constitution of the human mind in the context of culture (enculturation)
12. Multiculturalism and interculturality. Globalization processes and multiculturalism; The fate of national culture in the context of globalization processes; Multiculturalism: a threat or an opportunity?
13. Culture as 'good' (tangible and intangible); Various forms of cultural manifestation in the modern world: culture of behavior, behavior, speech, healthy living, dressing, eating, driving
14. Pop (Ular) Culture, Culture and Ideology; 'Cultural Revolutions'; J. Derrida and 'deconstruction'; Post-modernism and post-post-modernism.
15. The future of culture: culture in the circumstances of artificial intelligence and robotics. Critique of UI (H. Dreyfus).

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the specificity and importance of philosophy of history in the study of philosophy
2. Explain the difference between ancient and modern understanding of history
3. Define basic philosophical concepts
4. Identify philosophical problems and solutions in the original texts

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

The overall course work during the semester is evaluated. The final grade is derived from participation in class work and grades at the oral exam. Assessment at the oral exam includes an assessment of reading the original literature.

5. Argue about major philosophical problems and schools
6. Recognize the philosophical views of the author in the original texts
7. Name the main authors and their main works, philosophical concepts, problems and schools
8. Argue about major philosophical concepts, problems, and schools

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Critically review different theories

Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics

Describe the features of the humanities and their interdisciplinary aspects

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Course Description

Main goal of collegium Physical education and sports is raising the awareness of importance of engaging in physical activity and sports, learning new and preserving already acquired motor knowledge and skills in order to influence anthropological characteristics (subcutaneous fat and muscle mass) as well as motor, functional, cognitive and conative skills and improving health and fitness. Also, the task of the course is to satisfy the need for movement, as well as to train students for rational, meaningful use of leisure, as well as to contribute to a quality life at a young age, maturity and old age.

- » Sociology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the need and importance of regular exercise in maintaining health and improving quality of life
2. Develop the abilities, traits and positive attitudes defined within the physical and health education area that contribute to more successful study
3. Apply part of basic kinesiological and practical motor knowledge of particular kinesiological activity
4. Create an active rest (active break between learning, during leisure time)

5. Develop positive attitudes and thinking and maintain developed self-discipline and work habits
6. Use motor knowledge and skills for physical exercise or competition
7. Demonstrate the basic elements of a particular kinesiological activity
8. Explain the basics of the influence of regular exercise on health

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Critically review different theories

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Determine the need for lifelong learning and professional development

Communication Studies

Organize individual and team work

Recognize the needs and willingness to engage in lifelong learning

Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Political Communication

45935

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

Political communication is one of the most important elements of the politics, which is itself based on mutual communication of individuals as well as on common knowledge that arise as a result of communication. In contrast to the idea of mass communication, which typically represents a process of targeted one-way flow of information, the concept of political communication, especially in democratic societies, includes also the interrelationship of factors in the political process and the methods and ways of conveying information. The methods of political communication reveal the true identity of a political system. The public space in its role of a place of communication and shaping of public opinion in modern western democracies becomes a sophisticated mechanism of various information transfer. In this context, the media is becoming less an instrument of media policy and more a kind of stock exchange for information and the boundary is lost between the sender and the recipient, and the participants are required to have specific skills at their disposal. Development of media brings changes in the structure of political communication and creates new political priorities.

Teaching Assistant
dr. sc. Dražen Maleš

Grading

Midterm Exams / Written
Exam: 80%; Practical
Project: 20%

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key concepts of political communication, and describe the main types of political systems and their communication methods.
2. State and explain the development of methods of political communication through history;
3. Define, identify and explain the various models of political communication;
4. Classify the primary actors in political communication and explain their roles in shaping public opinion and political campaigns.
5. Compare different forms of political propaganda and propaganda techniques, and assess their impacts in historical and contemporary political contexts.
6. Plan and conduct an content analysis of digital communication channels of political parties or options during the electoral period.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Think critically about topics related to journalism, public relations, communications and society as a whole

Explain and describe public relations

Identify and compare the peculiarities of individual media

Apply social science methods and identify research topics suitable for journalism, media, public relations and communications research

Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of communications and journalism related to political communication; Identify and describe the place and role of political communication in society; Reproduce, apply and explain the basic theories of political communication and public opinion; Identify, explain and analyze the situation, innovations, challenges and problems in application and research of political communication and public opinion; define, explain and distinguish the effects of political media, attitudes, knowledge and behavior of the audience;

Screening of student's work

2.5
ECTS Kolokviji [EN]

1 ECTS Projekt [EN]

4 ECTS

Week by Week Schedule

1. Introductory Lecture – an overview of the course, syllabus, practical assignments, midterm exams, and student responsibilities.
2. The development of political communication and political thought evolution; types of political systems: the evolution of political thought, the structure of political systems, and the advancement of political communication methods.
3. Political communication: Key concepts, actors, and scope: The concept of political communication, the primary stakeholders in communication, methods, and channels of communication.
4. Political publics and public opinion: Public opinion and the public sphere, the public and characteristics of group membership, types of audiences in political communication, the motivational dimension of audiences, public opinion research in politics, the impact of the public on political communication.
5. Politics, media, and public relations: Media and topics of domestic and foreign policy, activities and techniques of political public relations at various levels of government, within institutions and political parties, strategic communication, and ethical considerations.
6. First Midterm Exam.
7. Political marketing, advertising, and digital political communication: Political branding, political marketing – concepts and characteristics, visual identity – colors, symbols, advertising.
8. Electoral campaigns and political communication: The commercialization of politics, types and characteristics of electoral campaigns, strategic elements, value orientation of the campaign, carriers of the political message.
9. Political propaganda: Concept, types and forms of propaganda, fundamental elements in the study of propaganda, propaganda techniques, catalysts of aggression in politics, information warfare, examples from traditional and digital communication channels.
10. Digital political communication: channels, characteristics, content, audience

11. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
12. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
13. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
14. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
15. Second Midterm Exam

Political portraits in Dalmatia 1860-1918 223536

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

Students will learn the political biographies of the most important leaders of political life in the province of Dalmatia from the return of constitutionalism in 1860 to the collapse of the monarchy in 1918. Students will become familiar with the fundamental conflicts on the Dalmatian political stage, which resulted from different social interests and opposing ideologies of national integration, and which dynamized political development

Population Policy

269767

Lecturer

doc. dr. sc.
Monika
Komušanac

Course Description

Course objective is to capacitate students to comprehend system of measures and actions which affect demographic processes especially natural and mechanical population movement for the purpose of reaching certain specific population movement aligned with economic, social, health, political and other aims. One of the objective is also to explore possible effect of economic and social policy on labour force and overall population development.

Theme and field elaboration:

Concept, principles and objectives of population policy,

Types of population policy.

Population policy features.

Correlation of population policy and labour market.

National population policy in Croatia- theory and experience,

Projection of world population movement and population policy development.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and define types of population policies
2. Explain public policy influence on population development
3. Compare measures of population policy in Europe and worldwide
4. Explain and analyse effects of family policy measures on fertility
5. Select efficient type of population policy for demographic threatened countries

Post-Industrial Society

253974

Lecturer

doc. dr. sc.
Ivan Perkov

Course Description

Introduce students to the sociological theories of post-industrial society according to D. Bell, A. Touraine, M. Castells and J. Fourastie. Enable students to acquire and apply the theories and basic sociological concepts of postindustrial society. Teach students how to operationalize these concepts using examples of empirical research on changes in social structures that lead to post-industrial society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » Sociology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain theoretical concepts and empirical models of post-industrial society.
2. Explain and evaluate concepts and empirical research on the changes in modern division of labor, socio-economic and socio-professional structure.
3. Evaluate the impact of technology on social change and the importance of an interdisciplinary approach to research these topics.
4. Write research on changes in the socio-professional structure.
5. Analyze the data from the research and interpretation of the results.

Study Programme Learning Outcomes

Dual-major studies

Sociology

Define sociology as a science

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Recognize the indicators of social pathologies

Comprehend and interpret the ways particular sociological

Practicum in Biological Psychology

37803

Lecturer

prof. dr. sc.
Zdravko
Petanjek

Course Description

The overall objective of the course is to identify morphological and functional organization of the brain in practice, with particular emphasis on structures important in the processing of complex mental functions in humans. Specific objectives are elaborated per lecture subjects.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and identify fundamental parts of the central nervous system, the main morpho-functional division of the cerebral cortex, laminar organization and basic morphological properties of neurons in the human cerebral cortex;
2. Recognize and identify on the map of the human cerebral cortex functional specialization of different areas;
3. Recognize and identify the main structures of the limbic system;
4. Apply their knowledge in practical work using different instruments for brain imaging (MRI, fMRI, PET, MEG, EEG);
5. Use of multimedia web educational materials of the field of neuroscience in the preparation of presentations;
6. Create multimedia presentations with clinical examples that show the correlation between damage / dysfunction of specific brain areas and functional failure;
7. Analyze (basic level - recognition of basic structure) brain imaging records.

Study Programme Learning Outcomes

Psychology

Determine the biological and neurobiological bases of psychological processes and behavior

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

Evaluate basic content from complementary social, humanistic and biomedical disciplines.

- 25% Two practical
colloquia - 35% Oral exam
- 10 %

General Competencies

3. Explain the biological and neurobiological foundations of psychological processes and behaviour.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
13. Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Week by Week Schedule

1. The cell structure of the nervous system: morphological and functional properties of different types of neurons and glial cells.
Computer exercise: neuron, synapse, membrane potential, action potential.
Neurotransmitters and receptors (metabotropic and ionotropic), routes of synthesis of neurotransmitters, temporal and spatial integration of afferent stimulation on neurons.
2. The general morphology of the central nervous system: spinal cord, brain stem and cerebellum, diencephalon, basal ganglia and the cerebral cortex
Computer simulation of 3D anatomy of the brain: recognition of the fundamental parts of the computer program 3D anatomy of the human brain:
spinal cord, brain stem, cerebellum, thalamus, hypothalamus, basal ganglia, cerebral cortex lobes.
3. Morphology of the cerebral cortex: frontal, transverse and sagittal sections.
Exercises on cadavers: the external morphology and cross-sections of the central nervous system: spinal cord, brain stem, cerebellum, thalamus, hypothalamus, basal ganglia, cerebral cortex lobes.
4. Functional neuroanatomy of sensory and motor pathways.
Parallel, hierarchical and topical organization.
Motor and sensory systems: recognition on the schemes: dorsal columns, spinothalamic system, pyramidal and extrapyramidal motor system, visual and auditory pathway, spinal ganglia, endogenous analgesia system, specific thalamic nuclei.
5. Functional neuroanatomy of ascending reticular activating system (ARAS) in the brainstem: raphe nuclei, substantia nigra, ventral tegmental area, locus ceruleus.
Exercises on cadavers: the peripheral nervous system, brain and spinal nerves, autonomic nervous system, sympathetic and parasympathetic nervous system, sensory and autonomic ganglia, the spinal nerves, phrenic nerve, wandering nerve, facial nerve, the trigeminal nerve.
6. Functional neuroanatomy of activation system of mediobasal telencephalon: the hypothalamus, basal nucleus of Meynert, amygdala, septal area.
Exercise in microscopy: Histological structure of the cortex: differentiation of paleocortex, archicortical layers and neocortex in Nissl preparations. Golgi-stained neurons and other methods of presentation of nerve structures: Weigert, intracellular coloring, immunocytochemical methods.

7. Morpho-functional parts of the pyramidal neuron - afferent and efferent projections, dendritic spikes. Practicum of using slides: cortical connections, Weigert preparation, axonal layers of white matter of telencephalon, display projection with DTI techniques, long and short corticocortical connections, reciprocal thalamocortical connections.
8. Columnar organization of the visual cortex: oculodominant, orientation and metabolic column. The structure of eye and ear: identification of the fundamental parts of the eye (cornea, sclera, choroid, retina, ciliary body, lens, vitreous, pupil and optic nerve) and the ear (outer, middle and inner ear, cochlea, semicircular ducts, auditory and vestibular nerve, ossicles) on the models. Display native preparations of the eye and ear.
9. Homeostatic maintenance: the hypothalamic-pituitary axis, autonomous / endocrine reflexes of the hypothalamus, portal blood flow of the hypothalamus, statins and liberins, adeno-pituitary, neuro-pituitary.
Anatomy of of the hypothalamus: identification of the fundamental parts on diagram, the model and the native preparation. The medial and lateral hypothalamus, MFB, preoptic supra-optical region, tuber-infundibular area, mammillotegmental area.
10. Functional properties of the hypothalamus: the role of of the hypothalamus in maintaining biorhythms, sexual orientation, the limbic system.
The autonomic nervous system: sympathetic and parasympathetic, sympathetic and parasympathetic ganglia, the hierarchical level of the autonomic nervous system, autonomic structures of the brain stem, the hypothalamus as the main regulator of the autonomic and endocrine systems, identifying on diagram.
11. Papez circuit: the hippocampus, cingulum, mammary body, anterior nucleus of the thalamus, fornix, mammillo-thalamic tract.
Anatomy of the limbic system: Papez circuit, the amygdala, the central limbic continuum, medio-basal (septal) area, hypothalamus, hippocampus, fornix, identifying on diagram, the model and the native preparation.
12. Functional properties of the amygdala: role in fear and directing instincts. Histological organization of the limbic system: paleokorteks, archicortex, mesocortex, medio-basal telencephalon, hippocampal formation, identifying on diagram and microscopic appearance.
13. The hippocampus and the neural circuits of learning: the dentate gyrus, perforant path, mossy fibers, Schafer collaterals, CA1 and CA3 area.
Anatomy and histology of associative areas of the brain: identifying different associative areas (dorsolateral, orbito-medial, medial-peri-cingulate cortex, parietally area, gyrus angularis and supramarginalis) on diagram, the model and the native preparation. Magno-cellularity - a histology slides.
14. "Cognitive" neurons and "cognitive" neural circuits: role in the development of the highest (and peculiar to human) cognitive functions, and relevance to psychopathology.
The morphology of the brain - the visual presentation of magnetic resonance imaging. Recognizing the fundamental structure of the brain on MR image, correlation with histological sections, demonstrations of brain imaging using MR.

15. Imaging the brain functional activity: MEG, PET, functional magnetic resonance, quantitative EEG display, correlation of MR and CT. Display of brain activity - EEG. Demonstration of 64-channel EEG. Multimedia presentation of direct cortical and intracortical EEG recording. Application of EEG in the diagnosis of pathology of epilepsy (multimedia presentation).

Prehistory and the First Civilisations

93907

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

Course Description

Students are introduced with the earliest periods of human history; with the emphasis on prehistoric cultures in Croatia and the earliest cultures of the Near East.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » History (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Outline the most important periods in the history of mankind and define them
2. Interpret historical sources
3. Explain the context of ancient history
4. Reconstruct cause and effect relationship connected with ancient history
5. Compare the processes of development of early statelike formations
6. Identify the most important persons from ancient history
7. Write an essay on most important cultural achievements in ancient history
8. Compare mythology and religion of ancient civilizations

Study Programme Learning Outcomes

Dual-major studies

History

History

Identify historical facts and processes from European and national history

Name and describe individual historical periods

Single out historical processes and explain their topic of interpretation

Express (in your own words) basic historiographical facts about world history

ECTS Credits 3.0

Semester Winter

English Level L2

E-learning Level L1

Study Hours 30

Grading

Student activity will be monitored throughout the entire semester. Attendance is mandatory. The final exam is written and oral.

Create a game, quiz or questionnaire based on historical figures and events from different periods of the Croatian past
 recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values
 Apply the methodology of various historiographical fields and other research methods from the humanities
 Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

General Competencies

After finishing the programme student will be able to: define historical processes typical for certain historical period; summarize basic information of the Croatian and the World history; compile a list of literature for ancient history; describe historical processes; explain cause and effect relations of historical events and processes; compare historical processes of different periods; interpret historical sources; appraise the value of historiographic interpretations.

Vugdeliija, Stanko Vujica, Milka Vukusic and Dusan Zanko.

To develop among students a genuine interest in the life and work of Croatian greats, who are studied within this course, and a positive

research curiosity, in order to discover and possibly explore other Croatian figures in the diaspora.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain to students the historical and political conditionality of emigration, activities and evaluation of Croatian greats
2. Develop students' knowledge of the Croatian value system, regardless of planned perceptions
3. Describe to students the activities of Croatian important persons in the diaspora and their role in the service of preserving and developing the idea of the Croatian state
4. Explain to students the connection between the process of creating the Republic of Croatia and the role of individuals from the diaspora in the creation, defense and preservation of Croatian statehood
5. Describe to students the role of international actors in the processes of international acceptance and condemnation of Croatian emigrants and individuals in it
6. Develop knowledge about the individual role of emigrants in understanding the potential of emigrants and show and prove its importance for the Croatian people and their home countries: Croatia and Bosnia and Herzegovina.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a sense of security and correctness in the research process in order to prove the conditionality of the population, emigration and economy

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Proofreading and Editing

173444

Lecturer

izv. prof. dr. sc.
Vladimira Rezo

Course Description

The aim of this course is for the students to implement their knowledge of orthographic and linguistic norms of Croatian standard language acquired during their studies by making an assessment of diverse texts, to gain practical experience in editorial and proofreading activities and to learn what they can edit in a text and how they can do it so the given text complies to the norms of the Croatian standard language. With constant practice during classes and doing their homework assignments, students will gain the basis for editing and proofreading, and also learn how to constantly improve their techniques. There will be at least one opportunity to talk with an editing professional.

Study Programmes

Psychology of Adulthood and Aging

38640

Lecturer

Andreja Brajša-
Žganec,
nasl. prof. dr.

Course^{SC} Description

The aim of the course is to introduce students to the knowledge on physical, cognitive, emotional, and social development in early, middle, and late adulthood from the lifespan developmental perspective. Through the course, the students will be acquainted with different theoretical approaches to the development in adulthood and ageing, different factors that affect adult development, and research methodology in the field. Students will also acquire knowledge on developmental problems in adulthood and ageing. This course should enlarge the knowledge of students on developmental changes in adulthood and ageing, and consequently offer them the opportunity to develop and enlarge their own professional attitudes and skills.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define characteristics of physical, cognitive, emotional, and social development in early, middle, and late adulthood.
2. Differentiate specific research methodology in developmental psychology in relation to the research in other fields of psychology.
3. Explain research results in the adulthood and ageing psychology in accordance with knowledge in developmental psychology.
4. Relate adulthood development theories to the previously acquired knowledge of developmental psychology theories.
5. Compare developmental tasks in early, middle, and late adulthood.
6. Apply the acquired knowledge of the adulthood and ageing psychology in research, and in professional task demonstration.
7. Explain, individually and in teamwork, theoretical and research findings of the adulthood and ageing psychology
8. Analyze and compare the Croatian and international research results in the field of lifespan developmental psychology and explain cross-cultural similarities and differences.

Study Hours	30
	15

Teaching Assistant
Marija Džida, mag. psych.

Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 100 points according to following arrangement: 10 points for individual seminar task presentation, 10 points for group task presentation, and 80 points (two times 40) for mid and end term tests OR written exam. Points are turned into final grade as follows: 60-69% - pass (2); 70-79% - good (3); 80-89% - very good (4); 90-100% - excellent (2).

Create appropriate forms of communication and cooperation in different professional environments

Critically judge theoretical approaches to the study of individual differences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
5. Compare theoretical approaches to the study of individual differences.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Forms of Teaching

- » Predavanja
 - » interactive lectures
- » Seminar
 - » application of acquired knowledge in individual and group seminars

Week by Week Schedule

1. The lifespan developmental psychology, stages of development, the life-cycle concept, the ageing process.
2. History of research in adulthood development, theories of adulthood development.
3. Research methods in adulthood development, variables in development research, research designs, problems in researching adult persons.

4. Physical and cognitive development in early adulthood: biological ageing, physical changes and health; post-formal stage, changes in the structure of thought, expertise and creativity.
5. Emotional and social development in early adulthood: Erikson's theory, and Levinson's theory, and Neugarten's social clock.
6. Emotional and social development in early adulthood: Vocational choice and career development, close relationships, romantic love, marriage, parenthood, family life-cycle, diversity of adult lifestyles.
7. Physical and cognitive development in middle adulthood: Physical changes and health, adapting to physical changes; changes in mental abilities, information processing, applying cognitive abilities - expertise. Emotional and social development: Erikson's theory, and Levinson's theory, mid-life crisis, stability and change in self-concept and personality.
8. Emotional and social development in middle adulthood: Close relationships, family, becoming grandparents, siblings, career.
9. Physical and cognitive development in late adulthood: Life expectancy, physical changes and health, cognitive abilities - intelligence, memory, learning, wisdom; dementia; cognitive interventions.
10. Emotional and social development in late adulthood: Erikson's theory, and Levinson's theory, and Baltes's theory, stability and change in self-concept and personality, reminiscence.
11. Emotional and social development in late adulthood: Individual differences in psychological well-being, changing social world, relationships with others, retirement, successful ageing.
12. Death, dying and bereavement: Understanding of and attitudes toward death, thinking and emotions of dying people, the right to die, bereavement process.
13. Life expectancy of students (questionnaire application, and response analysis); Students' beliefs about ageing (quiz on ageing myths and response analysis).
14. Life-review or looking back (semi-structured interview with an elderly person).
15. Visit to a retirement home.

Dario
Vučenović

Course Description

After completing the course and passing the exam, students will understand the principles of human development and know the changes in the physical, cognitive, social and emotional development and personality development in early childhood, middle and late childhood and adolescence. Students will acquire skills that enable them to distinguish between typical development and developmental problems in children and adolescents and to identify developmental risk and protective factors at the individual, family, peer group and the wider social environment levels. Based on this knowledge, through individual work, seminars and group discussions, students will acquire the skills to plan activities to promote positive behaviour and prevent undesirable behaviour in children and youth.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe developmental changes in the physical, cognitive and socio-emotional development during early, middle and late childhood and adolescence;
2. Explain the mechanisms and processes underlying the changes in abilities, perceptions and behaviours during childhood and adolescence;
3. Choose appropriate approaches and methods to evaluate various skills, behaviours and attitudes in children and adolescents;
4. Compare normative development, individual differences in development and developmental problems in the physical, cognitive and socio-emotional development in childhood and adolescence;
5. Predict and evaluate the effects of biological changes, parents, family, peers, school and the wider community on the physical, cognitive and socio-emotional development in childhood and adolescence;
6. Identify developmental risk and protective factors, the problems and difficulties that can occur in children and adolescents and their causes and consequences;

ECTS Credits	5.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30 15

Teaching Assistant
Jelena Flego, mag. psych.

Grading

To complete the final exam and to form a final grade, it is compulsory to attend lectures, with a maximum of 3 absences. Students can pass a written part of the exam by passing both the colloquia, each carrying 30% of the final grade, while the seminar paper produced and presented presents 20% of the final grade. For passage to the colloquy, more than 52% of the correct response is required. Students who do not wish to attend colloquia, as well as students who are not satisfied with the success of the colloquy, have a written exam that meets the requirements of the colloquium conducted during the semester with the volume, content and the corresponding ECTS credits. Students are also obliged to access the oral exam, which corresponds to the essay type questions. The oral exam scores 20% of the final grade.

7. Evaluate and recommend interventions at individual, family, school and society aimed at addressing the problems and difficulties in the development and the promotion of optimal development in childhood and adolescence.

Study Programme Learning Outcomes

Psychology

Create appropriate forms of communication and cooperation in different professional environments

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

General Competencies

Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

The main goal is to acquaint students with the basic communication processes and skills necessary to work in the field of psychology. Students will acquire new knowledge, skills and methods to improve communication skills, become aware of possible obstacles in establishing good communication and will be able to propose an appropriate procedure for solving difficulties in the communication process.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the types of interpersonal communication
2. Distinguish types of communication according to the basic goal
3. Explain communication processes depending on the group of people
4. Identify difficulties in the communication process
5. Assess the suitability of the type of communication with respect to the basic goal
6. Analyze the communication problem and offer a solution

Lecturer

Natalija
Ćurković,
nasl. doc. dr.

Course^{SC} Description

The aim of the course is to provide students with an overview of the types, theories and basic principles of human learning. To compare human learning with that of animals and machines. To integrate findings of applied research on learning within the context of one of the three main approaches to the study of learning: behaviorism, cognitive learning and social learning. Upon course completion, students will be familiar with different types of learning and will be able to recognize their application in everyday life.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic principles of human learning.
2. Identify and describe main approaches to human learning.
3. Compare the principles of learning in humans, machines and animals.
4. Apply knowledge of the basic principles of learning to specific learning situations in everyday life.
5. Discuss the contribution of the various individual characteristics to the success of the learning process.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Psychology of Memory

200126

Lecturer

Natalija
Ćurković,
nasl. doc. dr.

Course^{SC} Description

The objective of the course is to introduce students to the principles and mechanisms supporting human memory and theoretical underpinnings of different memory systems. Finishing the course will enable students to understand and analyze basic methodologies in the psychology of memory, to compare different research traditions, and differentiate normative and pathological memory processes. By applying basic memory principles and mnemonics students will be able to plan and design adequate procedures for memory improvement.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe basic component processes involved in the process of memory.
2. List and compare different memory systems in terms of the information stored and mechanisms enabling the workings of each system.
3. Identify factors related to memory efficacy.
4. Differentiate between normal and pathological process in memory systems.
5. Apply the knowledge of memory systems with the aim of improving one's memory.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific

Psychology of Sexuality

38648

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

The main aim of the course is to introduce students with basic aspects of human sexuality and its development through age cycles, with a special emphasis on the psychological perspective. Students will be acquainted with the theories of sexuality and research methods within this discipline (especially in Croatia) and to learn about differences in intercultural attitudes and values towards sexuality; will be acquainted with the concept of sexual health, the most common problems (especially in certain medical conditions - oncology, cardiology and patients with other medical conditions) and psychotherapeutic and pharmacotherapeutic procedures; the adoption of communication skills related to sexuality problems

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and understand the basic scope of work covered by the psychology of sexuality.
2. Identify and describe changes in human sexuality through different developmental periods
3. Identify the core features and characteristic of sexual health.
4. Describe a psychosocial and cultural aspects of sexuality
5. Identify and understand sexual variations and sexual dysfunction
6. Explain and describe the impact of various health conditions on sexual health and behavior
7. Identify the basic features of sexual violence
8. Develop basic counseling skills in sexual dysfunction and problems

Lecturer

izv. prof. dr. sc.
Zrinka Greblo
Jurakić

Course Description

The purpose of this course is to provide students with view of the contemporary theoretical and applied aspects of the psychology of sport and exercise. Students will learn in which circumstances different psychological (e.g. personality traits, emotional states) and environmental factors may enhance or undermine sport performance. In addition, they will gain knowledge of procedures and techniques which may help athletes in achieving optimal mental state. Special attention will be devoted to the psychology of youth sports and to positive and negative effects that sports can have on young athletes' mental health. Students will understand the role of physical activity in improving mental health and personal well being and they will learn psychological strategies effective in adopting regular exercise as a new healthy habit.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the role and specific aspects of psychologist work in sport and exercise field
2. Analyze different theoretical approaches from sport and exercise psychology
3. Recognize main psychological techniques that a sports psychologist can use while working with his clients
4. Analyze mechanism underlying the relationship between physical activity and mental health
5. Define effective behavior change techniques
6. Assess and choose appropriate techniques and interventions depending on specific circumstances

Public Relations in Culture and Sports

117217

Lecturer

doc. dr. sc.
Davor Trbušić

Course Description

The course Public Relations in Culture and Sports provides students with a fundamental understanding of communication and media practices within the sports and cultural sectors, with a particular emphasis on the application of public relations techniques in promoting activities of sports and cultural institutions and managing events. The aim of the course is to develop the ability to critically analyze various media strategies, branding, and crisis communication, as well as the use of digital tools in promoting sports and cultural events. Through theoretical lectures and practical assignments, students will become proficient in applying contemporary communication strategies and understanding the role of media in shaping public perception in these sectors. The course covers the historical development of the relationship between sports, culture, and the media, communication strategies, branding, advertising, event media management, and the digital transformation of public relations. Students will learn how to identify key media practices and theoretical frameworks, explain the role of media in promotion, analyze branding strategies, develop digital communication strategies, and anticipate crisis situations. The course aims to equip students with the skills necessary for managing public relations, promoting sports and cultural events, along with media management.

Study Programmes

Grading

Midterm Exams / Written
Exam: 80%; Practical
Project: 20%

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key media practices in sports and cultural institutions and recognize their historical development.
2. Explain the role of media in promoting sports and cultural institutions and describe how mass media influences the development of sports and culture in public discourse.
3. Apply communication strategies and public relations tools in sports and cultural institutions, with a focus on audience engagement.
4. Analyze different branding and advertising strategies in sports and culture and compare examples of successful campaigns.
5. Identify key theoretical frameworks of public relations in sports and culture and describe their application in real cases.
6. Develop a digital communication strategy that includes social media, online branding, and digital tools for promoting sports and cultural events.
7. Predict potential crisis situations in sports and cultural organizations and develop strategies for effective resolution.
8. Analyze and interpret student projects, focusing on environmental analysis and media guide creation, and assess the effectiveness of proposed media activities.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Explain and describe public relations

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Communication Studies

Prepare materials for media and public relations in Croatian and English

Explain and describe public relations

Organize individual and team work

Identify and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply the knowledge of the basic concepts of public relations, primarily those associated with PR in culture and sports.

Define, explain and critically analyze the characteristics of public relations in culture and sports.

Apply the acquired public relations skills and techniques.

Work effectively independently and in a team.

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

3 ECTS Kolokviji [EN]

0.5
ECTS Praktični rad [EN]

4 ECTS

Week by Week Schedule

1. Introductory Lecture – an overview of the course, syllabus, practical assignments, midterm exams, and student responsibilities.
2. Sport and Media – Development and Interrelation: historical relationship between sports and media, media's role in sports promotion, evolution of sports broadcasting, influence of media on sports events and athletes.
3. Culture and Media – Development, Interrelation, Institutions: media's role in promoting cultural institutions, relationship between culture and mass media, development of cultural communication, media impact on cultural heritage, digitalization of cultural media.
4. Communication in Sports: sports communication strategies, public relations in sports organizations, athlete media training, crisis communication in sports, fan engagement.
5. Komunikacija u kulturi: cultural communication strategies, role of media in cultural promotion, communication practices in museums and galleries, audience engagement, cultural journalism.
6. First Midterm Exam
7. Advertising and Branding in Culture and Sports: brand and brand characteristics, brands in culture and sports industries, brand visual identity, branding strategies for cultural and sports events, advertising campaigns in culture and sports, sponsorship deals, creating brand identity, case studies of successful campaigns.
8. Event Management in Culture and Sports: organizing cultural and sports events, media management for events, audience targeting, promotion and logistics, examples of international events.
9. Event Media Management: media coordination during events, managing press conferences and interviews, creating media kits, working with journalists and broadcasters, handling live coverage.
10. Digital Communication in Culture and Sports: digital transformation of PR, social media management, online branding, digital tools for event promotion, trends in digital PR for culture and sports

11. Student Projects – Creating a Media Guide, Environmental Analysis, Media Activity Plan for a Cultural or Sports Event
12. Student Projects – Creating a Media Guide, Environmental Analysis, Media Activity Plan for a Cultural or Sports Event
13. Student Projects – Creating a Media Guide, Environmental Analysis, Media Activity Plan for a Cultural or Sports Event
14. Student Projects – Creating a Media Guide, Environmental Analysis, Media Activity Plan for a Cultural or Sports Event
15. Second Midterm Exam

Course Description

The Renaissance period is a very significant period in European culture that is generally characterized by the renewal of ancient culture and the new evaluation of the human spirit and human capabilities. The basic goal of the course is to acquaint students with the main features of Renaissance philosophy and thought in general, and they mainly relate to a new approach to authority, a new worldview, or a new cosmology that also required a new approach to man, or anthropology and general development of new scientific disciplines and methods. Following this, students will get acquainted with the most important representatives, topics and problems of Renaissance philosophy.

Mijo Beljo

Course Description

The aim of the course is to familiarize the students with the development of Croatian journalism since the advent of radio and television as new media of public information at the beginning of the 20th century, until today and the emergence of the Internet as the latest media of public information, with particular emphasis on the current information system of the Republic of Croatia.

Study Programmes

- » Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the most important events and milestones in the history of Croatian journalism and journalism in the 20th and early 21st century.
2. Classify and put into the context key periods in the history of Croatian journalism of the 20th century, and their dependence on the political, social and economic turmoil, but also technological progress.
3. Identify the most important names that marked the Croatian journalism in the 20th century, and the most important print and electronic media in Croatia.
4. Develop and conduct short independent research on a topic of modern communication media in Croatia.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Inform about journalism and public relations

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

ECTS Credits 4.0

Semester Summer

English Level L3

E-learning Level L1 (10%)

Study Hours

15

Teaching Assistant
dr. sc. Goran Radoš

Grading

Class attendance, literature reading and participating in the discussions with the professor and the colleagues (25% of the final grade), seminar paper (25% of the final grade) and the exam (50% of the final grade).

Prerequisites

History of Media
Communications in Croatia

Organize individual and team work

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

General Competencies

Indicate and explain key events and processes in the history of media communication in Croatia, from the advent of radio and television as new media of public information at the beginning of the 20th century until the present times, in which the Internet dominates as the latest means of public media. Enumerate, explain and distinguish the most important printed and electronic media in Croatia (agencies, daily and weekly newspapers - national, regional and local, the system of HRT, private radio stations, private television, and the most important portals on the Internet). Identify, analyze and explain the specificities of media activity, with a focus on the media market of audience and marketing. Define, identify and critically analyze key challenges and problems of journalism in the 20th and early 21st century, and the characteristics of contemporary journalism and information systems in the Republic of Croatia.

Research, Measurement and Restraining Corruption. 126250

Lecturer

izv. prof. dr. sc.
Irena Cajner
Mraović

Course Description

The aim of the course is to introduce students to the phenomenon of corruption in a comparative perspective and to gain the skills necessary to identify and analyze corruption. The purpose of the course is to introduce students with instruments for the detection, prevention and effective methods of restraining corruption in modern societies, especially in transitional and unconsolidated democracy countries. Therefore, students will be familiar with the most important works in this area and will analyse all the relevant aspects of corruption.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define corruption.
2. Identify and classify the manifestations of corruption in modern societies;
3. Compare the basic features of corruption in developed democratic countries and in transitional countries
4. Identify ways of measuring corruption
5. Explain the meaning and objectives of international instruments to restrain corruption
6. Explain the impact of the European Union on restraining corruption

Study Programme Learning Outcomes

Research Methods Practicum

209647

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

The aim of the course is to acquire skills in the application of certain quantitative research methods and designs in psychology, interpretation of the results and presentation of results in the context of the advantages and limitations of certain methods and designs. Based on insights into research results and practical experience in the role of participants, students will develop skills in selecting methods and designs appropriate to research problems, skills in recognizing their advantages and limitations, skills in interpreting results and scientific reporting based on empirical data using scientific literature.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Critically review the scientific knowledge of previously conducted research and theories in order to generate research hypotheses.
2. Prepare and conduct quantitative scientific research.
3. Conclude about the researched constructs on the basis of the integration of knowledge from the scientific literature with empirical data from their own research
4. Analyze critically the knowledge of the researched constructs in the context of the limitations of the used methodology.
5. Argue the appropriateness of individual research methods and designs in relation to the research problem.
6. Prepare scientific and professional reports on research results processed by appropriate statistical methods.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific

Resistance in Croatian history from the Early modern period to modern times

270149

Lecturer

doc. dr. sc.
Vladimir
Šumanović

ECTS Credits	4.0
Semester	Winter
English Level	L3
E-learning Level	L1 (10%)
Study Hours	30

Grading

Regular class attendance is a condition for taking the written exam.

Course Description

The aim of the course is to analyze and explain the causes and forms of resistance to different forms of feudal and state power in the period of modern and contemporary national history in a diachronic sequence. Social, religious, political and military groups and prominent individuals are studied as bearers of resistance. Thematically, the course covers the key manifestations of the resistance of the Croatian and Serbian people on Croatian territory to various forms of feudal and central government, and to the bearers of socio-political power. Particular attention will be paid to the turning years of Croatian history, which were marked by the disappearance of old and the establishment of new state communities, and the related resistances.

Study Programmes

» History (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. - describe the motivation, action and fate of prominent resistance bearers
2. - explain the clash of different interests and perspectives of the studied historical subjects
3. - analyze the causes of conflicts and wars on Croatian territory in the period of modern and contemporary history
4. - explain the historical conditioning of recurring patterns of behavior of nations and individuals
5. - generate and lead discussions on controversial topics of Croatian history

Communication Studies

Organize individual and team work

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Rhetoric is a comprehensive discipline that is integrated into almost all university programmes since the teaching and professional activity in communicology are for the greatest part performed through speech. It is expected that the adopted principles of rhetorical discourse, which necessarily implies the pursuit of truth, will ennoble all speaking efforts of students, in the context of text creation and its performance.

Roman Comedy

38874

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

The goal is for the students to learn the basic concepts of Roman comedy: its beginnings, varieties, types of humour, famous authors and works. It will be represented mostly through the works of Plautus and Terence, but also other Roman comic writers. Main themes will be illustrated by the text examples, viewing, in addition to the aforementioned, the differences between Greek and Roman comedy.

Study Programmes

Roman History and Civilization

45755

Lecturer

izv. prof. dr. sc.
Marko Jerković

Course Description

The knowledge of the Roman history and civilization is a prerequisite for the understanding of our history, culture and civilization heritage in general. The course offers insight into the roots, development (anthropological, social, economic, historical, legal and architectural) and the downfall of the subject civilization and its reflection on the history to the present day. The concepts are explained through the wide world examples correlated to our area for easier acquiring of knowledge.

Course Description

Course objectives are:

1. Present the main elements of Ruđer Bošković's scientific and philosophical work (in natural philosophy, metaphysics, epistemology, methodology and philosophy of science) as well as his achievements in other areas (e.g. technical expertise, diplomacy, poetry).
2. Correlate the main elements of Bošković's scientific and philosophical work with the respective scientific, philosophical, political, and cultural contexts.
3. Analyze the main philosophical concepts, attitudes and arguments used by Bošković.
4. Enable students to interpret and understand relevant Bošković's works (in translation).
5. Enable students to understand the main concepts and terms used by Bošković.
6. Enable students to evaluate Bošković's theories and arguments.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the main elements of Ruđer Bošković's scientific and philosophical work (in natural philosophy, metaphysics, epistemology, methodology and philosophy of science)
2. Relate the main elements of Bošković's scientific and philosophical work with the respective scientific, philosophical, political, and cultural contexts.
3. Explain the main concepts and terms used by Bošković
4. Analyze Bošković's theories and arguments in the context of the history of science and the history of philosophy
5. Evaluate the significance of Bošković's scientific work in the history of science
6. Evaluate the significance of Bošković's philosophical work in the context of the 18th century philosophy

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods
 Critically review different theories
 Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines
 Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics
 Evaluate philosophical concepts, arguments and theories
 Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Sectoral Public Relations

37926

Lecturer

Krešimir Dabo,
nasl. doc.

Course Description

The aim of the course is to familiarize the students with the fundamentals of public relations (PR) and strategic communications in a variety of sectors: corporate and business communications, PR in government agencies and the public sector, PR in politics, the civil sector, relations with the local community, establishing communication between sectors. The students apply the theories of PR in practice, learn the differences in PR for certain sectors, the characteristics of public, external and internal relations and communication, and in particular the importance of strategic planning and resources that PR uses in practice.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, distinguish and apply in practice the basic theories of PR.
2. Demonstrate knowledge and distinguish the characteristics of sectoral PR and apply the acquired knowledge specifically to each sector.
3. Apply the tools that PR uses in its work.
4. Analyze the social, economic and political context of PR.
5. Distinguish good from bad practice and know the relevant examples of good communication in various sectors.
6. Demonstrate progress in critical thinking and the skill of articulating problems.

Security Sociology

130871

Lecturer

izv. prof. dr. sc.
Irena Cajner
Mraović

Course Description

Studying main sociological and other theories students will come to understand the multidimensional phenomenon of security as a prerequisite for a successful physical, spiritual and material development of the society (an individual, groups, entire society and the state). They will learn about theoretical model of security and main elements of the national and private security systems of a modern society and state, as well as the basic organizational, structural and functional forms of security at the individual, national and international level.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain main sociological and other theoretical concepts regarding the phenomenon of security.
2. Classify security challenges, risks and threats to modern society.
3. Analyze tasks, structure and subject of internal security system.
4. Analyze tasks, structure and subject of the defence system.
5. Outline contemporary civil-military relations in democratic societies.
6. Explain forms and methods of work in private security sector.
7. Explain of multidimensional oversight of security sector (professional, political, judicial, of civil society).

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Discuss social issues in Croatian society
- Recognize the indicators of social pathologies
- Recognize the social specificities of Croatian society

Semiotics in Mass Communication

86092

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

The main objective of this course is to provide insight into the basic knowledge of semiotics, with special reference to its interdisciplinary nature, understanding it as a point of blending of life sciences and the science of signs (T. Sebeok). The specific objective of the course is to prepare students to understand semiotics as a science, general semiosis and communication systems, as is reflected in the broad range - from everyday communication over a public (and mass) communication to the aesthetic structure of language, image and sound signals - in order to evolve a character into a sign and recognize opportunities of semiotic interpretation of texts of all kinds of media (print media in general, front pages, promotions, photos, music, film).

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare historical development of semiotics and its content
2. Explain basic author approach to semiotics and basic concepts such as sign and symbol
3. Argue importance of familiarity with knowledge of semiotics in the study of communication sciences
4. Describe the role of signs and symbols in everyday life;
5. Analyze and interpret signs and symbols in print media, promotional materials and photography
6. Use the acquired knowledge on semiotic interpretation of mass media
7. Estimate quality and capabilities of application of stereotypes and manipulation through media
8. Analyze in critical manner the media content from the semiotic point of view
9. Argue the reasons for importance to be familiar with semiotics of mass media

Study Programme Learning Outcomes

ECTS Credits	4.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

10% attendance, 10% active taking part in discussions for blog work, 80% colloquia and/or exam.

Prerequisites

Introduction to Communication Sciences
Originators of Communication Sciences and Their Works

Prerequisites for

Theories of Media and Mass Communication

Dual-major studies

Communication Studies

- Organize individual and team work
- Identify the foundations and theories of communication science and journalism, public relations and mass media
- Prepare and create different forms of presentations and seminar papers
- Prepare and construct work assignments in the interdisciplinary field

Communication Studies

- Organize individual and team work
- Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media
- Prepare and construct work assignments in the interdisciplinary field
- Prepare and create different forms of presentations and seminar papers

General Competencies

Students will learn about the semiotic point of view at the human being who is animal symbolicum - a being of symbol, because human is the only one with the opportunity and ability to create symbols and think and live in a world of symbols. Since the language, myth, art, religion and media are parts of that universe, and symbols become part of human communication, students will be trained not only to notice, but also correctly interpret the various signs and symbols conveyed to us daily by the media in different social and cultural environments. Students will be capable of arguing the reasons why it is necessary to have knowledge about the semiotics of mass media, and will develop skills of critical perception, presentation and analysis of media ranging from printed media to new media through which signs and symbols can be created, but also to manipulate, stereotype and ideologize modern society .

Week by Week Schedule

1. Introductory lecture and introduction to the subject course, presentation of required reading and duties
2. History of semiotics I
3. History of semiotics II
4. Sign, symbolism, symbols, meaning;
5. Semiosys. Semiotics: systems of symbols and communication process;
6. Language and language codes;
7. Semiotics of media;
8. Semiotics of (newspaper) text;
9. Semiotics of television;
10. Semiotics of (daily) newspaper;
11. Semiotics of photography;
12. Semiotics of film;
13. Semiotics of commercials;
14. From a sign to a symbol: communication role a symbol has in mass media.

Social Management

201333

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Provide students with insight and understanding of the developed skills and required knowledge of general and social management as a deliberate activity - management and leadership activities and the importance and position of social management in the political, communication, diplomatic and general public sector from the perspective of different influences in making strategic decisions.

Teach students about the range and specifics of managerial technologies by applying effective and functional management in a social setting.

Introduce students and instruct them on the application of critical thinking and objective evaluation of managerial decisions in the field of human resources, financial, media and regulatory decisions and advocacy and diagnosis of possible consequences on social laws and the social value system. Recognize and enhance the influence of the political, legal, regulatory and socio-economic environment on the functionality of social and communication management when making managerial decisions in companies and institutions in the real and public budget sector and in general in various branch social institutions.

Develop a fundamental approach to social management and set up a theoretical and methodological conception of social governance and decision making in the function of the overall development of the Republic of Croatia.

Study Programmes

- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 1st semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 5th semester, 3rd year*)

ECTS Credits 4.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Teaching Assistant
dr. sc. Goran Radoš

Grading

In addition to the classical teaching methods, students will be graded according to the activity of the class, the level of the discussion itself and the specialty they will show during their participation in the class. Additional criteria will be related to the seminar paper and its explication, the midterm exam and the written and oral exam, while the encouragement towards independent research work will be a constant.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and clearly define basic managerial terms and specific managerial peculiarities of management in social frameworks in public, media and similar institutions.
2. Name at least five (5) primary legal and regulatory acts to standardize and determine the behavior of socially owned (state, public...) companies in a market-regulated environment.
3. Name the key normative framework and the necessary sub-legal regulations (from the founding to the present day) that set up the system of social law management in the Republic of Croatia, describe the functional and organizational components of national governance and explain the reasons for their existence with respect to determining the value system of Croatian society.
4. Differentiate the roles of social management in different branch activities, and to consider the function of management, systematic editing, program definitions and financing methods for nationally relevant activities, and to classify old / new social values for the purpose of national information and social needs.
5. To solve the function of social management in both real and imaginary case studies through analytical situations with simple input premises that influence decision making.

Social Media in Public Relations

201674

Lecturer

doc. dr. sc.
Davor Trbušić

Course Description

The course Social Media in Public Relations provides students with a comprehensive understanding of the role of digital tools and platforms in contemporary public relations practices. Through theoretical lectures and practical tasks, the course covers key aspects of using social media for brand promotion, crisis communication, political communication, and influencer marketing. Students will gain knowledge in planning, implementing, and evaluating communication strategies on social media, with a focus on analytical tools and tracking key performance indicators (KPIs). The course also explores innovations such as artificial intelligence and content personalization, enabling students to anticipate future trends in digital communication.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)

- » Communication Studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify digital communication channels and their specific application in public relations.
2. Apply social listening and analytics techniques to identify trends and opportunities for strategic communication on social media.
3. Plan communication activities and content on brand social media according to their target audiences.
4. Recognize how social media shapes consumer behavior and brand perception, and apply these insights in the design of communication strategies.

Week by Week Schedule

1. Introductory Lecture – an overview of the course, syllabus, practical assignments, midterm exams, and student responsibilities.
2. Introduction to Social Media and Public Relations
- a comprehensive overview of the theoretical frameworks of mass communication and social media, with a particular focus on the digitalization of public relations, an analysis of the role of key social media platforms, and an exploration of the application of Web 2.0 technologies in contemporary communication practices and online public relations.

3. Digital Communication Channels
 - a concise overview of key digital communication channels in public relations, including various social media platforms (Facebook, Instagram, Twitter, YouTube, TikTok), the importance of blogs and microblogging, essential characteristics of successful websites and SEO optimization, as well as trends in mobile communication and the use of mobile applications, with a particular emphasis on emerging platforms
4. Creative Content and Communication Strategies on Social Media
 - key formats of creative content, content planning and adaptation for social media platforms, as well as the design, development, and personalization of social media strategies and campaigns.
5. Influencers and Brand Impact
 - the role of influencers in branding, the process of selecting the right influencer, collaboration strategies, measuring the success of influencer campaigns, and the ethical considerations of transparency and authenticity in influencer marketing.
6. First Midterm Exam
7. Crisis Communication Management and Ethics in Social Media
 - key aspects of crisis communication with a focus on social media, including rapid response, information transparency, and ethical challenges, along with an analysis of successful crisis campaigns and strategies that utilize social media for effective information dissemination.
8. Measuring the Success of Digital Campaigns
 - tools for measuring digital campaigns, defining campaign goals, key performance indicators (KPIs), use of analytics tools, tracking and optimizing ROI, and examples of successful campaigns with a focus on measuring results and optimizing strategies.
9. Political Communication on Social Media
 - the role of social media in political communication, the digitalization of political campaigns, citizen mobilization, the impact of algorithms on political discourse, and ethical challenges, with examples of viral campaigns and political movements on social media.
10. Innovations and the Future of Social Media in Public Relations
 - technological advancements and their impact on social media, the application of artificial intelligence and content personalization, the development of new platforms and formats, the integration of social media with other communication channels, and future trends and challenges in digital PR.
11. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)
12. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)
13. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)
14. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)
15. Second Midterm Exam

Lecturer

prof. dr. sc.
Pavo Barišić

Course Description

Philosophical insight into the human social life and the forms of organization of society and the state from antiquity to the beginning of the Middle Ages and the founding of the Christian-metaphysical structure of the social philosophy of history.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the specificity and importance of social philosophy in the study of philosophy
2. Explain the difference between the state and society in the context of the relationship between social and political philosophy
3. Recognize philosophical problems and solutions in original texts
4. Analyze major philosophical problems and orientations
5. Recognize the philosophical views of the authors in the original texts

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L2 (20%)

Study Hours 30

Grading

A minimum of 50% attendance is required to take the exam. Exam literature, in addition to lectures, consists of three titles of compulsory and one title of elective literature.

6. Distinguish between major authors and their major works, philosophical concepts, problems, and schools
7. Relate the concepts and issues of antique social philosophy with general and specific philosophical concepts and issues from other periods.

Study Programme Learning Outcomes

Dual-major studies

- active command of one foreign language in academic communication in general
- adherence to the principles of academic integrity and ethical norms of research and publishing
- adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

- Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods
- Analyze and evaluate scientific and professional papers from different complementary scientific fields and disciplines
- Interpret various cultural, social and political phenomena
- Critically review different theories
- Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Lecturer

Renata Franc,
nasl. prof. dr.
sc.

Course Description

The students gain an understanding of the basic psychosocial process, theory, and key research and measurement procedures in the field of social cognition and perception, attitudes, prejudices, the self, social influence, group process and to develop students' ability evaluation thereof.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 3rd semester, 2nd year*)
- » Sociology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the fundamental concepts, theories and key research in the field of social cognition and perception, attitudes and prejudice, self, social influence and group process.
2. Evaluate different approaches in the field of social cognition and perception, attitudes and prejudice, self, social influence and groups and group process.
3. Apply knowledge from social psychology in practical work
4. Explain the main strenghts and limitations of main research methods in the field of social psychology
5. Create simple analyses or research in the field of social psychology

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Compare sociological theory and methodology
- Recognize the indicators of social pathologies
- Identify the basic concepts of statistics
- Compare different social phenomena in different cultures

Sociology

- Define sociology as a science
- Use statistics in social research
- Use sources of scientific information

ECTS Credits 5.0

Semester Winter/Summer

English Level L1

E-learning Level L2

Study Hours
30
15

Grading

Class attendance and participation - 10%;
Research study and presentation - 10%;
Two colloquia - 80%. A test of knowledge through two colloquia will be organized (in case of non-passing or unsatisfactory achievement on colloquia students can take the final exam, which, by volume, the content and the corresponding ECTS meets the colloquia.

- Explain the elements of social inequality
- Compare sociological theory and methodology
- Recognize the indicators of social pathologies
- Identify the basic concepts of statistics
- Compare different social phenomena in different cultures

General Competencies

Apply knowledge and understanding of concepts and theories in the field of social cognition and perception, attitudes, prejudices, self, social influence and group process. Critically evaluate theoretical approaches and research methods.

Learning outcomes:

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Screening of student's work

Society and Religion: 13th - 15th Century 130475

Lecturer

izv. prof. dr. sc.
Marko Jerković

Course Description

The main goal is to acquaint students with the fundamental processes that characterized the relations between society and religion in the higher and late Middle Ages. Also, the aim is to familiarize students with the most important primary sources and recent literature relevant to this matter. Apart from mastering basic facts and historical processes, students will be encouraged to analyse comparatively the popular religious movements and to approach the topic interdisciplinary. The goal is to train students to work with sources, diplomatical and narrative ones, related to the topic of the relations between religion and society in late medieval period.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)
- » History (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the basic historiographical questions about inter-religious contacts in the Middle Ages
2. Describe the processes in social, cultural and church history of the Middle Ages
3. Indicate the main trends associated with the relations between society and religion in the Higher and Late Middle Ages.
4. Explain interreligious relations.
5. Identify the most important representatives of the hagiographic system.
6. Explain the influence of ecclesiastical institutions on medieval society.

Study Programme Learning Outcomes

Dual-major studies

- adherence to the principles of academic integrity and ethical norms of research and publishing
- adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Society and Sustainability

130891

Lecturer

doc. dr. sc.
Ivan Perkov

Course Description

The aim of the course is to familiarise students with the complex interactions between humans, society and the environment. The course focuses on the concept of sustainable development as the dominant global concept governing the relationship between civilisation and the ecosystem. Students are introduced to the complex social processes that have led to the global ecological crisis (urbanisation, industrialisation, globalisation, McDonaldisation...). The main ecological and social problems of humanity are analysed, such as climate change, consumption, accumulation of waste. The concept of sustainable development is defined and analysed in depth, and a critical assessment of its global success is also made. Students learn about the decades-long development of global environmental awareness. Sustainability and sustainable development are considered and analysed in the context of the theory of post-industrial society and the theory of risk society. The values and normative frameworks of sustainability at local, global and international levels are introduced and analysed. The relationship between economy and sustainability is thoroughly analysed and the concept of circular economy is presented and described in detail. Special attention is given to current and specific issues such as smart cities, modern mobility, sustainability of global food production. Contemporary environmental activism and the role played by modern digital media are analysed and presented.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17098) -elective courses (1 st year), 2nd semester, 1st year*)
- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 4th semester, 2nd year*)
- » Sociology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the concept of sustainable development
2. Evaluate critically the key disagreements relating to climate change
3. Identify and describe the social, cultural and economic causes and consequences of global ecologic crisis

ECTS Credits	4.0
Semester	Winter/Summer
English Level	L1
E-learning Level	L1
Study Hours	30
	15

Grading

All forms of student contribution will be evaluated - participation in teaching and seminar discussions and knowledge demonstrated in written and oral exams.

4. Evaluate policy measures (local and global) which are implemented to address climate change from various perspectives (ecological and economic stability, political strategies, ethical implications)
5. Use communication skills to analyze social changes related to sustainable development
6. Explain the concept of ecological footprint
7. Analyze and critically evaluate contemporary mobility
8. Analyze and critically evaluate the potential of sustainable tourism

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Sociology

Identify the main actors of certain social processes

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use theoretical concepts in the analysis of society

Use sources of scientific information

Critically judge the current social situation

Describe the concepts of sustainable development

Compare different social phenomena in different cultures

doc. dr. sc.
Ivan Perkov

Course Description

The objective is to acquaint the students with classical sociological theory with the emphasis put on the contemporaneity of classical theoreticians and to ensure they acquire knowledge, skills and competences in order to be able to analytically and critically master classical theoretical concepts, basic sociological terms, and theoretical paradigms on the level of operative application. This means the students are prepared for the study of sociological theories (classical and contemporary) of other special sociological disciplines on later study years as well as for the writing of a paper on the level of a book report.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » Sociology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the widest range of classical theoretical perspectives in sociology aware of their philosophical origins.
2. Argue the importance of developing critical (self)awareness and interdisciplinary approach.
3. Analyze the dialectical interconnectedness and interdependence of theory and practice.
4. Describe the socio-historical context of the origins and developments of sociological theory.
5. Interpret the relevance of the French revolution, political revolutions, and the industrial revolution in the context of the newly appearing social sciences.
6. Define the basic sociological concepts of Henri de Saint-Simon and Auguste Comte.
7. Interpret organicism and basic sociological concepts of Herbert Spencer, evolutionism in sociology, social Darwinism and the theories of state formation.
8. Define basic concepts of the formal German and American sociology (Chicago school).
9. Analyze the basic concepts of structuralism.
10. Define the basic tenets and concepts of functionalism in sociology.

ECTS Credits	7.0
Semester	Summer
English Level	L0
E-learning Level	L1
Study Hours	30
	30

Grading

Attendance at lectures and seminars is monitored and recorded, and makes together with active participation in class 10% of the final grade. Individual oral presentation of the previously assigned topic and the writing of a seminar paper each carry 10% of the final grade. Passing tests (continuous assessment exams) or the written exam and the final oral exam make a maximum of 70% grade (excellent).

Prerequisites

Introduction to Sociology

Prerequisites for Sociological Topics and Perspectives 2

Study Programme Learning Outcomes

Dual-major studies

Sociology

Define sociology as a science

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Explain the elements of social inequality

Divide the types of scientific research

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Define sociology as a science

Use sources of scientific information

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Explain the elements of social inequality

Divide the types of scientific research

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Upon the completion of undergraduate study of sociology, the student will be able to:

Interpret classical sociological texts in the light of philosophical influences

Correctly analyse basic professional terms

Compare different theories of society

Give arguments for and against various rationales in the background of theoretical-methodological paradigms/programmes

Analyse the adequacy of contemporary social theory regarding actual empirical situation and social and cultural conditions

Correctly interpret the importance of teaching classical sociological theory in its generality and specificity

Analyse diachronically the development of social theory

Interpret the philosophical and critical bases of the discipline

Apply the learned content on the analysis of research results

Synthesize the learned content through one's own attempts of contributing by writing a paper, giving an oral presentation and asking critical questions.

Sociology of Croatian society 4- Media System Analysis

215042

Lecturer

izv. prof. dr. sc.
Irena Cajner
Mraović

Course Description

The aim of the course is to acquaint students with the basic concepts of sociology of contemporary media within the context of Croatian society and, also, conducting an analysis of the relational relationship of contemporary tendencies to the influence of technologically generated digital reality in global (and thus Croatian) society and the process of redefining sociologically important constructs of space, time, body, identity, patterns of sociability, media construction of social reality and more. Also, the goal is to introduce students to the sociological theories of contemporary media according to the works of R. Shields, M. McLuhan, J. Baudrillard and H. Hromadžić and enable students to adopt and apply theoretical concepts and basic sociological concepts of digital society and apply these concepts and theories to the analysis of the phenomenon within the context of Croatian society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » Sociology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the process of mediatization of Croatian society
2. Recognize the basic features of the mediatization process and the media construction of reality
3. Apply the acquired knowledge to understand the relationship between technological upgrades and social consequences
4. Explain all the positive and negative effects of the mediatization process
5. Describe the consequences of mediatization on sociological notions of space, time, body, identity and patterns of sociability
6. Explain the basic theories within contemporary media discourse
7. Relate the process of mediatization with current social changes in the Republic of Croatia
8. Compare the effects of mediatization at different levels of social reality

Sociology of Identity

117249

Course Description

The course Sociology of Identity is focused on the analysis of individual and social identities from sociological starting point of view. A sociological approach to self and identity begins with the assumption that there is a reciprocal. Relationship between the self and society. The focus of the course is on how social structure influences one's identity, and in turn, behavior. More attention is being given to understanding the development of multiple role identities and their outcomes for individual behavior. Therefore, the basic objectives of the subject are:

1. Outline the knowledge about the basic concepts of identity from different scientific perspectives.
2. Define the insights into the dominant social processes that have an impact on the formation of social identity.
3. Demonstrate the knowledge of the relational nature of identity
4. Elaborate different forms of social disintegration, both vertical (different social groups) and horizontal (policy) - especially when it explains the different fields of social and individual identity;
5. Apply the historical relationship between the society and individual to a culture that represents the intersection of the formation of different identities;
6. Classify and compare the insights on contemporary empirical research in the field of social identity;
7. Explain the social identity of Croatian society, with emphasis on the impact of globalization processes of the local identities.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and interpret basic relational dimension of identity.
2. Define and distinguish the approaches to the concept of identity in sociology and other natural sciences.
3. Apply basic sociological concepts of identity and categories in interpreting forms of social habitus.
4. Explain the modern social processes in which identity occurs in the context of the sociology of everyday life.
5. Apply the acquired knowledge and understanding within the social action that manifests a high degree of respect for the established hierarchy and loyalty.
6. Analyze current processes governing the dynamics of the Croatian society (mass impoverishment, social disintegration, stagnation of social production; develop their own mental map of the social structure and relational dimensions of identity; • develop and build their own value orientation and "world view" in relation to the other and different, traditional and modern value systems).

Sociology of Marketing

269451

Lecturers

prof. dr. sc.
Renato Matic

izv. prof. dr. sc.
Irena Cajner
Mraovic

Course Description

Students will be introduced to the concept of marketing and to the sociological aspect of marketing. The course will cover topics such as marketing strategy, advertising, sales and promotional tactics from a sociological point of view. Emphasis will be placed on the interdisciplinary nature of today's economic approach to marketing with sociology as an indispensable part of a successful marketing campaign. Guest lecturers from the private sector specializing in marketing and branding will be included in the classes.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define marketing
2. Explain the basic concepts of marketing, promotion and sales
3. Explain sociological aspects of marketing
4. Name the structure of the marketing campaign and its elements
5. Recognize financing of marketing activities
6. Define basic structures and implementation of marketing activities

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Identify the main actors of certain social processes
- Use theoretical concepts in the analysis of society
- Use sources of scientific information
- Critically judge the current social situation

Sociology of Music

269452

Lecturers

Rašeljka Krnić, izv. prof. dr. sc.
nasl. doc. dr. Irena Cajner
sc. Mraović

Course Description

The course aims to develop students' critical thinking skills, equipping them to analyze and discuss the role of music in social processes. Throughout the course, students will learn how to apply sociological theories and concepts to understand music's role in shaping and reflecting social structures, cultural norms, and collective identities. The goal is to enable students to gain a deeper understanding of complex social dynamics and structural inequalities in the context of race, class, and gender by using various examples from music production and reception.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the fundamental principles and concepts of the sociology of music.
2. Explain the application of key sociological theories and concepts in analyzing the role of music in social processes.
3. Explain the social aspects of music, including production, reception, and mediation, as well as its impact on social processes and social dynamics.
4. Explain the processes through which music reflects and shapes social structures, cultural norms, and individual and collective identities.
5. Explain the role that music plays in shaping social interactions, the formation of class, gender, and ethnic identities, as well as in politics and industrial processes.
6. Explain the role that music plays in politics and industrial processes.

Sociology of Religion

253975

Lecturer

doc. dr. sc.
Erik Brezovec

Course Description

The main goal is to acquaint students with the development of the sociology of religion, with its basic concepts and main representatives as well as to acquaint them with the sociological understanding of the role of religion and churches in society. The course takers will gain an insight into the sociological aspects of religion and religiosity, they will be equipped for a better understanding of the meaning of religion in human life and society at large, as well as with the meaning of the human influence in emergence of different types of religion. The aim of the course is to offer to the student a new perspective of religion as phenomena which in postmodern context holds an important position.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses (3rd year), 6th semester, 3rd year*)
- » Sociology (Studij) (*elective courses 1., 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic approaches of the most influential social theories of religion.
2. Evaluate critically and connect classical and modern socio-religious approaches.
3. Use analytical tools for understanding of socio-religious phenomena.
4. Use theoretical conceptualization/formulation of basic independent socio-religious research.
5. Write complex scientific papers and independently read books on social theory.
6. Implement acquired knowledge.
7. Acquire knowledge regarding sociological aspects of religion and religiosity.
8. Better understanding of the role of religion in human life and society.

Sociology of Space

200700

Lecturer

Sara Ursić,
nasl. doc. dr.
sc.

Course Description

The course deals with the theoretical research of the concept of space as a physical place and space as an arena of social phenomena and relationships. Spatiality is a dimension that is regularly included in the definitions of various sociological phenomena, and in this course, different notions of space within sociological theory are analyzed, with an emphasis on the theories of urban sociology. The space is analyzed through an interdisciplinary approach that includes urban sociology, the theory of architecture and urban design, and contemporary sociological theories.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17098) -elective courses (1 st year), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses 1., 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic terms of the sociology of space
2. Identify different concepts of space
3. Analyze and critically reflect on theories of space within a broader sociological theory
4. Relate the concept of space with different phenomena within urban sociology
5. Demonstrate an understanding of how theories are constructed
6. Point out the key problems of the sociology of space
7. Argue and present, orally and in writing, specific topics within the sociology of space

Study Programme Learning Outcomes

Dual-major studies

- active command of one foreign language in academic communication in general
- adherence to the principles of academic integrity and ethical norms of research and publishing

Software for Demographic Research

269748

Lecturer

prof. dr. sc.
Roko Mišetić

Course Description

provide the knowledge and skills needed for quantitative data analysis using computer software. The course prepares students for

the use of modern and for social sciences current and relevant computer tools. The programming language R is one of the standards in

demographic analysis.

apply these tools to solve specific problems in the field of demography, economics, geography, sociology and other disciplines in

which require quantitative data analysis. Independent use of programming language R with knowledge of appropriate statistical

method allows students a wide application in the analysis of complex relationships and cause-and-effect relationships in all disciplines that contain

structured data.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the basic syntax of the programming language R
2. Develop database loading skills and adapt the database to your own research focus
3. Reproduce acquired knowledge of statistics and demographic methods in computer software
4. Explain and apply the acquired knowledge of demographic theory to specific data analyzes
5. Explain and visualize the results of demographic analysis

Specific Psychopathology

28732

Lecturers

Petrana Brečić,
nasl. izv. prof.
dr. sc.

Anđelko
Vidović,
nasl. doc. dr.

Course Description^{SC}

To gain knowledge about specific disorders and diseases in psychopathology; categorization of mental illness; clinical features of disorders; diagnostics, epidemiology, comorbidity; course and prognosis; and various forms of treatment. To learn the methods of clinical assessment and methods of communicating with patients with mental health disorders. The adoption of the specific role of psychologists in the diagnostics and treatment of persons with mental disorders.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish between normal and psychopathological.
2. Classify psychological disorders into categories.
3. Define criteria for mental disorders and diseases.
4. Compare different types of treatment of mental disorders and diseases.
5. Create the working diagnosis on the basis of clinical interview.
6. Apply the principle of confidentiality in the relationship between psychologist and patient.
7. Apply knowledge of cultural specificity in differential diagnostics procedure

Study Programme Learning Outcomes

Psychology

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Assess mental status and classify diagnostic criteria for different psychological disorders

ECTS Credits	4.0

Course^{SC} Description

The main goal of the course is to introduce students to basic statistical concepts and techniques needed for various applications in communicology. Students, through lectures, exercises, readings and autonomous problem solving learn difference between descriptive and inferential statistics, graphical and numerical display of data, calculate and estimate average values, mod, median, learn basics in probability, learn discrete and continuous probability functions, calculate and interpret variance and standard deviation, Bernoulli, binomial, uniform, exponential, standard normal and normal probability functions. Students will be acquainted with all fundamental statistical knowledge and techniques which are being used in business practice with emphasis on interpretation of statistical parameters contained in computer outputs. Students develop statistical way of thinking and learn precise statistical manner of communication. It is expected that students demonstrate clear statistical interpretation of the results.

Study Programmes

- » Communication Studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply knowledge of fundamental concepts from other social sciences involved in the study program.
2. Define, describe and apply the basic methods of social research.
3. Demonstrate statistical literacy and methodological competence and realize their importance in modern society.
4. Apply and use the basics of statistics and statistical methods to the media to use the reflective and productive level.
5. Use of statistical thinking and develop awareness for the need of the same.
6. Explain the functions of statistical indicators in teaching, the criteria for their selection and use.
7. Select appropriate methods and techniques.
8. Collect data for statistical analysis.

Study Programme Learning Outcomes

Dual-major studies

ECTS Credits	4.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises, and orally

Prerequisites

Introduction to Social Research Methods and Statistics

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Apply methods of social research and statistics

Apply social science methods and identify research topics suitable for journalism, media, public relations and communications research

General Competencies

Use the general knowledge of society and of social processes.

Design a simple research project.

Organize the implementation of a simple research project.

Use the computer software for the analyses qualitative and quantitative data.

Use different social sciences methods in the analyses of the relevant data.

Employ the adequate methodological approach in the research of social phenomena.

Screening of student's work

0
ECTS Pohađanje nastave [EN]

2
ECTS Pismeni ispit [EN]

2
ECTS Usmeni ispit [EN]

4
ECTS

Week by Week Schedule

1. Introduction, syllabus presentation. Statistics as a science, descriptive and inferential statistics, graphical display of data.
2. Measures of central tendency: Mean – calculation, properties and interpretation.
3. Measures of central tendency: Mod.
4. Median, Quartiles – calculation, properties and interpretation.
5. Measures of dispersion. Rang, interquartile rang.
6. Measures of dispersion: Rang, interquartile rang, variance, standard deviation, coefficient of variation.
7. Calculation Descriptive statistics: Summary Statistics;MS Excel software.
8. Introduction in probability.
9. The Normal Distribution.
10. Random sampling method.
11. Confidence intervals for the mean.
12. Correlation.
13. Correlation Coefficient.
14. Data analysis: MS Excel software.
15. Applications in communication sciencies.

Course Description

The main goal of the course is to introduce students to basic statistical concepts and techniques needed for various applications in sociology. Students, through lectures, exercises, readings and autonomous problem solving learn difference between descriptive and inferential statistics, graphical and numerical display of data, calculate and estimate average values, mod, median, learn basics in probability, learn discrete and continuous probability functions, calculate and interpret variance and standard deviation, Bernoulli, binomial, uniform, exponential, standard normal and normal probability functions. Students will be acquainted with all fundamental statistical knowledge and techniques which are being used in business practice with emphasis on interpretation of statistical parameters contained in computer outputs. Students develop statistical way of thinking and learn precise statistical manner of communication. It is expected that students demonstrate clear statistical interpretation of the results.

Study Programmes

» Sociology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare for a thorough insight into the specifics, advantages and limitations of particular methods of descriptive statistics to analyze the data.
2. Apply adopted methodological knowledge in sociological research. Use statistical software.
3. Use statistical software.
4. Argue the interpretation of results obtained using different statistical methods.
5. Plan the research activities related to the use of methods and techniques of descriptive statistics.
6. Select appropriate methodological procedures.
7. Collect data for statistical analysis.

Study Programme Learning Outcomes

Dual-major studies

Sociology

Use statistics in social research

ECTS Credits 5.0

Semester Summer

English Level L1

E-learning Level L2 (20%)

Study Hours
30
30

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises/ written exam and orally

Prerequisites for
Applied statistics in social research

Describe basic research methods in sociology
 Compare sociological theory and methodology
 Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike
 Identify the basic concepts of statistics

General Competencies

Use the advanced statistical terms and information.
 Design a simple research project.
 Organize the implementation of a simple research project.
 Use the computer software for the analyses qualitative and quantitative data.
 Employ the adequate methodological approach in the research of social phenomena.
 Use different social sciences methods in the analyses of the relevant data.

Screening of student's work

1
ECTS Pohađanje nastave [EN]

2
ECTS Pismeni ispit [EN]

2
ECTS Usmeni ispit [EN]

5
ECTS

Week by Week Schedule

1. Introduction, syllabus presentation. Statistics as a science, descriptive and inferential statistics.
2. Data description, Frequency distribution. Variables and types of data.
3. Graphical display of data frequency distribution. Numerical description of data.
4. Indexes.
5. Measures of central tendency: Mean, mode – calculation, properties and interpretation.
6. Median, Quartiles– calculation, properties and interpretation.
7. Measures of dispersion. Rang, interquartile rang, variance, standard deviation, coefficient of variation. Box-plot.
8. Measures of dispersion: variance, standard deviation, coefficient of variation.
9. Standard Scores.
10. Probability. „Tree” diagram.
11. Bayes Theorem.
12. Discrete random variables and distribution function. Expected value, variance of discrete random variables.
13. Binomial distribution.
14. Poisson distribution.
15. Continuous random variables and distribution function. Normal distribution.

Systematic Pedagogy

226202

Lecturer

prof. dr. sc.
Neven Hrvatić

Course Description

Introducing students to the field of systematic pedagogy, foundations and basic terminological definitions: starting points and theoretical frameworks.

The realization of the content of the course should ensure a complete and systematic insight into the system of pedagogical science as a basis for the study of selected educational scientific disciplines within the framework of studies.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the complete structure and terminology of pedagogical science
2. Analyze the state and problems of contemporary pedagogical theory and pedagogical practice
3. Describe and interpret the most important periods, ideas and directions in the development of pedagogy
4. Analyze different pedagogical theories and discourses and establish similarities and differences between them
5. Describe the system and relationship between pedagogical disciplines and basic educational areas

ECTS Credits 4.0

Semester Winter/Summer

English Level L1

E-learning Level L3 (10%)

Study Hours
30
15

Grading

In addition to regular and active participation in lectures, students will present certain teaching contents within the framework of seminar obligations, individually and divided into smaller working groups: shorter thematic contents (study of sources-literature). After the realization of larger teaching units, the success will be evaluated through a colloquium, the results of which, together with the seminar obligations, will be an integral part of the final exam. Engagement in class: 10% of the grade Seminar obligations: 30% of the grade Colloquiums or final written exams are graded as follows: 30% Final oral exam: 30%

6. Define and explain the meaning, structure and extended activities of upbringing, education and school in the contemporary context

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Prepare and construct work assignments in the interdisciplinary field

Prepare and create different forms of presentations and seminar papers

Croatology

Apply basic computer skills

Psychology

Evaluate basic content from complementary social, humanistic and biomedical disciplines.

Sociology

Compare different social phenomena in different cultures

Grading

Tasks will be corrected and jointly commented on in the seminar. The acquired knowledge and skills will be checked by a written exam in Microsoft Word in the computer lecture hall. The student will be evaluated on the basis of timeliness and success during the semester and success in the final assessment of the knowledge.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Learning how technical format text in Microsoft Word
2. Learning how to properly communicate with the teacher by e-mail
3. Learning how to refer to other texts and to compile a list of references
4. Learn how to write a term paper.
5. Learn how to present a term paper in Microsoft PowerPoint
6. Become familiar with the legal circumstances of intellectual property

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
 adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Apply basic techniques of correct logical reasoning and conceptual analysis

Evaluates: the seminar, participation in class test (written and oral) knowledge (40:10:50).

Course Description

Introduction to the history of ancient and late antique period of the Croatian continental area, critical comparison of typical Roman elements in provincial centers, their development through a given time epoch, and finding similarities and differences with the original template (Rome). Students working group will be able to analyze the basic terms of Roman history in the continental Croatian, interpret and explain events and processes, connect them together and to compare the different results and conclusions of processing materials. Indirectly is expected development of critical thinking and evaluation of composing and ability comparisons.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)
- » History (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of the Roman expansion over the continental Croatia
2. Analyze the origins and development of Christianity
3. Explain the structure of the military administration
4. Explain the consequences of the Roman conquest
5. Combine knowledge of the importance of the ancient urban centers (Siscia) in connection with Dalmatia and the continental Croatia, and the consequences for the formation of Croatian ethnic community
6. Explain penetration of the Avars and Slavs in the continental Croatian soil, the impact of these events on the Roman provincial urban centers, and the collapse of the Empire in that territory at the end of the 6th and early 7th century

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of

historical science

Identify historical facts and processes from European and national history

Critically judge one's own work and defend one's position in team work with arguments

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

History

General Competencies

After finishing the programme student will be able to:

1. explain cause and effect relations of historical events and processes,
2. reconstruct historiographic tools in making conclusions of historical processes and events,
3. compare historical processes of different periods,
4. distinguish difference between important and non-important facts within historiographic interpretation,
5. differentiate specificities of historical periods.

Week by Week Schedule

1. Introductory lecture, introduction to the subject and literature
2. Historical sources (material and written)
3. From civil wars on the territory of ancient Italy to Principate-effects of our historical lands
4. Roman army, pacification and urbanization Illyria, indigenous people and the process of Romanization
5. City / town planning throughout history; appearance of a Roman provincial city, Vitruvius, Gaius Velleius Paterculus
6. Siscia - example of the provincial center of continental Croatia
7. Andautonia and Roman roads in the area; Roman roads
8. Ad Fines, Ad Quadrata and Aquae Balissae
9. Aquae Iasae, Aquae Vivae, Iovia, Lobor
10. Roman administration and Roman province in today's Croatia; Provincial Economy
11. Cibalae
12. Certissia and Mursa
13. Danube limes and Sirmium
14. Illyrian Provinces in late antiquity and the early development of Christianity in today's Croatian territory and during the fall of the Roman Empire on the territory of Illyria (597 to 640) end of the ancient town planning; significance and consequences
15. Fieldwork

The Croatian People in the First Half of the 20th Century

188122

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

Course objectives are to introduce students to the basic to complex and difficult problems of position and development and the suffering of the Croatian people and Croats in the first Yugoslavia during the Second World War, pointing out all those internal and external factors that have influenced this situation.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » History (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of historical events in Croatian history between 1918 and 1941,
2. Define the basic problems of Croatian history between 1918 and 1941,
3. Explain the cause-and-effect relationships in the present period,
4. Show the most relevant information about people and events in Croatian history,
5. Explain historical processes of Croatian history during the period,
6. Define historical events from Croatian history of the first half of the 20th century with those from other periods of Croatian history.
7. Describe the key actors of that period - of Croatian history
8. Evaluate the various events that shaped the present-day Republic of Croatia in the political, cultural, economic and social fields through the first half of the 20th century

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to the principles of academic integrity and ethical norms of research and publishing

ECTS Credits	5.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Activity of students will be monitored throughout the semester. Classes are required to attend.

Written and oral exam, with the possibility for colloquiums.

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Identify historical facts and processes from European and national history

Single out historical processes and explain their topic of interpretation

Create a game, quiz or questionnaire based on historical figures and events from different periods of the Croatian past

List historical sources for the study of national history

Apply the methodology of various historiographical fields and other research methods from the humanities

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

History

General Competencies

After finishing the programme student will be able to:
define historical processes typical for certain historical period,
summarize basic information of the Croatian and the World history,
identify the most important person and institutions in the Croatian and the World history,
explain cause and effect relations of historical events and processes,
reconstruct historiographic tools in making conclusions of historical processes and events.

The history of Communism from Karl Marx to Fidel Castro

173129

Course Description

The aim of this course is to acquaint the students of the graduate study of history with the totalitarian character of the communist order and the theory of Marxism that led to it. Students will be introduced to the nature of the communist order and its goals, based on the work of prominent world historians as well as the programmatic texts of prominent communist theorists and politicians.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the complex nature of the theory and practice of communist totalitarian orders, as well as the causes that led to their emergence, strengthening and collapse on the European continent
2. Explain the reasons for the emergence of communist regimes and the circumstances in which they functioned. The argumentative and critical approach focuses on developing an interest in understanding the nature of communist totalitarian regimes and their way of working in the areas they controlled and in relation to other forms of political organization.
3. Explain and promote the importance of the discussion between students and between students and professor.
4. Analyze the knowledge of students via written exam.
5. Explain the history of communism and totalitarian systems
6. Explain the differences between different types of communist order

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

History

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Identify historical facts and processes from European and national history

Identify important historical figures from different periods of European history

Express (in your own words) basic historiographical facts about world history

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Grading

Regular attendance in class, completion of preliminary exam, participation in class discussions, submission of independent research paper.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain, consider and understand the spatial, social, theoretical and methodological concepts of demography
2. Explain, consider and understand the logic and functional organizations of demographic development potential
3. Explain, consider, understand and apply different research methods in the analysis of demographic processes, links, relations and models
4. Explain, consider and understand the strategic significance of population
5. Explain, consider and understand the correlation between natural basis, social upgrading and demographic potential
6. Explain, consider and understand the general and regional concepts of organization of space and society

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Conduct relevant research on the Croatian resident and emigrant population

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop a scientifically independent opinion on demographic and emigrant issues

Week by Week Schedule

1. Introduction to theoretical and methodological concept in demography.
2. Scientific classification and approaches.
3. Inner and outer subject of research.
4. Philosophy, logic and functionality of space and society.
5. Population throughout history.
6. Research methods and techniques.
7. Geographical space and social framework.
8. Principles of classification of order of magnitude of demographic conditionality.
9. Fundamental nature of demography.
10. Social science and interdisciplinary field.
11. Grading in research approach.
12. Forecasting and modeling the objective demographic reality.
13. Autonomy of the demographic theoretical concept.
14. Meaning and role of the theoretical concept of demography within entire development.
15. Establishing and popularizing of demography.

Theoretical Systems and Models in Personality Psychology

38643

Lecturer

Boris Mlačić,
nasl. prof. dr.
sc.

Course Description

Provide explanations of major theories (both classical and contemporary), models and research in psychology to the students. identify relations between findings from the different theories and research. Explain man as a whole. Describe the main theoretical approaches in personality psychology. Describe the specific theories within the main approaches. Argue the importance of the personality in everyday life. Interpret a measurement of individual differences.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic features of different theoretical approaches to human personality.
2. Apply the acquired knowledge in the seminar activities.
3. Distinguish the main approaches to human personality.
4. Write an essay.
5. Apply acquired knowledge in later professional work.

Study Programme Learning Outcomes

Psychology

Classify the basic theoretical approaches and laws of psychological assessment and counseling in different areas of applied psychology

Critically judge theoretical approaches to the study of individual differences

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Plan the search of literature, databases and other sources of information

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Week by Week Schedule

1. Definitions of personality importance of personality psychology for the overall psychology, characteristics of theories of personality, personality theories in relation to other disciplines of psychology, research methodology personality.
2. Freud's psychodynamic theory of personality: personality structure - id, ego, superego, personality dynamics, personality development, defense mechanisms, free association, dream analysis, case studies.
3. Jung's analytical theory of the individual personality - the ego, the personal unconscious, collective unconscious, attitudes, interaction of personality, personality development, Jungian typology.
4. Social-psychology psychoanalytic theory: Adler (desire for superiority, inferiority complex, a complex of superiority, lifestyle, birth order and personality), Fromm (psychoanalysis and Marxism), Horney (anxiety, neurotic needs) and Sullivan (interpersonal theory of psychiatry, tension, transformation of energy).
5. Erikson contemporary psychoanalytic theory (Erikson's theory of psychosocial development, eight stages of man, psihohistory).
6. Lewin topological theory of personality (living space, living space region, valence, vectors, locomotion).
7. Cognitive theory of personality:
Kelly theory of personality - personal constructs, the basic postulate and its derivations, a continuum of cognitive awareness.
8. Cognitive-experiential theory of self-concept (Epstein - the nature of personality theories that emphasize the reality, the system of experience, maladaptive schemas, constructive opinion).
9. Humanistic theory of personality:
Maslow's humanistic theory of personality - assumptions about human nature, hierarchy of needs, self-actualization, man - integrated and creative being).

10. Rogers phenomenological theory - the importance of self-concept (self), the tendency of actualization, the world of experience, a fully functioning person, therapy focuses on the client).
11. Behavioral theories of personality:
Skinner's operant conditioning (behavior laws, classical and instrumental conditioning, superstitious behavior, social behavior, abnormal behavior).
12. Miller-Dollard SR theory (innate disposition for behavior, learning process, higher mental processes, social context, adoption of neuroses, psychotherapy).
13. Theories of social cognition; Bandura and social learning theories - the principles of observational learning, processes of retention, production and motivational processes, reciprocal determinism, self-system, self-efficacy; Mischel's theory - cognitive personality variables, the importance of the situation, cognitive-affective theory of personality; Rotter - primary and broader concepts of social learning, psychological needs, locus of control, interpersonal trust.
14. Structural-dispositional approach: Allport's personalological theory of personality - personality, character and temperament, the concept of personality characteristics, dispositions, propria, functional autonomy, measuring personality, the study of expressive behavior, idiographic approach;
Cattell's factorial-analytic theory of personality traits - factor analysis, features personality - Surface and original, dynamic properties, ergos and sentiments, L, Q and T data, factor analysis of the individual; Eysenck's dimensional-biological typology of personality - extraversion, neuroticism and psychoticism, description and causation in explanation of personality, the biological basis of personality.
15. Five-factor model: Velepetori model - personality dimensions in natural language - psycho lexical access, taxonomy descriptors of personality traits in different languages, creating a paradigm of personality, cross-cultural comparisons of the taxonomies; Fiove-factor model (Costa and McCrae) - dimensions of personality questionnaires.

Course Description

Introduce students to the characteristics of print media as well as the printed communication

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts in the field of print media and journalism in the print media.
2. List, explain and apply the basic theories of the press as media, journalism and the production process in print media
3. List, identify and reproduce basic stages of development of the press and key events and individuals in its its history.
4. Define, explain and understand the production process in press.
5. Identify and explain the today situation in the press, its innovations, challenges and problems and analyze them.
6. Apply journalistic skills acquired at the seminar classes.
7. Define, identify and independently use any news type.
8. Explain and critically analyze the acquired theoretical and practical knowledge.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Inform about journalism and public relations

Prepare materials for media and public relations in Croatian and English

Categorize and reexamine journalistic ethics

Organize individual and team work

Identify the foundations and theories of communication science and journalism, public relations and mass media

Identify and compare the peculiarities of individual media

Recognize the needs and willingness to engage in lifelong learning

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Categorize and reexamine journalistic ethics

Organize individual and team work

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize the needs and willingness to engage in lifelong learning

Recognize and compare the peculiarities of individual media

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of journalism that are in connection with printing and print communications.

Identify and describe the role and place of the print journalism in today society.

Reproduce, apply and explain the basic theory of the printing press and printed journalism. Explain and critically analyze theoretical and practical knowledge acquired. Identify, explain and analyze the situation, innovations, challenges and problems in printing and printed journalism. Apply journalistic skills acquired on the course for the purpose of writing a newspaper report.

Screening of student's work

- » Communication Studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify radio development throughout history and basic principles of radio as media in traditional and digital media environment.
2. Demonstrate hearing of radio as socially and politically relevant media which is important for social processes and for critical analysis of radio genre and supported contents.
3. Demonstrate critical understanding and analysis of format of radio-station as well as differentiating of program-organizational scheme and program format.
4. Analyze and compare historical development of radio in comparison with other traditional media on the basis of theoretically grounded research.
5. Identify basic principles of normative structure and functioning of radio as media in Croatian media system.
6. Estimate importance of radio as media in social democratic processes, as well as its role in information, education and entertainment of listeners.

Week by Week Schedule

1. lectures
 Acquaintance with literature, student obligations, the method of conducting classes and taking exams.
 Introduction: how television studies approaches the study of television (inseparable variables: industry-text-audience).
 The first unit: the textual landscape of television/1. part:
 planned flow:
 - Raymond Williams: planned flow and the temporal nature of television
 - planned flow in practice
 - vertical and horizontal planned flow.
 - planned flow and generic nature of television.
2. Lectures
 - planned flow and creation of meaning: aliveness, "co-presence" and intimacy
 - planned flow and creation of meaning: television text is not 'pure'
 - John Ellis: individual text is itself segmented
 - non-linear TV: personalized planned flow.
 The first unit: the textual landscape of television/2. part: TV as domestic media and the 'small screen':
 - John Ellis: the differences between television and film
 - the realism of television
 - John T. Caldwell: televisuality (television stylistic visual strategies)
3. Seminar
 Determining and deepening knowledge about the part of the material listened to, discussion about the material:
 - McQueen (2000), p. 19-23: "John Ellis and 'experiencing television'"
 - Creeber (2006), p. 12-19: "TV form and aesthetics"
 - interview with Creeber: <http://25fps.cz/2016/glen-creeber-interview/>
 Merging theory and practice: students keep a television viewing diary of themselves, their family and their closest friends (a sample of 10 people) for a week - they note which of the learned features of television they noticed, note the differences between the habits of individual family members; if they are currently away from their family, they record the habits of their roommates, interview their family by phone, record their habits. The results are presented in class and discussed.

4. Seminar

History of television:
Bignell and Woods (2023), p. 93-94: in the chapter "Inventing television technologies": three eras of television development according to Ellis
Perišin (2010), p. 25-61: "History of television: from entertainment to politics"
(notes are presented in class and discussed)

Lectures
The first unit: the textual landscape of television/3. part: TV as Bard:
- television discourse influences us
- John Fiske and John Hartley: the bardic function of television
5. Seminar

Determining the part of the material heard and discussing the material: the bard and the representation of reality
- group 1: Bignell and Woods, 2023: Television representation and identity, p. 232-248
- group 2: McQueen, 2010: Representation and stereotype, p. 179-207
(notes are presented in class and discussed)

Combining theory and practice: students, after studying the literature on the bardic function, keep a television viewing diary for a week. They choose linear television content: a Turkish soap opera, a western police series, a western sitcom (at least one episode each) and two to three factual content of their choice; for a week, they keep a diary of watching television about what kind of picture of the world each of these contents gives us, guided by the theoretical concept of the bardic roles of television.

Lectures
First unit: textual landscape of television/4. part: TV text spills over into other media:
- convergence
- transmedia storytelling
6. Seminar

Determination of the listened part of the material and discussion of the material:
Creeber, 2006: Post TV? The Future of television (together with a Case study), p. 160-168 (notes are presented in class and discussed)

Transmedia storytelling: combining theory and practice on the example of the transmedia series Skam:
Theoretical part: Bignell and Woods, 2023: 78-79,265-266 (notes are presented in class and discussed)
Practical part: students follow the series Sram (HRT; domestic version of Skam) and analyze through which media and in what way the story of the series develops.
Notes are presented in class and discussed.
7. - Verification of the fulfillment of obligations from the seminar
- Intermediate exam
8. Lectures

Second unit: television narratives and genres/1. part: TV narratives:
- seriality and narrativization as characteristics of television
- the concept of narrative
- the structure of the television narrative
- serial types: episodic series/show; series/series of shows; miniseries/short series
- hybrid serial types of application and application of the division into types on fictional and factual content

9. Lectures
Second unit: television narratives and genres/2. part: TV genres:
- genre concept
- television as a genre medium
- the main television generic groups
- contemporary division of television genres
10. Seminar
Determination of the listened part of the material and discussion of the material:
- Creeber, 2008: Introduction: What is genre, p. 1-13
- Perišin, 2010: Television news in genre theory, p. 95-118
(notes are presented in class and discussed)
Combining theory and practice (also connecting the first and second parts of the material):
First part: students from literature (Bignel and Woods, 2023; Creeber, 2008; McQueen, 2010) choose to theoretically treat one genre of their choice. They describe the chosen genre and its typical conventions, and as an example they use a specific TV text that they watched. They state and explain to which serial type and generic group that text belongs.
11. Seminar
Second part: students conduct a survey among family members and friends (at least 10 respondents) and present the results:
What is their favorite genre?
What pleasures do they find in watching that genre (what do they like)?
Do they like to watch that genre alone or in company (with whom)?
What do they think - what values does that genre promote?
Does identification and parasocial relationships with the characters occur?
Students compare results for individual genres.
Lectures
Third unit: audience:
1. The Uses and gratifications theory: motives for watching television
2. Theories of effects applied to television
12. Seminar
Determination of the listened part of the material and discussion of the material:
Čerepinko (2011): Theory of benefit satisfaction, p. 142-146; Theory of Cultivation, p. 155-159; Theory of priority setting, p. 159-163 (notes are presented in class and discussed)
Lectures
3. Stuart Hall: theory of coding and decoding of TV text (polysemic; three positions of decoding TV text)
4. Theory of the active audience of cultural studies (socio-cultural determinants of television reception)
13. Seminar
Determination of the listened part of the material and discussion of the material:
Čerepinko (2011): Cultural hegemony, ideology and cultural studies, p. 150-155; Theory of social responsibility of the media, p. 146-150; Spiral of Silence, p. 163-165 (notes are presented in class and discussed)
Lectures
5. The concept of television culture
6. Henry Jenkins: television and the concept of fan culture
7. Qualitative and quantitative industrial research of the TV audience

14. Seminar

Determination of the listened part of the material and discussion of the material:

Bignell and Woods (2023): *Television culture and globalisation*, p. 255-276

Creeber (2006): *Television and its audience*, p. 93-99 (notes are presented in class and discussed)

15. - Verification of the fulfillment of obligations from the seminar
- Intermediate exam

Theories of Media and Mass Communication

270939

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

Familiarize the students with the theoretical definition and research of mass media since the beginning of the 20th century, when it was indirectly (literary criticism, Frankfurt school) and ideologically aimed (liberals, Marxists) through the theories generated by direct study of the media and their role in society, until postmodernism.

Study Programmes

- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the role, function and objectives of the theory of media and mass communication
2. Distinguish theories of media and the theories of mass communication and their characteristics.
3. Assess the role of the studied theories in the historical development of communicology, theoretical studies and scientific research of mass communication and media.
4. Identify connections between different theories and teachings, explain and analyze them.
5. Demonstrate the ability to summarize and critically present larger materials (books)

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Theory and interpretation of literary text 188073

Lecturer

doc. dr. sc.
Domagoj
Brozović

Course Description

The main aim of the course is to introduce the basics of literature theory and the basics of the interpretation theory. Students will be introduced to the fundamental questions about the function, values and meaningful features of the text so that they can independently choose the relevant literary text, analyse it make an interpretation and to be able to write correct academic work.

Study Programmes

» Croatology -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and name literary terms in literary text
2. Apply acquired knowledge and basic tools to read, evaluate, analyze and interpret literary text
3. Distinguish between the meanings of literary text
4. Write an essay on a given topic

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms
Constructively participate in discussions on croatological topics
Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Therapeutic Pedagogy 1

201466

Lecturer

izv. prof. dr. sc.
Katarina Dadić

Course Description

Produce an awareness of the connection between medicine and pedagogy and contribute to the joint pursuit of medicine and pedagogy to improve the life quality of children and parents. Provide relevant information on health and illnesses that reduce prejudice. Present the possibilities of therapeutic pedagogy with the long-term aim to extend personal boundaries in communication with children with special needs.

Study Programmes

» Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic concepts in the field of therapeutic pedagogy.
2. Explain the basic starting points of therapeutic pedagogy.
3. Explain the place and role of therapeutic pedagogy within the educational sciences.
4. Analyze the interdisciplinary content related to clinical pedagogy.
5. Show the results of recent theoretical research in the interdisciplinary field of pedagogy and medicine.
6. Analyze the different theoretical approaches in the research presented.
7. Demonstrate the connection between theory and practice based on a case study.
8. Demonstrate the ability to plan cognitive and practical goals related to the practice.

Regular class attendance, passed preliminary exam, participation in discussion during the course, independent research work

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and recognize the migratory cycles and integration models, which serve the Croatia's development
2. Define and explain the selective migration flows within the context of a non-identify population
3. Identify the areas of possible integration and functional economic linkage between Croatia and emigration, within the context of security and development
4. Identify, explain and develop models of connecting the state of Croatia and emigrant communities, through various forms of integration
5. Identify the potential of the emigrant community (Croatian diaspora) and to link with them in various different integration patterns in order to fulfil a particular Croatia's need

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Interpret data on Croatian and global population and emigration

Week by Week Schedule

1. Introduction: Familiarise the students with the structure, content and objectives of the course; teaching methods employed, evaluation used, the student's obligations, proposal of topics for seminar papers, deadlines

2. Defining fundamental concepts: transition, state and diaspora; presentation of the theoretical approaches
3. Croatia as a part of the former Yugoslavia (1945-1991): political and economic processes, inter-ethnic relations, emigration, Croatian Spring, Croatian emigration and identity
4. Geopolitical changes in Europe and the new structure of Post-Cold war order / Southeast Europe: geographical, historical and political regional determinants
5. Political, economic and social disintegration of Yugoslavia: introduction to war; US reaction; diplomatic initiative of the European Community
6. Croatia 1990-1995: creating a state, defending the national identity (Serb rebellion, Croatian politics towards the B&H, contextual analysis of the military actions - „Flash“ and „Storm“)
7. The role of the Croatian diaspora in supporting the Croatia's independence (humanitarian, military assistance, lobbying)
8. International recognition of Croatia and the great powers
9. Croatian transition: (transformation of both the political and economic system, creating a new values system, foreign policy goals – EU and NATO membership)
10. Critical review of the transitional processes in Croatia, during the 1990's (analysing the factors of failure - war, poor economic, tycoon privatization, resistance to change, corruption and nepotism, Croatia under informal international sanctions, absenteeism investment, the first decade of independence as a "lost developmental period")
11. Impact of external actors, interest of the big powers and international organizations on integration processes and transformation, democratization and Europeanization of Croatia (international recognition, preservation of territorial integrity, choosing a transitional political and economic models as the transitional strategy, conditions for EU and NATO accession); Croatia with regard to the impact of the Conditionality Policy (Copenhagen Criteria): EU political conditions as the default political framework for transformation enactment, modernization and Europeanization of Croatia
12. The impact of Conditionality Policy (Copenhagen Criteria): EU political conditions as the default political framework for transformation. modernization and Europeanization of Croatia
13. Croatia as an EU member: political, demographic, economic and social challenges
14. Croats in Bosnia and Hercegovina as an important issue for the Croatian foreign policy (Croatia as a Dayton Agreement signatory, government strategy for protecting the Croatian people, weakened B&H constituency)
15. Geopolitical environment of the Republic of Croatia (Bosnia and Hercegovina, Kosovo; Macedonia and Serbia) and the underlying security challenges

Typology of Migration

269724

Lecturer

doc. dr. sc.
Monika
Komušanac

Course Description

The aim of the course is to present multidisciplinary theories and concepts of international migration, with a critical review of contemporary trends in Croatian society.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use basic concepts: migration, spatial mobility, types of migration, migrant groups and post-migration social processes
2. Use micro-meso-macro approaches to explain migration
3. Use knowledge of migrant networks and generation of migration flows
4. Apply knowledge of transnational social spaces
5. Apply knowledge of forms of organizing migrants
6. Apply knowledge of classical and new approaches to explaining migrant integration

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Interpret data on Croatian and global population and emigration

United nations in the Contemporary World Order

215028

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

Through learning about the history and activities of the United Nations, class will seek to define, explain and evaluate the most important aspects of the United Nations, such as maintaining peace and security in the world, developing good neighborly relations, economic cooperation, promoting tolerance,

human rights and fundamental human freedoms.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the structure of the United Nations
2. Define the differences between the League of Nations and the United Nations
3. Compare the effectiveness of the United Nations in the different periods of its activity
4. Analyze the success of United Nations peacekeeping missions
5. Assess the importance and role of the United Nations in the stability of the world order and the maintenance of peace and security
6. Assess the importance of Croatia's membership in United Nations bodies and organizations
7. Analyze the movements for reform of the Security Council and the workings of the United Nations
8. Assess the importance of establishing the Global Sustainable Development Goals by 2030

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

Visual Communication

188172

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

The Visual Communication course is designed to provide students with comprehensive theoretical knowledge and practical skills necessary for critically understanding and applying visual communication within contemporary media and digital contexts. Students will systematically explore the role of visual communication in both traditional and digital media, and will develop strategies for effectively conveying visual messages, with a particular focus on digital platforms.

Through in-depth study of key elements of visual identity, including typography, color, and logos, as well as analysis of various graphic design products and visual communication media, such as posters, photography, and video, students will develop the ability to critically analyze and interpret visual messages. This course provides the necessary knowledge and tools for applying acquired theoretical concepts in practical projects, including the creation of posters, logos, and digital visuals, thus integrating theoretical knowledge with practical skills.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Synthesize relevant theories and approaches from the field of visual communication to critically analyze contemporary media content.
2. Analyze the role of typography, color, and shapes in shaping visual messages and their impact on audience perception.
3. Create visual identities using the fundamental principles of visual design, adapted to specific social and cultural contexts.

Writing in English

38006

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To expose students to effective writing techniques in journalism, within the context(topics) covered in the required literature

To enable students to differentiate between the main styles, registers and functions of written texts

To enable students to master the rules of punctuation, sentence and paragraph structure

To enable students to apply the acquired strategies in independent writing (headlines, paragraphs, reviews, reports, etc.)

Study Programmes

- » Communication Studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use effectively their enhanced writing skills in the independent preparation of written texts related to journalism
2. Recognize and make correct use of a range of vocabulary focusing on specific terminology in the following areas: work, unemployment and welfare; crime and punishment; diplomacy and war; entertainment and arts; sports
3. Use word transformations, synonyms, antonyms, collocations
4. Demonstrate the integration of acquired grammatical and other knowledge and skills for the purpose of writing structured texts correctly
5. Use authentic materials and texts to further expand their vocabulary and enrich their spoken and written language

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

ECTS Credits 4.0

Semester Winter

English Level L1

E-learning Level L3

Study Hours 60

Grading

regular attendance and active participation in classes 30%
work on the course portfolio 30%
written exam 40%
(students must achieve a score of at least 60%)

Prerequisites for
Modern English and the Media

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Categorize and reexamine journalistic ethics

Think critically about topics related to journalism, public relations, communications and society as a whole

Write texts and prepare other materials for media and public relations in Croatian and English

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

General Competencies

Apply and make effective use of the acquired basic concepts related to communication sciences in the English language. Express themselves clearly and concisely in the written form in the English language with emphasis on English for journalists and public relations. Work efficiently both as individuals and as team members.

Week by Week Schedule

1. Characteristics of formal and informal writing style – differences in vocabulary, sentence structure, choice of grammar, etc.
2. Differences in register – presenting the same information using various registers.
3. Cohesion – the appropriate use of linking words (conjunctions and sentence adverbials).
4. Punctuation – joining sentences by means of participle and relative clauses.
5. Punctuation – the effective and appropriate use of commas, parentheses, colons and other punctuation marks.
6. Description – how to make a description interesting.
7. Description – how to make a description interesting.
8. Giving instructions and advice – avoidance of the imperative.
9. Narrative – linking events in chronological order, writing short newspaper article.
10. Narrative – linking events in chronological order, writing short newspaper article.
11. Vocabulary focusing on specific terminology in the following areas: work, unemployment and welfare; crime and punishment; diplomacy and war; entertainment and arts; sports, introduced through a range of authentic materials.
12. Vocabulary focusing on specific terminology in the following areas: work, unemployment and welfare; crime and punishment; diplomacy and war; entertainment and arts; sports, introduced through a range of authentic materials.
13. Autonomous writing tasks and student presentations.
14. Autonomous writing tasks and student presentations.
15. Autonomous writing tasks and student presentations.
